400-007 Learning Materials - New 400-007 Test Forum

Securely transfer the corporate data over the private WAN

Use a centralized configuration model.

Minimize overhead on the tunneled traffic.

Which technology can be used in the new design to meet the company\\'s requirements?

A. S-VTI

B. DMVPN

C. MGRE

D. GET VPN

Correct Answer: D

QUESTION 7

An external edge router provides connectivity from a service provider to an enterprise. Which two Internet edge best practices meet compliance regulations\\'? (Choose two)

A. Implement filtering to control traffic that is sourced from the infrastructure IP space.

B. Enable and use only secure protocols.

C. Send logs to a centralized logging collection server.

D. Implement EBGP to advertise all owned IP blocks.

E. Use login banners and interface access lists to restrict administrative access to the system

Correct Answer: BE

QUESTION 8

Company XYZ wants to use the FCAPS ISO standard for network management design. The focus of the design should be to monitor and keep track of any performance issues by continuously collecting and analyzing statistical information to monitor, correct, and optimize any reduced responsiveness across the network. Which layer accomplishes this design requirement?

A. fault management

B. accounting management

C. performance management

D. security management

Correct Answer: C

With the improvement of people's living standards, there are more and more highly educated people. To defeat other people in the more and more fierce competition, one must demonstrate his extraordinary strength. Today, getting 400-007 certification has become a trend, and 400-007 exam dump is the best weapon to help you pass certification. In order to gain the trust of new customers, 400-007 practice materials provide 100% pass rate guarantee for all purchasers. We have full confidence that you can successfully pass the exam as long as you practice according to the content provided by 400-007 exam dump. Of course, if you fail to pass the exam, we will give you a 100% full refund.

To be eligible to take the Cisco 400-007 Exam, candidates must have a valid Cisco CCDA and CCNA or CCIE certification. They must also have at least seven years of experience in the field of network design. Candidates who pass the exam will earn the Cisco Certified Design Expert (CCDE) certification, which is recognized as one of the most prestigious certifications in the IT industry.

The CCDE certification program is intended for professionals with extensive experience in network design and architecture. Cisco Certified Design Expert (CCDE) Written Exam certification is recognized globally as a mark of expertise in this field, and it is highly regarded by organizations looking to hire network designers and architects. The CCDE certification program is designed to help professionals develop the skills and knowledge needed to design and implement complex network infrastructure solutions.

100% Pass Cisco 400-007 - Fantastic Cisco Certified Design Expert (CCDE) Written Exam Learning Materials

Our 400-007 Practice Materials are compiled by first-rank experts and 400-007 Study Guide offer whole package of considerate services and accessible content. Furthermore, 400-007 Actual Test improves our efficiency in different aspects. Having a good command of professional knowledge will do a great help to your life. With the advent of knowledge times, we all need some professional certificates such as 400-007 to prove ourselves in different working or learning condition.

Cisco Certified Design Expert (CCDE) Written Exam Sample Questions (Q132-Q137):

NEW QUESTION # 132
Your company wants to deploy a new data center infrastructure.
Based on the requirements you have chosen VXLAN as encapsulation technology.
The customer is concerned about miss-configuration of Layer 2 devices and DC wide outages caused by Layer 2 loops.
What do you answer?

- A. BPDU Guard should be enabled on all VTEP access ports
- B. VXLAN offers native loop avoidance mechanism
- C. Storm Control should be enabled on all ports
- D. VPC+ could prevent L2 loop on access ports

Answer: A

NEW QUESTION # 133
Refer to the exhibit.

Your company designed a network to allow server VLANs to span all access switches in a data center In the design, Layer 3 VLAN interfaces and HSRP are configured on the aggregation switches Which two features improve STP stability within the network design? (Choose two.)

- A. root guard on access ports
- B. root guard on the aggregation switch downlinks toward access switches
- C. edge port on access ports
- D. BPDU guard on access ports
- E. BPDU guard on the aggregation switch downlinks toward access switches
- F. access switch pairs explicitly determined to be root and backup root bridges

Answer: C,D

NEW QUESTION # 134
Company XYZ wants to redesign the Layer 2 part of their network to use all uplinks for increased performance, support host reachability with conversational learning, and avoid port-channels. Which other technique can be used?

- A. TRILL
- B. Switch stack
- C. LISP
- D. MSTP

Answer: A

Explanation:
* A (TRILL - Transparent Interconnection of Lots of Links):TRILL enables multipathing at Layer 2, eliminating classic STP blocking, allowing all uplinks to be active simultaneously, and uses IS-IS based control plane for conversational MAC learning.
Other options explained:
* B: LISP operates at Layer 3 for endpoint mobility, not Layer 2 multipathing.
* C: MSTP still blocks some links under normal operation.
* D: Switch stacking merges multiple physical switches into one logical switch but does not provide true multipathing across

independent switches.

NEW QUESTION # 135

Company XYZ network runs IPv4 and IPv6 and they want to Introduce a multidomain, multicast-based network. The new design should use a flavor of PIM that forwards traffic using SPT. Which technology meets this requirement?

- A. PIM-SM
- B. PIM-DM
- C. BIDIR-PIM
- D. PIM-SSM

Answer: D

NEW QUESTION # 136

A product manufacturing organization is integrating cloud services into their IT solution. The IT team is working on the preparation phase of the implementation approach, which includes the Define Strategy step.
This step defines the scope of IT, the application, and the service. What is one topic that should be considered in the Define Strategy step?

- A. Contingency exit strategy steps
- B. Innovate and align with business according to volume
- C. Financial and governance models
- D. Due diligence and financial scenarios

Answer: C

Explanation:
* A (Financial and governance models): In the Define Strategy step, it's crucial to establish financial frameworks and governance structures that will guide the use of cloud services. This includes determining budgeting approaches (CapEx vs. OpEx), compliance, policy enforcement, risk management, and ownership of IT resources.
* Governance models also define roles, responsibilities, and accountability for managing cloud services across the organization.
Other options explained:
* B: Business alignment is important but comes after strategic governance and financial planning.
* C: Due diligence is typically performed during vendor selection or migration readiness.
* D: Contingency planning is part of exit or risk management phases, not the initial strategy step.
-

NEW QUESTION # 137

......

Many people are afraid that after they buy our 400-007 guide torrent they may fail in the exam and the refund procedure will be very complicated. We guarantee to you that the refund process is very simple and only if you provide us the screenshot or the scanning copy of your failure marks we will refund you in full immediately. If you have doubts or problems about our 400-007 Exam Torrent, please contact our online customer service or contact us by mails and we will reply and solve your problem as quickly as we can. We won't waste your money and your time and if you fail in the exam we will refund you in full immediately at one time. We provide the best 400-007 questions torrent to you and don't hope to let you feel disappointed.
