BCS Practitioner Certificate in Business Analysis Practice v5.0 認定 BAPv5 試験問題 (Q24-Q29):

質問 # 24

Efua is planning to use Design Thinking to improve the m-store customer experience She has asked you to suggest good techniques to help with the different stages.

Looking at the list of techniques and stages below which THREE combinations SHOULD be of benefit to Efua?

- A. Define Current user needs or problems.
- B. Evaluate Mind Mapping
- C. Create Personas
- D. Prototype: Scenario Analysis
- E. Empathise Customer Journey Map

正解: A、C、E

解説:

Explanation

Design Thinking is an approach for solving complex problems by focusing on human needs and desires. It involves five stages: empathise, define, ideate, prototype and test. Therefore, options B, D and E are correct answers, as they suggest good techniques to help with the different stages of Design Thinking. Empathise is the stage where the problem is explored from the perspective of the users and their emotions, motivations and pain points are understood. A good technique to help with this stage is Customer Journey Map, which is a visual representation of the steps and emotions that a user goes through when interacting with a product or service. It helps to identify the pain points and opportunities for improvement in the user experience. Create is the stage where the users are represented by creating personas, which are fictional characters that embody the characteristics, goals and needs of a typical user group. Personas help to empathise with the users and design solutions that suit their preferences and expectations. Define is the stage where the problem is clearly defined and articulated based on the insights gained from the empathise stage. A good technique to help with this stage is Current user needs or problems, which is a statement that summarises what the users need or want to achieve and what prevents them from doing so. It helps to focus on the core problem and set the direction for ideation. Option A is not a correct answer, as Prototype is not a stage of Design Thinking, but a technique that can be used in the Prototype stage. Prototype is the stage where the ideas are turned into tangible and testable prototypes that can be used to demonstrate and evaluate the solutions. A good technique to help with this stage is Scenario Analysis, which is a technique that explores how different scenarios or situations could affect the outcomes of the solutions. It helps to test the feasibility and desirability of the prototypes. Option C is not a correct answer, as Evaluate is not a stage of Design Thinking, but a technique that can be used in the Test stage. Test is the stage where the prototypes are tested with real users and feedback is collected and analysed to refine and improve the solutions. A good technique to help with this stage is Mind Mapping, which is a technique that organises and visualises information in a hierarchical and associative way. It helps to capture and structure feedback and identify patterns and insights.

質問 # 25

A business analyst is reviewing the stakeholder management strategy for a high profile Human Resources (HR) project Following an organisational restructure, Harvey's role has changed from Director of Operations to Director of HR and he has inherited sponsorship of the project Harvey was previously involved in the project, but had little interest because his focus was on the Operational Projects that he sponsored.

Which of the following sets of stakeholder management strategies represent appropriate approaches for Harvey; firstly, for when the project started and secondly now that his role has changed?

- A. Constant active management, keep informed
- B. Watch, Constant active management
- C. Keep informed; Constant active management
- D. Ignore, Constant active management

正解: B

解説:

A stakeholder management strategy is a plan for how to engage and communicate with stakeholders based on their level of interest and influence in the organisation or project. A stakeholder management strategy can vary depending on the stakeholder's position on the power/interest grid, which has four quadrants: high power, high interest; high power, low interest; low power, high interest; and low power, low interest. Therefore, option C is the correct answer, as it represents appropriate stakeholder management strategies for Harvey based on his position on the grid before and after his role change. Watch means to monitor the stakeholder's level of interest and influence and keep them informed of relevant developments. This is suitable for when Harvey was in the low power, low interest quadrant, as he had little authority or concern over the project. Constant active management means to involve the stakeholder closely in the project and seek their input and feedback regularly. This is suitable for when Harvey moved to the high power, high interest quadrant, as he became the sponsor and owner of the project. Option A is not a correct answer, as keep informed means to provide the stakeholder with sufficient information and updates to maintain their interest and support. This is more suitable for when Harvey was in the low power, high interest quadrant, not the low power, low interest quadrant. Option B is not a correct answer, as ignore means to disregard the stakeholder's views and needs and exclude them from communication. This is not a good strategy for any stakeholder, especially one who has some power or influence over the project. Option D is not a correct answer, as constant active management means to involve the stakeholder closely in the project and seek their input and feedback regularly. This is more suitable for when Harvey was in the high power, high interest quadrant, not the low power, low interest quadrant.

質問 # 26

IT services has commissioned a new desktop PC replacement project that has been funded and running for three months, with a fully-engaged sponsor and programme manager appointed. The head of IT services has not been involved beyond the initial project start-up interviews and has not attended any of the project meetings. What position on the power interest and does the head of IT services currently occupy?

- A. Some power and influence and some interest
- B. Low power and influence but high interest
- C. High power or influence but low interest
- D. High power or influence and high interest

正解: C

解説:

A power/interest grid is a tool for analysing stakeholders based on their level of power or influence and their level of interest or involvement in the organisation or project. The grid has four quadrants: high power, high interest; high power, low interest; low power, high interest; and low power, low interest. The position of a stakeholder on the grid can help to determine the appropriate strategy for engaging and communicating with them. Therefore, option A is the correct answer, as the head of IT services currently occupies the high power, low interest quadrant. This means that he has the authority or ability to affect the outcome of the project, but he does not show much concern or involvement in it. Option B is not correct, as some power and influence and some interest would place the head of IT services in the middle of the grid, which is not a distinct quadrant. Option C is not correct, as high power or influence and high interest would place the head of IT services in the top right quadrant, which is not consistent with his lack of involvement. Option D is not correct, as low power and influence but high interest would place the head of IT services in the bottom right quadrant, which is not consistent with his authority.

質問 # 27

Maria is a business analyst working for a large supermarket chain, where she has been asked to work on a project exploring the potential opportunities of wearable technology. This work has led her to visit parts of the organisation that she has never come into contact with before and whilst observing and interviewing staff working in various stores and warehouses, she has identified a number of concerns, including noticeable gaps in staff training, stores and warehouses that seem to require extensive repair, and store management worries about cash flow. Maria is aware that these concerns are not directly related to the project she has been assigned to. However, she feels she has a responsibility to make her management team aware of these issues. As a way of enabling her organisation to fully explore these concerns and understand if any further intervention is required, which of the following would be the MOST valuable?

- A. Porter's Five Forces model
- B. PESTLE
- C. Resource audit
- D. SWOT.

正解: D

解説:

A SWOT analysis is a technique for identifying and evaluating the strengths, weaknesses, opportunities and threats that affect an organisation or project. It helps to assess the internal and external factors that influence the performance and potential of the organisation or project. Therefore, option B is the correct answer, as a SWOT analysis would be the most valuable technique for enabling the organisation to fully explore the concerns and understand if any further intervention is required. A SWOT analysis would help to identify the strengths and weaknesses of the organisation's current situation, such as the gaps in staff training, the state of the stores and warehouses, and the cash flow issues. It would also help to identify the opportunities and threats that arise from the external environment, such as the market trends, customer preferences, competitors' actions, and regulatory changes. A SWOT analysis would provide a comprehensive picture of the organisation's situation and help to prioritise the areas that need improvement or attention. Option A is not a correct answer, as a resource audit is a technique for identifying and evaluating the resources that an organisation has or needs to achieve its objectives. It helps to assess the availability and quality of the organisation's resources, such as human, physical, financial and intangible resources. A resource audit would not be sufficient to fully explore the concerns and understand if any further intervention is required, as it would only focus on one aspect of the organisation's situation and not consider the external factors that affect it. Option C is not a correct answer, as a PESTLE analysis is a technique for identifying and evaluating the political, economic, social, technological, legal and environmental factors that affect an organisation or project. It helps to assess the opportunities and threats that arise from the external environment. A PESTLE analysis would not be sufficient to fully explore the concerns and understand if any further intervention is required, as it would only focus on one aspect of the organisation's situation and not consider the internal factors that affect it. Option D is not a correct answer, as Porter's Five Forces model is a technique for analysing the competitive forces that shape an industry or market. It helps to assess the attractiveness and profitability of an industry or market by examining five forces: rivalry among existing competitors, threat of new entrants, threat of substitute products or services, bargaining power of suppliers, and bargaining power of buyers. Porter's Five Forces model would not be relevant to fully explore the concerns and understand if any further intervention is required, as it would not address the issues that affect the organisation internally.

質問 # 28

A group of stakeholders at FlyMe travel operators are in a meeting to discuss the Business Activity Model (BAM) for a new subsidiary business. They are planning to launch a new offering, which will offer 'flight bundle' packages for organization that regularly need to send their staff overseas. The following activities have been identified so far:

- a) Monitor 'flight bundle' sales
- b) Sell 'flight bundles'
- c) Determine demand amongst existing customers
- d) Identify potential airline earners
- e) Determine 'flight bundle' locations,
- f) Define bundle pricing.

Although the Operations Director for FlyMe is supportive of the new business proposition, she is not entirely convinced there is a gap in the market, nor is she confident that the idea will be profitable.

With these concerns in mind, which planning activities will she be keen to ensure are discussed before the meeting ends?

- A. b, d and e
- B. a, b, d and e.
- C. c and f
- D. a, c and f

正解: C

解説:

The Operations Director for FlyMe is concerned about the market demand and profitability of the new business proposition. Therefore, she will be keen to ensure that the planning activities that address these concerns are discussed before the meeting ends. These activities are c and f, as they involve determining the demand amongst existing customers and defining the bundle pricing. These activities will help to assess the feasibility and viability of the new offering. Option A is the correct answer.
