# Free PDF Quiz NIS-2-Directive-Lead-Implementer - PECB Certified NIS 2 Directive Lead Implementer Newest Reliable Test Dumps

NIS-2-Directive-Lead-Implementer Exam Questions of Actual4Exams are ideal for the students who are willing to prepare for the exam in a short time. The PECB Certified NIS 2 Directive Lead Implementer (NIS-2-Directive-Lead-Implementer) professionals have worked hard on making this product one of the most successful and user-friendly. This PECB Certified NIS 2 Directive Lead Implementer (NIS-2-Directive-Lead-Implementer) exam prep material came into existence after talking to many PECB professionals and getting their positive feedback. The Actual4Exams guarantees the customers that if they fail to pass the PECB Certified NIS 2 Directive Lead Implementer (NIS-2-Directive-Lead-Implementer) exam despite all their efforts they can claim a refund according to some terms and conditions.

Are you still feeling distressed for expensive learning materials? Are you still struggling with complicated and difficult explanations in textbooks? Do you still hesitate in numerous tutorial materials? NIS-2-Directive-Lead-Implementer study guide can help you to solve all these questions. NIS-2-Directive-Lead-Implementer certification training is compiled by many experts over many years according to the examination outline of the calendar year and industry trends. With NIS-2-Directive-Lead-Implementer Study Guide, you only need to spend 20 to 30 hours practicing to take the exam. In addition, NIS-2-Directive-Lead-Implementer certification training has a dedicated expert who updates all data content on a daily basis and sends the updated content to the customer at the first time. Therefore, using NIS-2-Directive-Lead-Implementer guide torrent, you don't need to worry about missing any exam focus.

Regular Updates in Real PECB NIS-2-Directive-Lead-Implementer Exam Questions

Nowadays, a certificate is not only an affirmation of your ablity but also help you enter a better company. NIS-2-Directive-Lead-Implementer learning materials will offer you an opportunity to get the certificate successfully. We have a professional team to search

for the information about the exam, therefore NIS-2-Directive-Lead-Implementer Exam Dumps of us are high-quality. We also pass guarantee and money back guarantee. Just think that, you just need to spend some money, and you can get a certificate, therefore you can have more competitive force in the job market as well as improve your salary.

PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q45-Q50):

NEW QUESTION # 45
Scenario 4: StellarTech is a technology company that provides innovative solutions for a connected world. Its portfolio includes groundbreaking Internet of Things (IoT) devices, high-performance software applications, and state-of-the-art communication systems. In response to the ever-evolving cybersecurity landscape and the need to ensure digital resilience, StellarTech has decided to establish a cybersecurity program based on the NIS 2 Directive requirements. The company has appointed Nick, an experienced information security manager, to ensure the successful implementation of these requirements. Nick initiated the implementation process by thoroughly analyzing StellarTech's organizational structure. He observed that the company has embraced a well-defined model that enables the allocation of verticals based on specialties or operational functions and facilitates distinct role delineation and clear responsibilities.

To ensure compliance with the NIS 2 Directive requirements, Nick and his team have implemented an asset management system and established as asset management policy, set objectives, and the processes to achieve those objectives. As part of the asset management process, the company will identify, record, maintain all assets within the system's scope.

To manage risks effectively, the company has adopted a structured approach involving the definition of the scope and parameters governing risk management, risk assessments, risk treatment, risk acceptance, risk communication, awareness and consulting, and risk monitoring and review processes. This approach enables the application of cybersecurity practices based on previous and currently cybersecurity activities, including lessons learned and predictive indicators. StellarTech's organization-wide risk management program aligns with objectives monitored by senior executives, who treat it like financial risk. The budget is structured according to the risk landscape, while business units implement executive vision with a strong awareness of system-level risks. The company shares real-time information, understanding its role within the larger ecosystem and actively contributing to risk understanding. StellarTech's agile response to evolving threats and emphasis on proactive communication showcase its dedication to cybersecurity excellence and resilience.

Last month, the company conducted a comprehensive risk assessment. During this process, it identified a potential threat associated with a sophisticated form of cyber intrusion, specifically targeting IoT devices. This threat, although theoretically possible, was deemed highly unlikely to materialize due to the company's robust security measures, the absence of prior incidents, and its existing strong cybersecurity practices.

Based on scenario 4, which framework is StellarTech's structured approach to managing risks aligned with?

- A. ISO 31000
- B. ENISA Risk Management Framework
- C. COSO ERM Framework

Answer: A

NEW QUESTION # 46
Scenario 4: StellarTech is a technology company that provides innovative solutions for a connected world. Its portfolio includes groundbreaking Internet of Things (IoT) devices, high-performance software applications, and state-of-the-art communication systems. In response to the ever-evolving cybersecurity landscape and the need to ensure digital resilience, StellarTech has decided to establish a cybersecurity program based on the NIS 2 Directive requirements. The company has appointed Nick, an experienced information security manager, to ensure the successful implementation of these requirements. Nick initiated the implementation process by thoroughly analyzing StellarTech's organizational structure. He observed that the company has embraced a well-defined model that enables the allocation of verticals based on specialties or operational functions and facilitates distinct role delineation and clear responsibilities.

To ensure compliance with the NIS 2 Directive requirements, Nick and his team have implemented an asset management system and established as asset management policy, set objectives, and the processes to achieve those objectives. As part of the asset management process, the company will identify, record, maintain all assets within the system's scope.

To manage risks effectively, the company has adopted a structured approach involving the definition of the scope and parameters governing risk management, risk assessments, risk treatment, risk acceptance, risk communication, awareness and consulting, and risk monitoring and review processes. This approach enables the application of cybersecurity practices based on previous and currently cybersecurity activities, including lessons learned and predictive indicators. StellarTech's organization-wide risk management program aligns with objectives monitored by senior executives, who treat it like financial risk. The budget is structured according to the risk landscape, while business units implement executive vision with a strong awareness of system-level risks. The company shares real-time information, understanding its role within the larger ecosystem and actively contributing to risk

understanding. StellarTech's agile response to evolving threats and emphasis on proactive communication showcase its dedication to cybersecurity excellence and resilience.

Last month, the company conducted a comprehensive risk assessment. During this process, it identified a potential threat associated with a sophisticated form of cyber intrusion, specifically targeting IoT devices. This threat, although theoretically possible, was deemed highly unlikely to materialize due to the company's robust security measures, the absence of prior incidents, and its existing strong cybersecurity practices.

Based on scenario 4, what will StellarTech identify record, and maintain during asset management?

- A. An asset portfolio
- B. An asset management plan
- C. An asset framework

Answer: C

NEW QUESTION # 47

Which of the following entities are excluded from the scope of the NIS 2 Directive?

- A. Public administration entities involved in law enforcement activities
- B. Regulatory entities
- C. Entities with only marginal relevance to the areas of national security, public security, defense, or law enforcement activities

Answer: A

NEW QUESTION # 48

According to Article 7 of the NIS 2 Directive, what is one of the policies that Member States are required to adopt?

- A. Physical access control policy
- B. Supply chain cybersecurity policy
- C. Disaster recovery planning policy

Answer: B

NEW QUESTION # 49

Scenario 2:

MHospital, founded in 2005 in Metropolis, has become a healthcare industry leader with over 2,000 dedicated employees known for its commitment to qualitative medical services and patient care innovation. With the rise of cyberattacks targeting healthcare institutions, MHospital acknowledged the need for a comprehensive cyber strategy to mitigate risks effectively and ensure patient safety and data security. Hence, it decided to implement the NIS 2 Directive requirements. To avoid creating additional processes that do not fit the company's context and culture, MHospital decided to integrate the Directive's requirements into its existing processes. To initiate the implementation of the Directive, the company decided to conduct a gap analysis to assess the current state of the cybersecurity measures against the requirements outlined in the NIS 2 Directive and then identify opportunities for closing the gap.

Recognizing the indispensable role of a computer security incident response team (CSIRT) in maintaining a secure network environment, MHospital empowers its CSIRT to conduct thorough penetration testing on the company's networks. This rigorous testing helps identify vulnerabilities with a potentially significant impact and enables the implementation of robust security measures. The CSIRT monitors threats and vulnerabilities at the national level and assists MHospital regarding real-time monitoring of their network and information systems. MHospital also conducts cooperative evaluations of security risks within essential supply chains for critical ICT services and systems. Collaborating with interested parties, it engages in the assessment of security risks, contributing to a collective effort to enhance the resilience of the healthcare sector against cyber threats.

To ensure compliance with the NIS 2 Directive's reporting requirements, MHospital has streamlined its incident reporting process. In the event of a security incident, the company is committed to issuing an official notification within four days of identifying the incident to ensure that prompt actions are taken to mitigate the impact of incidents and maintain the integrity of patient data and healthcare operations. MHospital's dedication to implementing the NIS 2 Directive extends to cyber strategy and governance. The company has established robust cyber risk management and compliance protocols, aligning its cybersecurity initiatives with its overarching business objectives.

Based on the scenario above, answer the following question:

Is the role of the MHospital's CSIRT regarding vulnerability assessment in alignment with the requirements of Article 11 of the NIS 2

Directive?

- A. No, according to Article 11, the CSIRT should not conduct scanning of the network and information systems of the entity as this should be done during the coordinated vulnerability disclosure
- B. No, the CSIRT should not be involved in vulnerability management, as defined in Article 11
- C. Yes, the role of the CSIRT is consistent with vulnerability assessment requirements specified in Article 11

Answer: C

NEW QUESTION # 50

......

Actual4Exams exam dumps have two version-PDF and SOFT version which will give you convenient. It is very convenient for you to use PDF real questions and answers. And you can download these materials and print it out for study at any time. The SOFT version simulates the real exam which will give you more realistic feeling. When you are faced with the real exam, you can pass PECB NIS-2-Directive-Lead-Implementer test easily.
