

156-590 Valid Exam Book, Examcollection 156-590 Vce

The screenshot shows the ExamCollection PREMIUM website interface. At the top, there is a navigation bar with links for HOME, PREMIUM, EXAM FORMATTER, UPLOAD, EXAM REQUEST, MY ACCOUNT, FAQ, BLOG, CONTACT, and CART. Below the navigation bar, there is a search bar and a section titled "Unlimited Access to Premium Files". A table lists various exam dumps with columns for the exam name, the number of questions, the last update date, and a download link. The table includes exams from vendors like Acme Packet, AC583, Adobe, Alcatel-Lucent, and Apple. To the right of the table, there is a sidebar with a "How to Open VCE Files" section and a "READ NOW" button.

	# of Questions	Last Update	Download
Acme Packet			
APS-001 - Acme Packet Certification	0	Feb 01, 14	VCE ZIP

156-590 test online - CheckPoint 156-590 test dumps insides

The bundle has an CheckPoint 156-590 exam questions and answers, desktop practice software, and web-based software. All the preparation products have been designed carefully with advice from hundreds of professional CheckPoint certified experts. This CheckPoint 156-590 exam questions preparation material has everything to achieve success in the Check Point Certified Threat Prevention Specialist (CTPS) exam on the first attempt. The unique features of Iteamguide 156-590 Preparation products have been noted. The 156-590 pdf exam questions by Iteamguide have the most realistic CheckPoint 156-590 exam questions. This 156-590 pdf covers all the 156-590 Exam Questions from the previous exam as well as the upcoming Check Point Certified Threat Prevention Specialist (CTPS) exam. You don't need to consult different books for the CheckPoint certification exam with the Iteamguide.

CheckPoint Check Point Certified Threat Prevention Specialist (CTPS) Sample Questions (Q27-Q32):

NEW QUESTION # 27

What kind of information is stored in the Audit Log?

- A. An audit log is a record of system event logs on the Security Management Server.
- B. An audit log is a record of actions taken by administrators.
- C. An audit log is a portion of the traffic log which has been filtered by filter expression defined by the administrator.
- D. An audit log is a record of system event logs on the Security Gateway.

Answer: B

NEW QUESTION # 28

Task: Customize Threat Prevention profile for web servers with fewer protections.

Answer:

Explanation:

See the Explanation.Explanation:

- 1- Clone an existing profile, name it Web_Servers_Profile.
- 2- Disable Anti-Bot (not applicable for outbound traffic).
- 3- Keep Anti-Virus and IPS with only essential protections enabled.
- 4- Set high-performance protections to "Detect" or "Inactive."
- 5- Apply the profile to traffic destined for web servers.

NEW QUESTION # 29

Task: Test connection to Check Point Update Services.

Answer:

Explanation:

See the Explanation.Explanation:

- 1- SSH into Gateway.
- 2- Use: curl -v https://updates.checkpoint.com.
- 3- Validate certificate and connection success.
- 4- Check DNS resolution of update servers.
- 5- Use SmartConsole > Logs to monitor blocked connections if failed.

NEW QUESTION # 30

Which of the following protocols can be scanned by Anti-Virus?

- A. SNMP
- **B. CIFS**
- C. RemoteDesktop
- D. Telnet

Answer: B

Explanation:

The correct answer is C. CIFS . Check Point Anti-Virus scans file-transfer and content-bearing protocols, not arbitrary management or terminal protocols. The official Anti-Virus settings documentation lists the protocols Anti-Virus can scan as Web HTTP/HTTPS , FTP , SMB , and Mail SMTP or POP3 , with additional support for IMAP and POP3.

CIFS is closely associated with Microsoft file sharing and the SMB protocol family. In the exam context, CIFS maps to the file-sharing traffic class that Anti-Virus can inspect through SMB scanning. This is why CIFS is the correct option. Remote Desktop is an interactive remote-control protocol, not a file-inspection protocol for Anti-Virus scanning in this question. SNMP is a monitoring and management protocol and does not normally carry files for malware inspection. Telnet is an interactive terminal protocol and is not an Anti- Virus file-scanning protocol. The certification distinction is that Anti-Virus inspection focuses on files and content objects crossing supported protocols, especially web downloads, FTP transfers, SMB/CIFS file access, and mail attachments. Reference topics: Anti-Virus Settings, protocol scanning, SMB/CIFS inspection, file-transfer inspection, Threat Prevention protected scope.

NEW QUESTION # 31

Task: Update Anti-Bot and Anti-Virus signatures manually.

Answer:

myportal.utt.edu.tt, myportal.utt.edu.tt, myportal.utt.edu.tt, myportal.utt.edu.tt, Disposable vapes
