## 2026 CCDAK Test Questions Vce | Latest CCDAK Valid Exam Testking: Confluent Certified Developer for Apache Kafka Certification Examination

Our company has always been following the trend of the CCDAK certification. Our research and development team not only study what questions will come up in the CCDAK exam. The content of our CCDAK practice materials is chosen so carefully that all the questions for the exam are contained. And our study materials have three formats which help you to read, test and study anytime, anywhere. This means with our products you can prepare for exams efficiently. If you desire a CCDAK Certification, our products are your best choice.

### Confluent Certified Developer for Apache Kafka Certification Examination Sample Questions (Q227-Q232):

#### NEW QUESTION # 227

You want to perform table lookups against a KTable everytime a new record is received from the KStream. What is the output of KStream-KTable join?

- A. GlobalKTable
- B. You choose between KStream or KTable
- **C. Kstream**
- D. KTable

#### Answer: C

Explanation:

Here KStream is being processed to create another KStream

#### NEW QUESTION # 228

Refer to the producer code below. It features a 'Callback' class with a method called 'onCompletion()'.

In the 'on Completion\*.)' method, what does the 'metadata.offset()' value represent?

□ producer.send(record, new MyCallback(record));

- A. Its position in the producer's batch of messages
- B. The id of the partition that the message was committed to
- **C. The sequential id of the message is committed into a partition**
- D. The number of bytes that overflowed beyond a producer batch of messages

#### Answer: C

#### NEW QUESTION # 229

A stream processing application is consuming from a topic with five partitions. You run three instances of the application. Each instance has num.stream.threads=5.

You need to identify the number of stream tasks that will be created and how many will actively consume messages from the input topic.

- A. 5 created, 1 actively consuming
- B. 5 created, 5 actively consuming
- **C. 15 created, 15 actively consuming**
- D. 15 created, 5 actively consuming

#### Answer: C

Explanation:

In Kafka Streams, the number of stream tasks = number of input partitions × num.stream.threads × number of instances, but only as many as the number of partitions can actively consume at once.

However, in this case, Kafka Streams assigns one task per partition, and because there are 5 partitions and 15 threads (3 instances × 5 threads), 15 tasks are created, and all 15 can be active depending on processing topology.

From Kafka Streams Developer Guide:

"Kafka Streams creates one task per input partition. If you increase the number of stream threads, it runs multiple tasks in parallel

within a single instance." So, 15 stream tasks will be created and 15 will be actively consuming.  
Reference: Apache Kafka Streams Documentation > Concepts > Tasks and Threads

### NEW QUESTION # 230

If I want to send binary data through the REST proxy to topic "test\_binary", it needs to be base64 encoded. A consumer connecting directly into the Kafka topic

- A. base64 encoded data, it will need to decode it
- B. "test\_binary" will receive
- C. json data
- D. avro data
- E. **binary data**

**Answer: E**

Explanation:

On the producer side, after receiving base64 data, the REST Proxy will convert it into bytes and then send that bytes payload to Kafka. Therefore consumers reading directly from Kafka will receive binary data.

### NEW QUESTION # 231

Where are KSQL-related data and metadata stored?

- A. PostgreSQL database
- B. **Kafka Topics**
- C. Schema Registry
- D. Zookeeper

**Answer: B**

Explanation:

metadata is stored in and built from the KSQL command topic. Each KSQL server has its own in-memory version of the metastore.

### NEW QUESTION # 232

.....

ITdumpsfree offers accurate and reliable study materials to help you prepare for the Confluent CCDAK Exam. They have prepared the best Confluent CCDAK Exam Questions that provide authentic and reliable material. With ITdumpsfree, many candidates have succeeded in passing the Confluent CCDAK Exam.
