

Latest Oracle 1Z0-1195-25 Mock Test - Latest 1Z0-1195-25 Dumps

P.S. Free & New 1Z0-1195-25 dumps are available on Google Drive shared by Pass4cram: <https://drive.google.com/open?id=18xXTVHEi2xVlqfTabTwGvkw4O8oZ9F3>

To examine the content quality and format, free 1Z0-1195-25 brain dumps demo are available on our website to be downloaded. You can compare these top 1Z0-1195-25 dumps with any of the accessible source with you. To stamp reliability, perfection and the ultimate benefit of our content, we offer you a 100% money back guarantee. Take back your money, if you fail the exam despite using 1Z0-1195-25 Practice Test.

Oracle 1Z0-1195-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> MySQL and NoSQL: This section measures the skills of Database Developers and Data Engineers in working with Oracle MySQL HeatWave Database Service. It focuses on their features and uses cases for modern application development.
Topic 2	<ul style="list-style-type: none"> Data Lake, Data Warehouse, and Machine Learning: This section evaluates the expertise of Data Scientists and Big Data Engineers in understanding UCI's Data Lakehouse architecture, Oracle Machine Learning capabilities, and Data Mesh architecture for managing distributed data environments.
Topic 3	<ul style="list-style-type: none"> Resiliency: This section tests the knowledge of Database Security Engineers and Disaster Recovery Specialists in implementing Oracle's Maximum Security Architecture and Maximum Availability Architecture to ensure database resiliency and high availability.
Topic 4	<ul style="list-style-type: none"> Data Management Introduction: This section of the exam measures the skills of Data Architects and Cloud Database Specialists in understanding Oracle's data management strategy. It covers Oracle's database offerings, deployment options, and multi-cloud and hybrid cloud solutions for managing data using Oracle Cloud Infrastructure.

Oracle Latest 1Z0-1195-25 Mock Test Exam | 1Z0-1195-25: Oracle Data Platform 2025 Foundations Associate – 100% free

Oracle certification will be a qualification assess standard for experienced workers, it is also a breakthrough for some workers who are in bottleneck. 1Z0-1195-25 new test camp materials are a good helper. For most IT workers it also increases career chances. For companies one certification increases strong competitive power. 1Z0-1195-25 New Test Camp materials will make you stand out from peers in this field applicable in all over the world.

Oracle Data Platform 2025 Foundations Associate Sample Questions (Q41-Q46):

NEW QUESTION # 41

What set of NoSQL-style APIs can be used in Autonomous JSON Database?

- A. OSDA (Oracle Simple Document Access)
- B. OASD (Oracle Application Storage Definition)
- **C. SODA (Simple Oracle Document Access)**
- D. DOSA (Document Open Solution Access)

Answer: C

Explanation:

The "Autonomous JSON Database" supports NoSQL-style document access through "SODA" (Simple Oracle Document Access) APIs (B). SODA provides a simple, intuitive interface for developers to interact with JSON documents stored in the database using operations like insert, query, and update, without requiring SQL knowledge. Options A ("OASD"), C ("DOSA"), and D ("OSDA") are not recognized API sets in Oracle's documentation. SODA is explicitly documented as the standard NoSQL API for Autonomous JSON Database, aligning with Oracle's converged database strategy to support multiple data models.

NEW QUESTION # 42

Supply Side is data that is passive and means something. What two models and libraries are included in the supply side?

- A. Technical definitions of business terms
- **B. Business rules**
- C. Reports
- **D. Domain objects**

Answer: B,D

Explanation:

In the Oracle Data Platform, the "Supply Side" refers to foundational data elements that are passively collected and structured to provide meaning within the data ecosystem. According to Oracle's official documentation, the supply side includes "Business rules" (A), which define the logic and policies governing data usage, ensuring consistency and compliance, and "Domain objects" (B), which represent structured entities or concepts within a business domain, forming the backbone of data modeling. "Technical definitions of business terms" (C) pertain to metadata management, and "Reports" (D) are outputs rather than core supply-side models. Oracle's Data Platform Foundations emphasize business rules and domain objects as key components of the supply side for data integration and processing.

NEW QUESTION # 43

Which statement is not the responsibility of the customer in a simple cloud management model?

- A. Everything inside of the database
- B. Control access to customer VMs
- **C. Manage database servers and VM hosts**
- D. Subscribe to database servers

Answer: C

Explanation:

In a simple cloud management model (e.g., Autonomous Database), "Manage database servers and VM hosts" (A) is not the customer's responsibility; Oracle handles infrastructure management. Customers "Subscribe to database servers" (B), manage "Everything inside of the database" (C) like data and schemas, and "Control access to customer VMs" (D) where applicable. Oracle's shared responsibility model delegates server and host management to the provider.

NEW QUESTION # 44

How does the Converged Database help to access data using an API?

- **A. A REST API is automatically generated on top of SQL or stored procedures**
- B. The database provides only one universal REST interface which makes integration of applications extremely agile
- C. Developers can point their application to the location of ADB Wallet which integrates all REST API calls
- D. Each database comes with a REST-enabled compute instance to provide access to data

Answer: A

Explanation:

The "Converged Database" facilitates API access by "A REST API is automatically generated on top of SQL or stored procedures" (B), using Oracle REST Data Services (ORDS). This allows developers to expose database logic as RESTful endpoints without manual coding. Option A is incorrect, as no separate compute instance is provided. Option C oversimplifies, as multiple REST interfaces can be created, not just one. Option D misrepresents the ADB Wallet's role, which is for security, not API generation. Oracle's documentation highlights ORDS auto-generation as a converged feature.

NEW QUESTION # 45

A customer is looking to migrate their old database backups from their on-premises data center to Oracle Cloud Infrastructure (OCI). Which OCI service is the most cost-effective?

- A. Object Storage (standard)
- **B. Archive Storage**
- C. Block Volume
- D. File Storage

Answer: B

Explanation:

For migrating "old database backups" to OCI, "Archive Storage" (D) is the most cost-effective service. Archive Storage offers the lowest cost per gigabyte for long-term, infrequently accessed data, ideal for backups that don't require immediate retrieval. "Object Storage (standard)" (A) is more expensive and suited for frequent access, "Block Volume" (B) is high-performance and costly, and "File Storage" (C) is for active file systems. Oracle's storage pricing and use case documentation recommend Archive Storage for cost-effective backup archival.

NEW QUESTION # 46

.....

Our 1Z0-1195-25 practice materials are distributed at acceptable prices. These interactions have inspired us to do better. Now passing rate of them has reached up to 98 to 100 percent. By keeping minimizing weak points and maiming strong points, our 1Z0-1195-25 Exam Materials are nearly perfect for you to choose. As a brand now, many companies strive to get our 1Z0-1195-25 practice materials to help their staffs achieve more certifications for our quality and accuracy.
