# Test Certification HPE7-J02 Cost - Valid HPE7-J02 Study Plan
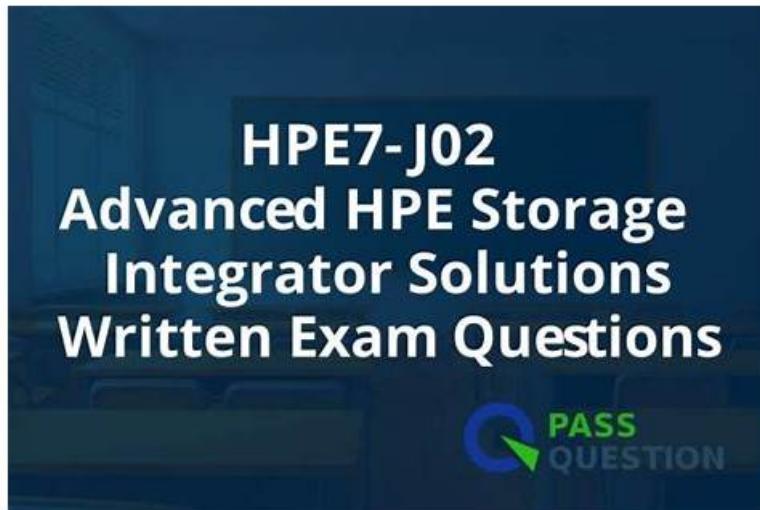

Are you still feeling stressful to the increasing difficulty of the HPE7-J02 exam? If the answer is yes, you may wish to spend a little time learning our HPE7-J02 study materials. You will think this is the most correct thing you did for preparing for the HPE7-J02 Exam. Our HPE7-J02 exam guide can help you pass the exam more efficiently. Just click to the free demos and you will get the exam questions to have a check!

## HP HPE7-J02 Exam Syllabus Topics:

| Topic | Details |
|---|---|
| Topic 1 | • Storage Transport in Multi-Site Solutions: This section evaluates the skills of Storage Architects in describing and applying transport technologies within multi-site solutions. It involves distinguishing between SAN topologies, analyzing transport components, and recommending advanced data protection methods to ensure reliability across enterprise environments. |
| Topic 2 | • Remote Support Configuration: This small but important section tests the ability of System Administrators to configure HPE solutions for remote support, ensuring proactive monitoring and timely resolution of technical issues. |
| Topic 3 | • Advanced Troubleshooting and Prevention: This section focuses on the ability of Support Engineers to identify root causes of issues and implement advanced preventive measures. It emphasizes building resilience in customer environments to minimize future disruptions. |
| Topic 4 | • Planning and Validating Storage Solutions: This section assesses the role of Storage Consultants in evaluating complex, multi-vendor environments. Candidates will demonstrate their ability to plan, size, and validate storage solutions tailored for enterprise workloads, ensuring proposals meet customer requirements effectively. |
| Topic 5 | • Storage Access and Data Protection: This part of the exam tests the expertise of Infrastructure Engineers in configuring storage access, provisioning capacity, and applying replication policies. It also covers disaster recovery validation and role-based access control to secure storage operations. |
| Topic 6 | • Optimizing the Customer's Environment: This domain evaluates the skills of Optimization Specialists in identifying opportunities for improvement. Candidates will design and validate optimization plans that enhance customer environments, ensuring measurable performance and efficiency gains. |

| Topic 7 | • Competitive Positioning of HPE Storage: This part of the exam focuses on the ability of Trusted Advisors to identify competitive opportunities for HPE Storage solutions. It requires articulating HPE's strengths in comparison to multi-vendor environments, customer needs, and market trends, helping customers make informed technology choices. |
| --- | --- |

## Valid HPE7-J02 Study Plan, Reliable HPE7-J02 Exam Preparation

Because of the different habits and personal devices, requirements for the version of our HPE7-J02 exam questions vary from person to person. To address this issue, our HPE7-J02 actual exam offers three different versions for users to choose from. The PC version is the closest to the real test environment, which is an excellent choice for windows - equipped computers. And this version also helps establish the confidence of the candidates when they attend the HPE7-J02 Exam after practicing.

## HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q40-Q45):

NEW QUESTION # 40
A financial services company is planning to upgrade its data center infrastructure. Their considerations are:
Budget Management: Prefer one-time expense, avoid variable costs.
Flexibility: Growth planned in yearly budget cycles.
Ownership: Want to own equipment outright.
Operational Control: Full control of equipment lifecycle and customization.
Which procurement option best meets these needs?

- A. Capital lease
- B. Consumption model
- C. Capital purchase
- D. Operating lease

Answer: C

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
The requirements align with a Capital Purchase - outright ownership with a one-time CapEx expense. This provides complete lifecycle control and no ongoing payments, fitting the financial services company's budgeting and governance model.
Distractors:
A: Operating lease is OpEx, variable payments, and no ownership.
B: Capital lease provides eventual ownership but still requires periodic lease payments.
C: Consumption model (e.g., GreenLake) uses variable OpEx, opposite of the customer's request.
Key Concept: CapEx model = one-time purchase, ownership, full control.
Reference: HPE Financial Services Procurement Options Guide.

NEW QUESTION # 41
Your customer has 2 Alletra 6000 arrays configured for asynchronous replication. The facilities team is planning grid maintenance in the datacenter hosting the source array. They want to proactively move all host I/O to the target array.
Which action needs to be done on the Alletra group level to move the host I/O to the other datacenter?

- A. Handover
- B. Failover
- C. Promote
- D. Demote

Answer: B

## NEW QUESTION # 42

Your customer wants to use their HPE Alletra Storage MP B10000 array to store persistent data for Kubernetes-based applications. After deploying the CSI driver using Helm and creating the secret with the command kubectl create -f hpe-backed.yaml, what is the next required step to enable the containerized applications to consume persistent volumes on the Alletra MP array?

- A. Create a PersistentVolume by using kubectl create -f pv.yaml
- B. Create a PersistentVolumeClaim by using kubectl create -f my-pvc.yaml
- C. Update the Helm repository by using helm repo update to recognize the CSI driver
- D. Define a StorageClass by running kubectl create -f storageclass.yaml

**Answer: D**

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
After installing the HPE CSI driver and creating backend secrets, the next critical step is to define a StorageClass that references the backend driver and parameters. Without the StorageClass, Kubernetes cannot dynamically provision PersistentVolumes (PVs). Once the StorageClass is created, workloads can request storage using PersistentVolumeClaims (PVCs).
Distractors:
A: Helm repo update only refreshes Helm charts; it does not enable CSI provisioning.
B: A PVC requires a StorageClass to bind dynamically - it cannot be created successfully beforehand.
C: Manually creating PVs is possible, but not the HPE best practice with CSI, which relies on StorageClass for dynamic provisioning.
Key Concept: Kubernetes CSI workflow: Secret # StorageClass # PVC # Pod.

## NEW QUESTION # 43

Refer to the exhibit.

The array is experiencing frequent cache misses for read operations.
Which action plan would you suggest to correct the issue?

- A. Upgrade the setup with additional expansion shelf.
- B. Increase the flash to disk ratio.
- C. Increase the pinned cache size.
- D. Upgrade the controllers to Alletra 5050 models.

**Answer: B**

Explanation:
Detailed Explanation:
Rationale for Correct answer:
Frequent cache misses occur when the working dataset does not fit effectively in cache. Increasing the flash- to-disk ratio ensures a higher portion of hot data is served from flash media rather than backend disk, reducing cache miss penalties. This is the standard HPE recommendation for read-intensive workloads where cache is insufficient.
Distractors:
A: Adding shelves adds capacity, not cache-to-data efficiency.
B: Upgrading controllers increases CPU, but not necessarily cache efficiency.
C: Pinned cache is intended for metadata or specific workloads, not large-scale read caching.
Key Concept: Flash-to-disk ratio optimization reduces cache misses.
Reference: HPE Alletra Performance Sizing Guide.

## NEW QUESTION # 44

A growing technology company is planning to upgrade its data center infrastructure. Their considerations:
Budget: Predictable monthly payments, no upfront CapEx.
Flexibility: Long-term use, no forced returns.
Ownership: Prefer eventual ownership, spread payments.
Control: Full customization and upgrades.

Which procurement option best meets their needs?

- A. Consumption based
- B. Operating lease
- C. Capital lease
- D. Capital purchase

**Answer: C**

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
A Capital Lease (also known as a finance lease) spreads costs over time like OpEx, while giving the customer the ability to own the equipment at the end of the lease term. This matches the desire for predictable payments, eventual ownership, and full control.
Distractors:
A (Consumption model): GreenLake provides OpEx flexibility but does not lead to ownership.
B (Operating lease): Pure rental; equipment must be returned, no ownership.
C (Capital purchase): Requires large upfront payment, which the customer wants to avoid.
Key Concept: Capital Lease = predictable payments + ownership path.
Reference: HPE Financial Services Procurement Options.

**NEW QUESTION # 45**

......

We provide free update to the client and the discounts to the old client. We provide free update of our HPE7-J02 exam materials within one year and after one year the client can enjoy the 50% discounts. The old clients enjoy some certain discounts when they buy our HPE7-J02 exam torrent. Our experts check whether there is the update of the test bank every day and if there is the system will send to the client automatically. We choose the most typical questions and answers which seize the focus and important information and the questions and answers are based on the real exam. So you can master the most important HPE7-J02 Exam Torrent in the shortest time and finally pass the exam successfully.
