Oracle Project Management Cloud 2025 Implementation Professional Sample Questions (Q25-Q30):

NEW QUESTION # 25
Identify three purposes for which the project resource search index is used. (Choose three.)

- A. Display resource details
- B. Calculate Resources Availability Scores
- C. Provide absence details for resources
- D. Filter counts while you search for resources
- E. Calculate Resource Qualification Scores

Answer: A,D,E

Explanation:
The project resource search index is used to store and retrieve information about project resources such as their availability, qualifications, preferences, etc. The project resource search index is used for three purposes:
* Display resource details: The project resource search index provides the resource details such as name, email, job title, organization, etc. that are displayed on the resource search page.
* Filter counts while you search for resources: The project resource search index provides the filter counts that show how many resources match each filter criterion on the resource search page.
* Calculate Resource Qualification Scores: The project resource search index provides the qualification information such as skills, certifications, languages, etc. that are used to calculate the Resource Qualification Scores for each resource based on their match with the resource request. The project resource search index does not provide absence details for resources or calculate Resource Availability Scores. These are provided by other components such as Oracle Fusion Absence Management and Oracle Fusion Human Capital Management. NEW QUESTION # 26
Your organization has a requirement to retrieve the value of the cost center segment based on the department.
Which source can you use while defining the account rule to achieve this requirement?

- A. Expenditure Business Unit Cost Center Segment
- B. Expenditure Organization Cost Center Segment
- C. Event Organization Cost Center Segment
- D. Project Organization Cost Center Segment

Answer: B

Explanation:
The source that can be used while defining the account rule to achieve this requirement is Expenditure Organization Cost Center Segment. This source allows you to retrieve the value of the cost center segment based on the expenditure organization of the transaction. The expenditure organization is an attribute of a transaction that represents the organization that incurs or owns the cost of the transaction.

NEW QUESTION # 29
Your client has implemented Oracle Cloud Applications with their United States business unit and United Kingdom business unit. After six months, they acquired another company in China and added a China business unit. A project accountant in your organization is authorized to access transactions for the US, UK, and China business units. The project accountant can see the transactions for the US and UK business units but not for the China business unit. Why is he not able to see the transactions for the China business unit? (Choose the best answer.)

- A. The China business unit is associated with a different legal entity than the US and UK business units.
- B. The JOB role relevant to the China business unit is not assigned to the project accountant.
- C. The US and UK business units are linked to different ledgers than the China business unit.
- D. The project accountant is not assigned to the external role that grants access to the China business unit.

Answer: D

Explanation:
To access transactions for a business unit, the project accountant needs to be assigned to an external role that grants access to that business unit. The external role is defined by the security profile of the business unit and can be different for each business unit. The job role and the legal entity are not relevant for accessing transactions for a business unit. The ledger is relevant for accounting transactions, but not for project transactions.
