## Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q63-Q68):

**NEW QUESTION # 63**
What is one of the biggest benefits of decentralized decision-making?

- A. Ensures strategic decisions are made collaboratively
- B. Improves transparency
- C. Removes accountability from leaders
- D. Reduces delays

**Answer: D**

Explanation:
Decentralized decision-making is one of the principles of the Lean-Agile mindset, which is the foundation of SAFe. It empowers teams and individuals to make decisions based on the local context and the best available information, rather than waiting for approval from higher authorities. This reduces delays, increases speed, and improves responsiveness to customer needs. It also fosters innovation, learning, and ownership of the outcomes. **NEW QUESTION # 64**
_____ Value Streams contain the steps and the people who deliver end-user value using the business Solutions created by the _____ Value Streams

- A. Development, Operational
- B. Operational, Economic
- C. Development, Customer
- D. Operational, Development

**Answer: D**

**NEW QUESTION # 65**
Which of the following areas is the main concern of the RTE role?

- A. Program Execution
- B. Content Management
- C. Technology
- D. Human Resource

**Answer: A**

**NEW QUESTION # 66**
Quality is first and foremost a function of what in a Lean-Agile concept?

- A. Deployment on demand
- B. Preserving options
- C. Culture of shared responsibility
- D. Empowered Solution authority

**Answer: C**

Explanation:
Quality is the first and foremost function of the second core value of SAFe, which is Built-in Quality1. Built- in Quality is a set of practices to help ensure that the outputs of Agile teams in business and technology domains meet appropriate quality standards throughout the process of creating customer value2. Built-in Quality requires a culture of shared responsibility, where everyone on the team is accountable for the quality of the work products and the system as a whole2. This culture fosters collaboration, feedback, and continuous improvement, and enables faster delivery and better outcomes2. ## NEW QUESTION # 67

What is the recommended length of an Iteration?

- A. Four weeks
- **B. Two weeks**
- C. Ten weeks
- D. Eight weeks

**Answer: B**

Explanation:
An Iteration is a fixed timebox during which an Agile team delivers a potentially releasable increment of value. The recommended length of an Iteration is two weeks, as this allows for fast feedback, adaptation, and learning cycles. Longer Iterations may increase the risk of overcommitment, scope creep, and reduced quality.
Shorter Iterations may increase the overhead of planning and coordination, and reduce the amount of value delivered per Iteration.
