## F5 BIG-IP DNS Specialist Sample Questions (Q67-Q72):

### NEW QUESTION # 67

What is the topology record Request Destination components in topology records Configuration?

- A. Is the criteria that should be chosen to identify the Configuration Component that will participate in resolving the query
- B. Is the criteria that should be chosen to identify the client that will participate in resolving the query

**Answer: A**

Explanation:

The Request Destination component in topology records Configuration is the criteria used to identify the Configuration Component that will be involved in resolving the query. It specifies the destination to which the query is directed and helps determine which Configuration Component will handle the request.

### NEW QUESTION # 68

What is the importance of having Different IP addresses assigned to the same FQDN ?

- A. No benefit
- B. Used for Proxy
- C. It provides a Failover capability if a one IP address Went Down

**Answer: C**

Explanation:

Having different IP addresses assigned to the same FQDN provides failover capability in case one of the IP addresses goes down. This ensures that the service remains accessible even if one of the IP addresses becomes unavailable, improving the overall reliability and availability of the service.

Domain

F5 GTM concept

### NEW QUESTION # 71

Using the Configuration Utility

How can we display the Current status of the wide IP?

- A. From the Configuration utility go to
- B. DNS > SSLB> Wide IPs > Wide IP List
- C. DNS > GSLB > Wide IPs > Wide IP List
- D. From the Configuration utility go to

**Answer: A**

Explanation:

To display the current status of the wide IP, you need to navigate to the Wide IP List under the DNS section in the Configuration Utility. This location provides a comprehensive view of all wide IPs configured in the system, including their current status and configuration details. It is the correct path to access the information you need for monitoring and troubleshooting wide IPs.
