Pass4sure NICET ITFAS-Level-1 Pass Guide | ITFAS-Level-1 Dump

FreeDumps is a trusted platform that is committed to helping NICET ITFAS-Level-1 exam candidates in exam preparation. The NICET ITFAS-Level-1 exam questions are real and updated and will repeat in the upcoming NICET ITFAS-Level-1 Exam. By practicing again and again you will become an expert to solve all the ITFAS-Level-1 exam questions completely and before the exam time.

NICET Inspection and Testing of Fire Alarm Systems Level I Exam Sample

Questions (Q19-Q24):

NEW QUESTION # 19

What is the testing frequency of a remote annunciator?

- A. Monthly
- B. Quarterly
- C. Annually
- D. Semiannually

Answer: C

Explanation:

Remote annunciators provide fire alarm system status at secondary locations. NFPA 72 mandates annual functional testing of these devices to ensure they correctly display and sound appropriate signals.

NFPA 72 (2022), Table 14.4.3.2 - Testing Methods and Frequencies:

Category: Annunciators (remote)

Frequency: Annually

Test Method: "Verify correct visual/audible indication of alarm, supervisory, and trouble signals." Technicians must activate actual alarm, supervisory, and trouble signals and confirm they display correctly at the remote annunciator.

Correct answer: D. Annually

NEW QUESTION # 20

After 15 years, what should be done with nonrestorable, spot-type heat detectors in lieu of testing?

- A. Replace 2 devices
- B. Replace 5 devices
- C. Replace all devices
- D. Replace 15 devices

Answer: C

Explanation:

If you choose not to send a sample of devices to a lab for testing, then all nonrestorable, fixed-temperature spot-type heat detectors must be replaced after 15 years.

NFPA 72 (2022), Section 14.4.4.4.1:

"After 15 years from the date of installation, all fixed-temperature, nonrestorable heat detectors shall be replaced or tested using a method approved by the manufacturer." If testing is not performed, then replacement of all devices is required.

Correct answer: D. Replace all devices

NEW QUESTION # 21

When is the elevator recall permitted to send a supervisory signal in lieu of an alarm signal?

- A. Where approved by the system designer
- B. Where approved by the building owner
- C. Where approved by the authority having jurisdiction
- D. Where approved by the insurance company

Answer: C

Explanation:

Elevator recall typically generates an alarm signal, but under specific circumstances, the AHJ may approve the use of a supervisory signal instead.

NFPA 72 (2022), Section 21.3.3.3 (Exception):

"Where permitted by the AHJ, activation of elevator recall initiating devices shall be permitted to result in a supervisory signal." This allows flexibility with AHJ approval, not at the discretion of designers or owners.

Correct answer: A. Where approved by the authority having jurisdiction

NEW QUESTION # 22

What is the adjustment range for smoke detectors that have a provision for field adjustment of sensitivity?

- A. No less than 0.6% per foot (1.95% per meter)
- B. No more than 0.6% per foot (1.95% per meter)
- C. No more than 1.2% per foot (3.90% per meter)
- D. No less than 1.2% per foot (3.90% per meter)

Answer: A

Explanation:

For smoke detectors that allow field sensitivity adjustment, NFPA 72 provides a minimum allowable sensitivity range to ensure the detector still provides proper protection.

NFPA 72 (2022), Section 17.7.3.2.1.1.3:

"If a detector has a field-adjustable sensitivity, the range shall be not less than 0.6 percent/ft obscuration (1.95 percent/m)." This means the minimum range must include 0.6%/ft- detectors can be more sensitive, but not less.

Correct answer: A. No less than 0.6% per foot (1.95% per meter)

NEW QUESTION # 23

How is a projected beam detector inspected?

- A. Use an optical filter
- B. Remote test switch
- C. Introduce smoke
- D. Check for obstruction

Answer: D

Explanation:

For inspection purposes (not testing), projected beam detectors are visually checked for obstructions, alignment issues, and cleanliness of lenses.

NFPA 72 (2022), Table 14.3.1 - Inspection Frequencies:

"Projected beam smoke detectors" # Inspect quarterly

Method: Check for obstruction, alignment, cleanliness

Testing uses an optical filter, but inspection is visual.

Correct answer: A. Check for obstruction

NEW QUESTION # 24

.....

The NICET ITFAS-Level-1 exam questions are designed and verified by experienced and qualified NICET ITFAS-Level-1 exam trainers. So you rest assured that with Inspection and Testing of Fire Alarm Systems Level I Exam (ITFAS-Level-1) exam dumps you can streamline your ITFAS-Level-1 exam preparation process and get confidence to pass Inspection and Testing of Fire Alarm Systems Level I Exam (ITFAS-Level-1) exam in first attempt.
