MCCQE權威認證 & MCCQE考古題更新

據調查，現在IT行業認證考試中大家最想參加的是Medical Council of Canada的MCCQE考試。確實，這是一個非常重要的考試，這個考試已經被公開認證了。此外，這個考試資格可以證明你擁有了高技能。然而，和考試的重要性一樣，這個考試也是非常難的。要想通過考試是很困難的，但是請不要擔心。因為Fast2test可以幫助你通過困難的MCCQE認證考試。

最新的 MCCQE Part 1 MCCQE 免費考試真題 (Q128-Q133):

問題 #128

A 52-year-old man presents to the Emergency Department with a history of back, neck, and shoulder pain sustained from a workplace incident 4 years ago. He is under observation by a multidisciplinary pain clinic, and his next appointment is not for another 4 weeks. He does not report any recent change in his symptoms.

His medications are as follows:

Acetaminophen

1000 mg orally 4 times daily

Naproxen

500 mg orally twice daily

Amitriptyline

25 mg orally at bedtime

* Acetaminophen 1000 mg orally four times daily

* Naproxen 500 mg orally twice daily

* Amitriptyline 25 mg orally at bedtime

The patient has not taken his medications for several weeks because he thinks they are not working. He requests a prescription for oxycodone because he tried some that a friend sold him, and it worked very well.

After completing an assessment and providing counseling, which one of the following is the best next step?

- A. Obtain a urine toxicology screen.
- B. Provide a naloxone kit.
- C. Prescribe a short course of tramadol.
- D. Offer to prescribe cannabis.

答案： A

解題說明：

Given the request for opioids and history of non-prescribed opioid use (oxycodone obtained from a friend), the next appropriate step is to conduct a urine drug screen. This helps assess current substance use and guides safe prescribing decisions.

Toronto Notes 2023 - Pain Management and Addiction Medicine:

"Urine drug screening is recommended before initiating opioid therapy or when there is suspicion of substance misuse. A history of using non-prescribed opioids mandates assessment for opioid use disorder and further risk stratification." MCCQE1 Objectives - Internal Medicine > Chronic Pain:

"Candidates must assess for opioid misuse and dependence before initiating opioid therapy. Urine drug testing is a standard tool in this assessment." Providing naloxone (A) may be appropriate later if opioids are prescribed, but the priority is evaluation.

Cannabis (B) is not first-line and lacks controlled evidence in chronic pain. Tramadol (D) is an opioid-like agent and not appropriate until misuse risk is evaluated.

問題 #129

A 20-year-old nulligravid woman presents with severe pain during menstruation. She is unable to take nonsteroidal anti-inflammatory drugs (NSAIDs) and is adamant about not taking any hormonal therapy. She has questions about non-medicinal therapeutic options. Which one of the following recommendations is the most appropriate?

- A. Massage therapy
- B. Laparoscopic uterine nerve ablation (LUNA)
- C. Progesterone-releasing intrauterine device
- D. Spinal manipulation
- E. High-frequency transcutaneous electrical nerve stimulation (TENS)

答案： E

解題說明：

TENS has been shown to be effective for managing primary dysmenorrhea when pharmacological options are contraindicated or refused. It works by interfering with pain signal transmission and increasing endorphin levels.

Toronto Notes 2023 - Gynecology, Dysmenorrhea:

"High-frequency TENS is effective in managing primary dysmenorrhea and can be considered when NSAIDs or hormonal therapies are not acceptable to the patient." MCCQE1 Objectives - Gynecology > Menstrual Disorders:

"Candidates must be aware of non-pharmacological interventions for dysmenorrhea, including TENS and heat therapy." Options D and E involve hormonal or surgical intervention. Spinal manipulation and massage (B and C) lack consistent evidence for dysmenorrhea relief.

問題 #130

Your colleague's receptionist asks you to assess her 4-year-old daughter who has had 2 episodes of acute otitis media in the last month. The mother wants you to arrange a consultation with an ear, nose and throat (ENT) specialist to get a tympanostomy before her daughter starts school. You do not believe there is a surgical indication at this time. Which one of the following is the best next step?

- A. Explain that there is no indication for the surgery but refer her daughter for consultation.
- B. Suggest that the next time they go to the Emergency Department for quicker access to the ENT consultant.
- C. Call the ENT consultant on call to discuss your dilemma.
- **D. Decline to send her daughter for consultation and explain your decision.**
- E. Ask another family physician to see the daughter due to a conflict of interest.

答案： D

解題說明：

Referrals should be medically indicated. Physicians are not obligated to refer simply because a patient (or colleague) requests it, especially when it may lead to unnecessary care. The ethical and appropriate action is to explain your medical reasoning and decline an unwarranted referral.

Toronto Notes 2023 - ELOM, "Professionalism and Resource Stewardship" Section:

"Physicians have a responsibility to act as gatekeepers to specialist services and should not refer patients when criteria are not met. Explaining the reasoning and declining the request respectfully is appropriate." MCCQE1 Objectives (ELOM > 99-1:

Professionalism and Clinical Judgment):

"Candidates must demonstrate ethical reasoning in managing requests for unwarranted interventions." Involving the emergency department (B) or another physician (C) is not appropriate unless there's a true conflict of interest. Calling a consultant (E) may be unnecessary if no medical reason exists.

問題 #131

A 45-year-old man presents to your family practice for follow-up because he has had repeated transient ischemic attacks and had been advised not to drive. During the interview, you find out that he is still driving.

He explains that he only drives to the grocery store and his wife, who also has a driver's license, is always a passenger with him. He insists he can drive. You think that he should no longer be driving a car. Which one of the following is the best next step?

- **A. Communicate your concerns to the motor vehicle licensing authority.**
- B. Discuss this further with him.
- C. Consult a neurologist to assess whether the patient is fit to drive.
- D. Refuse to treat him further unless he stops driving.
- E. Physically take away his license.

答案： A

解題說明：

In most Canadian provinces and territories, physicians are legally obligated to report patients who pose a danger due to medical conditions affecting driving ability. Given the history of TIAs and continued unsafe driving, reporting is necessary for public safety.

Toronto Notes 2023 - ELOM, "Fitness to Drive" Section:

"Physicians must report to motor vehicle authorities if a patient poses a risk to public safety due to a medical condition. TIAs are considered reportable if they impair ability and the patient does not comply with driving restrictions." MCCQE1 Objectives (ELOM > 99-1: Medical Fitness and Reporting):

"Candidates must recognize situations requiring mandatory reporting of patients unfit to drive due to neurologic or other impairing conditions." You may still discuss with the patient (B), but this does not replace the duty to report. Physically taking the license (C) is illegal. Refusing care (D) is unethical. A neurologist (E) could be helpful but would delay action in a clear case.

問題 #132

A 37-year-old man comes to the office for follow-up of his opioid use disorder. He receives opioid agonist treatment, including some take-home doses. At this follow-up visit, he reports some nonprescription opioid use since his last visit. Which one of the following is the best next step?

- A. Discontinue take-home doses
- **B. Increase the frequency of follow-up visits**

- C. Slowly taper and discontinue the opioid agonist
- D. Taper the dosage of the opioid agonist
- E. Prescribe a cannabinoid

答案： B

解題說明：

Nonprescription opioid use during opioid agonist therapy is not uncommon. The response should be supportive and not punitive. Increasing the frequency of follow-up enhances monitoring, supports adherence, and prevents relapse.

Toronto Notes 2023 - Psychiatry, "Substance Use Disorders":

"Patients who relapse during opioid agonist treatment benefit from closer monitoring and increased support, including more frequent follow-up and psychosocial interventions." MCCQE1 Objectives (Psychiatry > 71-5: Substance Use and Addiction):

"Candidates must manage relapses in opioid use by optimizing follow-up and support, not by discontinuing or reducing therapy prematurely." Tapering or discontinuing therapy (A, E) risks destabilizing treatment. Removing take-home doses (B) may be warranted later but not first. Cannabinoids (D) are not first-line adjuncts.

問題 #133

.....

Fast2test是一個優秀的IT認證考試資料網站，在Fast2test您可以找到關於Medical Council of Canada MCCQE認證考試的考試心得和考試材料。您也可以Fast2test免費下載部分關於Medical Council of Canada MCCQE考試的考題和答案。Fast2test還將及時免費為您提供有關Medical Council of Canada MCCQE考試材料的更新。並且我們的銷售的考試考古題資料都提供答案。我們的IT專家團隊將不斷的利用行業經驗來研究出準確詳細的考試練習題來協助您通過考試。總之，我們將為您提供你所需要的一切關於Medical Council of Canada MCCQE認證考試的一切材料。

MCCQE權威認證: <https://tw.fast2test.com/MCCQE-premium-file.html>

我們Fast2test MCCQE權威認證的MCCQE權威認證 - MCCQE Part 1 Exam 考古題是能滿足大多數客戶需求的學習資料，當他們使用我們的考古題已經通過相關認證考試的考生成為了Fast2test MCCQE權威認證的回頭客，而且，如果是參加MCCQE課堂學習，在良好的氛圍下，我們的學習熱情會更高，學習動力會更足，Medical Council of Canada 免費下載MCCQE考題 相信你對我們的產品會很滿意的，你发现诀窍了吗，如何才能順利通過MCCQE考試，對於MCCQE Part 1 Exam - MCCQE的MCCQE Part 1認證，如果獲得該項資格認證工程師，可以讓你增加求職砝碼，我們保證MCCQE考古題的品質，百分之百通過考試，對於購買我們網站MCCQE題庫的客戶，還可以享受一年更新服務。

但他哪裏能想到未明庭根本就是扮豬吃老虎，前者還只是意氣之爭，後者就是真正的結仇了，我們Fast2test MCCQE的MCCQE Part 1 Exam 考古題是能滿足大多數客戶需求的學習資料，當他們使用我們的考古題已經通過相關認證考試的考生成為了Fast2test的回頭客。
