

C_TS470_2412 Real Braindumps | Valid C_TS470_2412 Test Notes

2026 Latest Prep4pass C_TS470_2412 PDF Dumps and C_TS470_2412 Exam Engine Free Share:
<https://drive.google.com/open?id=1W-j98zs57gK5Lpuz83L6fyXKtc2XJIRq>

C_TS470_2412 Online test engine is convenient and easy to study, and it supports all web browsers, and you can practice offline if you like. Most importantly, C_TS470_2412 Online test engine has testing history and performance review, and you can have a general review of what you have learned before next practice. In addition, we offer you free demo for C_TS470_2412 Exam Dumps for you to have a try, so that you can know what the complete version is like. We have online and offline service for C_TS470_2412 exam dumps, and if you are bothered by any questions, you can have a conversion with us, and we will give you the professional advice.

Owing to our high-quality C_TS470_2412 real test and high passing rate, our company has been developing faster and faster and gain good reputation in the world. Our education experts are adept at designing and researching exam questions and answers of C_TS470_2412 study torrent. What's more, we can always get latest C_TS470_2412 exam information resource. We have unique advantages on study guide materials. Our high passing rate is the leading position in this field. We are the best choice for candidates who are eager to pass exams and acquire the certifications. Our C_TS470_2412 Actual Exam will be definitely conducive to realizing the dream of obtaining the certificate.

Valid C_TS470_2412 Test Notes, Accurate C_TS470_2412 Answers

There is no doubt that obtaining this C_TS470_2412 certification is recognition of their ability so that they can find a better job and gain the social status that they want. Most people are worried that it is not easy to obtain the certification of C_TS470_2412, so they dare not choose to start. We are willing to appease your troubles and comfort you. We are convinced that our C_TS470_2412 test material can help you solve your problems. Compared to other learning materials, our products are of higher quality and can give you access to the C_TS470_2412 certification that you have always dreamed of.

SAP C_TS470_2412 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Service Order Management: This section of the exam measures the skills of SAP Service Operations Consultants and covers the end-to-end management of service orders within SAP. It includes the creation, processing, tracking, and fulfillment of service requests, ensuring seamless coordination between departments. Proper service order management enables organizations to enhance customer satisfaction, streamline operations, and improve response times through integrated workflows.
Topic 2	<ul style="list-style-type: none"> Service Master Data: This section of the exam measures the skills of SAP Master Data Specialists and covers the management and configuration of service-related master data within SAP environments. It includes defining service objects, managing attributes, and ensuring accurate data flow across modules. Effective service master data management helps improve service delivery, optimize resource utilization, and maintain consistency across business processes.
Topic 3	<ul style="list-style-type: none"> Organizational Data: This section of the exam measures the skills of Enterprise Data Managers and covers the structuring and management of organizational data within SAP systems. It focuses on defining key organizational elements, configuring data hierarchies, and ensuring proper integration across business units. Mastery of this domain is essential for maintaining accurate reporting structures, workflow efficiency, and compliance with enterprise-wide data governance policies.
Topic 4	<ul style="list-style-type: none"> Managing Clean Core: This section of the exam measures the skills of SAP Solution Architects and covers the principles of maintaining a clean core within SAP systems. It focuses on strategies for minimizing customizations, leveraging standard SAP functionalities, and ensuring system integrity while allowing for necessary extensions. The goal is to enhance system performance, ease upgrades, and maintain long-term sustainability.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service Sample Questions (Q16-Q21):

NEW QUESTION # 16

Which type of objects can you maintain in the object list assigned to a contract item? Note: There are 3 correct answers to this question.

- A. Equipment bill of material
- B. Document
- C. Product**
- D. Functional location**
- E. Equipment**

Answer: C,D,E

NEW QUESTION # 17

Which feature is unique for solution quotations in SAP standard delivery?

- A. Using configurable products
- B. Using product bundles**
- C. Determining service contracts
- D. Using product proposals

Answer: B

Explanation:

Comprehensive and Detailed In-Depth Explanation:

In SAP S/4HANA Cloud Private Edition, Service, the solution quotation is a specialized transaction type (e.g., SRVP in standard delivery) designed to offer customers a combination of products and services as a bundled solution. This capability is distinct from other quotation types, such as standard service quotations (e.g., scope item 4GA), and is part of the solution order management process introduced in SAP S/4HANA to support complex sales scenarios. Let's analyze each option to identify the unique feature in the standard delivery:

* Using product proposals (A): Product proposals are a feature in SAP S/4HANA Service that suggest items (e.g., spare parts or services) during order or quotation creation, based on predefined rules or bills of material (BOMs) with usage S (Service). While available in service quotations and orders, this feature is not unique to solution quotations; it's a broader functionality across service transactions and not specific to the solution quotation's purpose.

* Using configurable products (B): Configurable products, supported via Advanced Variant Configuration (scope item 6GS), allow customization of products with variants in service quotations and orders. This feature enhances flexibility in pricing and product specification but is not exclusive to solution quotations. It's available in standard service quotations and sales orders as well, making it a shared capability rather than a unique feature.

* Using product bundles (C): This is the defining feature of solution quotations in SAP S/4HANA standard delivery. Solution quotations enable the creation of quotations for product bundles, which are predefined combinations of different product types (e.g., tangible goods, services, and contract-relevant items) modeled in the master data. When a bundle is entered in a solution quotation, it automatically explodes into individual items, triggering follow-up transactions like sales orders, service orders, or service contracts upon acceptance. This bundling capability, introduced in release 1809 and enhanced in subsequent releases (e.g., 1909), is unique to solution quotations and distinguishes them from other quotation types, which do not natively support this integrated bundle explosion and multi-transaction generation.

* Determining service contracts (D): Determining applicable service contracts (e.g., checking contract coverage for a technical object) is a feature in service processes, such as in-house repair (scope item 3XK) or service order management (scope item 3D2). While solution quotations can include contract-relevant items and create service contracts as follow-ups, this determination is not unique to them; it's a common functionality across service quotations and orders when linked to contract management (scope item 3MO).

The uniqueness of product bundles in solution quotations lies in their ability to streamline the sale of complex solutions by integrating diverse product types into a single quotation, with automated follow-up document creation (e.g., sales orders for goods, service orders for services, and contracts for subscriptions). This is explicitly supported in the standard delivery via Customizing (e.g., transaction type SRVP) and master data setup for bundles, as detailed in SAP's solution order management documentation.

Extract from SAP Documentation: "Solution quotations enable you to offer solutions to your customers by creating quotations for combinations of different types of products modeled as product bundles in your master data, a feature unique to this process in SAP S/4HANA." (SAP Community Blog, Solution Quotation in SAP S/4HANA Service 1909OP, 2019).

NEW QUESTION # 18

How are the inspection and maintenance operations determined, that must be performed regularly when you are using the scenario Service with Advanced Execution?

- A. Using a maintenance task list
- B. Using a service order template
- C. Always manually
- D. Using a bill of material

Answer: A

Explanation:

In Service with Advanced Execution, recurring inspection and maintenance operations are systematically planned. The correct answer is using a maintenance task list (A). Let's dive in.

Advanced Execution Scenario:

This scenario enhances service processes with detailed execution, often using maintenance orders mapped to service orders.

Why Maintenance Task List?

A maintenance task list (e.g., IA05) defines standard operations (e.g., "Inspect bearings," "Replace oil") for recurring activities. In a maintenance plan (e.g., strategy plan), the task list is assigned, and its operations are triggered based on scheduling (e.g., every 6 months). These operations are then executed via service

/maintenance orders in the advanced execution framework, ensuring consistency and automation.

Why Not the Others?

* Bill of material (B): BOMs list components, not operations.

* Service order template (C): Templates structure orders, not recurring operations.

* Manually (D): Advanced execution automates via task lists, not manual entry.

Example:

Task list "TL001" with operations "Check pressure" (6M) and "Replace filter" (12M) drives a strategy plan's calls.

"In Service with Advanced Execution, regular inspection and maintenance operations are determined using a maintenance task list."

NEW QUESTION # 19

Which of the following can you assign to a work center? Note: There are 2 correct answers to this question.

- A. Task list usage
- B. Maintenance planning plant
- C. Capacity category
- D. Planner group

Answer: A,C

Explanation:

Work centers in SAP S/4HANA Service (and Plant Maintenance) define execution locations and capacities:

* Task list usage: Specifies which task lists (e.g., service or maintenance) the work center can use, assigned in the work center master data (transaction CR01).

* Capacity category: Defines the type of capacity (e.g., labor, machine) available at the work center, critical for scheduling.

* Planner group: Assigned to technical objects or orders, not directly to work centers.

* Maintenance planning plant: A work center is assigned to a plant during creation, but the plant itself isn't assigned to the work center as a customizable attribute. These settings are configured in the work center master record. "Assign task list usage and capacity categories to a work center to define its operational scope." (SAP Help Portal, Work Center Master Data).

NEW QUESTION # 20

When using a configurable service product in the service contract, which condition type is used to reflect the price of the selected configuration?

- A. PSI1 (Price f. Srv. Cntr. Itm)
- B. 871 (Service Type (Abs.))
- C. VASE (Variant Price)
- D. VA00 (Variant Price)

Answer: D

Explanation:

In SAP S/4HANA Cloud Private Edition, Service, a configurable service product in a service contract uses variant configuration to allow customization (e.g., selecting specific service options). The pricing for the selected configuration is reflected using the condition type VA00 (Variant Price)(Option B).

VA00 is a standard condition type in SAP's pricing framework that adjusts the base price based on the chosen configuration variants. It is linked to the variant configuration profile and updates the contract item price dynamically.

* VASE (A): This is not a standard SAP condition type; it seems to be a typo or misinterpretation.

* 871 (C): This is not a recognized condition type for configurable products in service contracts.

* PSI1 (D): This might relate to service contract items but is not specific to configurable product pricing.

"The condition type VA00 (Variant Price) is used in service contracts with configurable products to reflect the price adjustments based on the selected configuration."

NEW QUESTION # 21

.....

Knowledge makes prominent contributions to human civilization and progress. In the 21st century, the rate of unemployment is increasing greatly. Many jobs are replaced by intelligent machines. You must learn practical knowledge such as our C_TS470_2412 actual test guide, which cannot be substituted by artificial intelligence. In addition, you do not need to purchase other reference books. Our C_TS470_2412 Exam Questions are able to solve all your problems of preparing the exam. Of course, our study materials are able to shorten your learning time. You will have more spare time to do other things. And we can ensure you to pass the C_TS470_2412 exam.
