MCD-Level-1 exam is computer-based and can be taken at any Pearson VUE testing center globally.

MuleSoft Certified Developer - Level 1 (Mule 4) Sample Questions (Q75-Q80):

NEW QUESTION # 75
An API instance of type API endpoint with API proxy is created in API manager using an API specification from Anypoint Exchange. The API instance is also configured with an API proxy that is deployed and running in CloudHub.
An SLA- based policy is enabled in API manager for this API instance.
Where can an external API consumer obtain a valid client ID and client secret to successfully send requests to the API proxy?

- A. In the organization's public API portal in Anypoint Exchange, from an approved client application for the API proxy
- B. In Anypoint Studio, from components generated by APIkit for the API specification
- C. In Anypoint Studio, from components generated by Rest Connect for API specification
- D. In Runtime Manager, from the properties tab of the deployed approved API proxy

Answer: A

Explanation:
* When a client application is registered in Anypoint Platform, a pair of credentials consisting of a client ID and client secret is generated.
* When the client application requests access to an API, a contract is created between the application and that API.
* An API that is protected with a Client ID Enforcement policy is accessible only to applications that have an approved contract.
....
In the organization's public API portal in Anypoint Exchange, from

NEW QUESTION # 76
Refer to the exhibit.

You will receive an email attached with MCD-Level-1 exam study guide within 5-10 min after you pay. It means that you do not need to wait too long to get the dumps you want. Besides, you will have free access to the updated MuleSoft MCD-Level-1 study material for one year. If there is any update, our system will send the update MCD-Level-1 Test Torrent to your payment email automatically. Please pay attention to your payment email for the latest MuleSoft MCD-Level-1 exam dumps. If there is no any email about the update, please check your spam.

The free demo MuleSoft MCD-Level-1 exam questions are available for instant download. Download the MuleSoft Certification Exams dumps demo free of cost and explores the top features of MuleSoft Certified Developer - Level 1 (Mule 4) (MCD-Level-1) exam questions and if you feel that the MCD-Level-1 exam questions can be helpful in MuleSoft MCD-Level-1 exam preparation then take your buying decision. Best of luck!!!

App online version of MCD-Level-1 learning quiz - Be suitable to all kinds of equipment or digital devices.

MuleSoft MCD-Level-1 exam is an internationally recognized certification offered by MuleSoft, a leading software company that provides integration software for connecting applications, data, and devices. MCD-Level-1 exam is designed for developers who have a good understanding of MuleSoft's Anypoint Platform and Mule 4, and who want to demonstrate their expertise and proficiency in the field of integration. The MCD-Level-1 Exam is specifically focused on Mule 4, the latest version of MuleSoft's integration platform, and covers a range of topics such as building APIs, integrating systems, and deploying applications.

MuleSoft Certified Developer - Level 1 (Mule 4) Sample Questions (Q162-Q167):

NEW QUESTION # 162
A Mule project contains a DataWeave module like WebStore.dwl that defines a function named loginUser. The module file is located in the project's src/main/resources/libs/etl folder.
What is correct DataWeave code to import all of the WebStore.dwl file's functions and then call the loginUser function for the login "Todd.Pal@mulesoft.com"?

- A. 1. 1. import * from libs::etl::WebStore
  2. 2. ---
  3. 3. loginUser("Todd.Pal@mulesoft.com")
- B. 1. 1. import * from libs::etl
  2. 2. ---
  3. 3. WebStore::loginUser("Todd.Pal@mulesoft.com")
- C. 1. 1. import libs.etl.WebStore
  2. 2. ---
  3. 3. loginUser("Todd.Pal@mulesoft.com")
- D. 1. 1. import libs.etl
  2. 2. ---
  3. 3. WebStore.loginUser("Todd.Pal@mulesoft.com")

Answer: A

Explanation:
* To use custom modules, you need to import the module or functions you want to use by adding the import directive to the head of your DataWeave script, for example:
1) Does not identify any functions to import from the String module:
import dw::core::Strings
2) To identify a specific function to import from the String module:
import camelize, capitalize from dw::core::Strings
3) To import all functions from the String module:
import * from dw::core::Strings
The way you import a module impacts the way you need to call its functions from a DataWeave script. If the directive does not list specific functions to import or use * from to import all functions from a function module, you need to specify the module when you call the function from your script.
* In given scenario, it's mentioned to import all of the WebStore.dwl
So correct answer is:

NEW QUESTION # 163
A web client submits a request to http://localhost:8081?firstName=john. What is the correct DataWeave expression to access the firstName parameter?

- A. #[message.queryParams.hrstName]
- B. #[message.inboundProperties.'http.query.params'.firstName]
- C. #[attributes.'http.query.params'.firstName]
- D. #[attributes.queryParams.firstName]

Answer: D

NEW QUESTION # 164
Refer to the exhibits.

The web client sends a POST request to the ACME Order API with an XML payload. An error is returned.
What should be changed in the request so that a success response code is returned to the web client?

- A. Set a response header with the name Content-Type to a value of applkation/xml
- B. Set a request header with the name Content-Type to a value of applicatron/octet-stream
- C. Set a response header with the name Content-Type to a value of application/octet-stream
- D. Set a request header with the name Content-Type to a value of application/xml

Answer: D

Explanation:
The HTTP 415 Unsupported Media Type client error response code indicates that the server refuses to accept the request because the payload format is in an unsupported format. The format problem might be due to the request's indicated Content-Type or Content-Encoding , or as a result of inspecting the data directly. As per RAML input is expected in application/xml.
Hence correct answer is Set a request header with the name Content-Type to a

NEW QUESTION # 165
Refer to the exhibit.

What data is expected by the POST /accounts endpoint?
A)
B)
C)
D)

- A. Option A
- B. Option D
- C. Option C
- D. Option B

Answer: B

NEW QUESTION # 166
Refer to the exhibits.

The orders.csv file is read, then processed to look up the orders in a database. The Mule application is debugged in Any point Studio and stops at the breakpoint.
What is the payload shown in the debugger at this breakpoint?

- A. The entire CSV file
- B. 0
- C. "none"
- D. The database response

Answer: B

NEW QUESTION # 167
......

It is universally accepted that the competition in the labor market has become more and more competitive in the past years.
