**C\_S4EWM\_2023 PDF & Valid Test C\_S4EWM\_2023 Braindumps**

All exam questions that contained in our SAP C\_S4EWM\_2023 study engine you should know are written by our professional specialists with three versions to choose from: the PDF, the Software and the APP online. In case there are any changes happened to the SAP C\_S4EWM\_2023 Exam, the experts keep close eyes on trends of it and compile new updates constantly.

## **SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q67-Q72):**

### **NEW QUESTION # 67**

When using batches with de-centralized EWM, where does the batch master data exist.

- A. Only in SAP EWM
- B. Only in SAP ERP
- C. It depends on customizing
- **D. In SAP ERP and in SAP EWM**

**Answer: D**

### **NEW QUESTION # 68**

Which of the following are storage type roles? Note: There are 3 correct answers to this question.

- A. Conveyor System
- **B. Work Center in Staging Area Group**
- **C. Production Supply**
- **D. Identification Point**
- E. Deconsolidation

**Answer: B,C,D**

### **NEW QUESTION # 69**

You are a consultant on an SAP S/4HANA Cloud brownfield project. Several mission critical business processes have been successfully remodeled in accordance with clean core principles. You must now create the necessary workflows.

Which of the following SAP Signavio solutions can be used to create the workflows?

- **A. SAP Signavio Process Manager**
- B. SAP Signavio Process Insights
- **C. SAP Signavio Process Governance**
- D. SAP Signavio Process Intelligence

**Answer: A,C**

Explanation:

In an SAP S/4HANA Cloud brownfield project where workflows are to be created after process remodeling, the following SAP Signavio solutions are applicable:

\* C. SAP Signavio Process Manager:

\* Used to design, model, and optimize workflows.

\* Enables mapping and documentation of business processes aligned with clean core principles.

\* D. SAP Signavio Process Governance:

\* Helps define and automate workflows with approval steps and task assignments.

\* Provides capabilities for workflow execution and monitoring.

Incorrect Options:

\* A: SAP Signavio Process Insights identifies process improvement opportunities but does not create workflows.

\* B: SAP Signavio Process Intelligence analyzes process performance but is not used for workflow design.

References:

\* SAP Help Portal: SAP Signavio Process Manager and Process Governance Features

\* SAP S/4HANA Documentation: Clean Core Workflow Design

### **NEW QUESTION # 70**

You define new SAP Extended Warehouse Management (SAP EWM) delivery document types for inbound delivery processes. Which additional customizing step is required in SAP EWM?

- A. Define a document category for the inbound process.
- **B. Map an SAP ERP document type to the delivery document type**
- C. Define a delivery item type for the inbound process.
- D. Create a new system profile for the field control.

**Answer: B**

Explanation:

When defining new delivery document types for inbound processes in SAP EWM, an essential customizing step is:

\* C. Map an SAP ERP document type to the delivery document type:

\* This ensures that the delivery document type in SAP ERP is correctly linked to the corresponding delivery document type in SAP EWM.

\* Mapping is critical for seamless integration and data consistency between ERP and EWM systems.

Incorrect Options:

\* A: System profiles for field control do not need to be newly created for delivery document types.

\* B: Document categories are predefined and do not need customization.

\* D: Delivery item types are relevant but not directly required for document type definition.

References:

\* SAP Help Portal: Delivery Document Type Customization

\* SAP EWM Documentation: ERP-EWM Integration for Inbound Deliveries

## NEW QUESTION # 71

What can you do with evaluation points?

- A. Influence the search sequence of storage types, storage sections, and bin types
- B. Influence which items shall be picked first
- **C. Influence which warehouse order is assigned to a resource**
- D. Use them to measure the efficiency of your warehouse

**Answer: C**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Evaluation points in SAP EWM are used within the resource management framework to prioritize and assign warehouse orders to resources (e.g., warehouse workers or equipment). Option A ("Influence which warehouse order is assigned to a resource") is correct because evaluation points are calculated based on factors like order urgency, resource proximity, or queue assignment, configured in SPRO: SCM Extended Warehouse Management > Resource Management > Define Evaluation Points. This influences the system's decision on resource allocation. Option B is incorrect as item picking sequence is determined by picking strategies (e.g., FIFO), not evaluation points. Option C relates to storage type search sequences, not evaluation points. Option D is a broader warehouse efficiency goal but not a direct function of evaluation points.

## NEW QUESTION # 72

.....

Our experts offer help by diligently working on the content of C\_S4EWM\_2023 learning questions more and more accurate. Being an exam candidate in this area, we believe after passing the exam by the help of our C\_S4EWM\_2023 practice materials, you will only learn a lot from this C\_S4EWM\_2023 Exam but can handle many problems emerging in a long run. You can much more benefited from our C\_S4EWM\_2023 study guide. Don't hesitate, it is worthy to purchase!
