Latest CCFA-200b Dumps Ppt | Latest CCFA-200b Exam Discount

ValidTorrent online digital CrowdStrike CCFA-200b exam questions are the best way to prepare. Using our CrowdStrike Falcon Administrator (CCFA-200b) exam dumps, you will not have to worry about whatever topics you need to master. To practice for a CrowdStrike CCFA-200b Certification Exam in the software (free test), you should perform a self-assessment. The CrowdStrike CCFA-200b practice test software keeps track of each previous attempt and highlights the improvements with each attempt.

CrowdStrike Falcon Administrator Sample Questions (Q99-Q104):

NEW QUESTION # 99

What best describes what happens to detections in the console after clicking "Disable Detections" for a host from within the Host Management page?

- A. You cannot disable detections for a host
- **B. The detections for the host are removed from the console immediately and no new detections will display in the console going forward**
- C. Existing detections for the host remain, but no new detections will display in the console going forward
- D. Preventions will be disabled for the host

Answer: B

Explanation:

The option that best describes what happens to detections in the console after clicking "Disable Detections" for a host from within the Host Management page is that the detections for the host are removed from the console immediately and no new detections will display in the console going forward. The "Disable Detections" feature allows you to enable or disable the detection and prevention capabilities of the Falcon sensor on a specific host. When you disable detections for a host, the sensor will stop sending any detection or prevention events to the Falcon console, and any existing events for that host will be removed from the console. When you enable detections for a host, the sensor will resume sending any new detection or prevention events to the Falcon console, but any previous events for that host will not be restored to the console.

NEW QUESTION # 100

Which of the following can be found in the Falcon UI Audit Trail Report?

- **A. Audit records of actions taken by both users and API clients**
- B. Audit records of Falcon instance billing
- C. Audit records of actions taken by only users
- D. Audit records of actions taken by only APIs

Answer: A

NEW QUESTION # 101

How do you assign a Prevention policy to one or more hosts?

- A. Create a new policy and assign it directly to those hosts on the Host Management page
- B. Create a new policy and assign it directly to those hosts on the Prevention policy page
- **C. Ensure the hosts are in a group and assign that group to a custom Prevention policy**
- D. Modify the users roles on the User Management page

Answer: C

Explanation:

The administrator can assign a Prevention policy to one or more hosts by ensuring the hosts are in a group and assigning that group to a custom Prevention policy. This allows users to apply different prevention settings and options to different groups of hosts based on their needs and preferences. The other options are either incorrect or not applicable to assigning a Prevention policy.

NEW QUESTION # 102

Which port and protocol does the sensor use to communicate with the CrowdStrike Cloud?

- A. TCP UDP port 53 (DNS)
- B. TCP port 22 (SSH)
- C. TCP port 80 (HTTP)
- **D. TCP port 443 (HTTPS)**

Answer: D

Explanation:

The sensor uses TCP port 443 (HTTPS) to communicate with the CrowdStrike Cloud. This port and protocol are used to securely

send and receive data between the sensor and the cloud, such as detections, policies, updates, commands, etc. The other options are either incorrect or not used by the sensor.

NEW QUESTION # 103

What is the purpose of the Default Sensor Policy?

- **A. Acts as a "catch all" policy if no other Sensor Policies are applied.**
- B. Tests the sensor configuration settings before deployment.
- C. A mechanism to deploy the oldest supported version of the Falcon Sensor.
- D. Used to reset all sensor settings to Default.

Answer: A

Explanation:

The purpose of the Default Sensor Policy is that it acts as a "catch all" policy if no other Sensor Policies are applied. A Sensor Policy is a policy that defines the detection and prevention settings for the Falcon sensor on a host. You can create and assign custom Sensor Policies to different hosts or groups in your environment. However, if a host is not assigned to a specific Sensor Policy, it will inherit the settings from the Default Sensor Policy. The Default Sensor Policy is a "catch-all" policy that is enabled by default and has the "Malware Protection" feature turned on. You can modify the settings of the Default Sensor Policy, but you cannot delete or disable it.

NEW QUESTION # 104

.....

CCFA-200b exam tests are a high-quality product recognized by hundreds of industry experts. Over the years, CCFA-200b exam questions have helped tens of thousands of candidates successfully pass professional qualification exams, and help them reach the peak of their career.
