Amazon AWS Certified Developer Associate Exam (DVA-C02) Sample Questions (Q206-Q211):

NEW QUESTION # 206

A company is developing an application that will be accessed through the Amazon API Gateway REST API.
Registered users should be the only ones who can access certain resources of this API. The token being used should expire automatically and needs to be refreshed periodically.
How can a Developer meet these requirements?

- A. Create an Amazon Cognito identity pool, configure the Amazon Cognito Authorizer in API Gateway, and use the temporary credentials generated by the identity pool.
- B. Create an Amazon Cognito user pool, configure the Cognito Authorizer in API Gateway, and use the identity or access token.
- C. Create an IAM user for each API user, attach an invoke permissions policy to the API, and use an IAM authorizer in API Gateway.
- D. Create and maintain a database record for each user with a corresponding token and use an AWS Lambda authorizer in API Gateway.

Answer: B

Explanation:

NEW QUESTION # 207

An organization is storing large files in Amazon S3, and is writing a web application to display meta-data about the files to end-users.
Based on the metadata a user selects an object to download. The organization needs a mechanism to index the files and provide single-digit millisecond latency retrieval for the metadata.
What AWS service should be used to accomplish this?

- A. AWS Lambda
- B. Amazon EC2
- C. Amazon DynamoDB
- D. Amazon RDS

Answer: C

NEW QUESTION # 208

While developing an application that runs on Amazon EC2 in an Amazon VPC, a Developer identifies the need for centralized storage of application-level logs.
Which AWS service can be used to securely store these logs?

- A. Amazon CloudWatch Logs
- B. Amazon EC2 VPC Flow Logs
- C. AWS CloudTrail
- D. Amazon CloudSearch

Answer: A

NEW QUESTION # 209

A user is trying to create a policy for an IAM user from the AWS console. Which of the below mentioned options is not available to the user while configuring policy?

- A. Use policy simulator to create policy
- B. Use policy generator to create policy
- C. Use custom policy to create policy
- D. Assign No permission

Answer: A

Explanation:
When a user is trying to create a policy from the AWS console, it will have options such as create policy from templates or use a

policy generator. The user can also define a custom policy or chose the option to have no permission. The policy simulator is not available in the console.

NEW QUESTION # 210
A developer has launched an application that calls an API by way of Amazon API Gateway. It offers information that changes several times a day, but is not updated in real time. The application has become so popular that the API endpoint is overloaded and that traffic to the endpoint must be reduced.
What can the developer do to address the performance issues?

- A. Create an additional API Gateway and use an Application Load Balancer
- B. Enable an Auto Scaling group on the endpoint service and database.
- C. Enable API caching in Amazon ElastiCache.

Answer: C

NEW QUESTION # 211
