2026 The Best VMCE_v12: Veeam Certified Engineer v12 Most Reliable Questions

VEEAM CERTIFIED ENGINEER V12 VMCE_V12 SAMPLE QUESTIONS

A Veeam administrator is creating a protection group that needs to back up all servers for the accounting department using Veeam Agent for Microsoft Windows. New accounting servers must be automatically added to the protection group.
How is this accomplished?
A. Create a protection group that reads a .csv file listing the accounting servers.
B. Create a protection group and set it to automatically scan every three hours for new servers.
C. Install a configuration file on each of the accounting servers that adds it to the protection group.
D. Create an Active Directory based protection group targeted at an Active Directory security group. - Answer - Answer: D

A backup administrator decided to move the Veeam Backup & Replication server and configuration database to new servers.
Which configuration restore mode should be used?
A. Migrate
B. Planned failover
C. Restore
D. Failover plan - Answer - Answer: A

A file on a Windows VM hosted on vSphere is corrupted and must be restored. VMware tools are installed and up to date on the VM. For some reason, the Veeam mount server cannot connect to the VM through the network.
Which of the following restore methods provides the fastest restore (RTO)?
A. Run Veeam file restore wizard and let it restore through VIX.
B. Start an Instant VM Recovery session and log on into the restored image to copy/paste the file to restore.
C. It is impossible to restore the file on the VM if the mount server cannot reach it through the network.
D. Run Veeam file restore wizard and use the "copy to" to download the file locally in a shared folder. - Answer - Answer: A

Veeam ONE has been installed and configured. The infrastructure contains five Veeam Backup & Replication servers.
The administrator needs to check the remaining capacity on each of the backup repository servers. Where can they see this information?
A. Under Infrastructure View, look up the Veeam Backup & Replication servers to see the guest disk space.
B. Under Data Protection View, look up the backup repository servers to see the remaining capacity.

VMCE_v12 study guide can bring you more than you wanted. After you have used our products, you will certainly have your own experience. Now let's take a look at why a worthy product of your choice is our VMCE_v12 actual exam. Firstly, with a high pass rate of 98% to 100%, you will get the pass guarantee form our VMCE_v12 Practice Engine. Secondly, the price of our VMCE_v12 learning guide is quite favourable than the other websites'.

Veeam VMCE_v12 Exam Syllabus Topics:

Topic	Details
Topic 1	• Scale-out Backup Repository: This section of the exam covers the description of the architecture, placement policies, and data tiers.
Topic 2	• Replication: This section of the exam covers the description of use cases, architectures, and elements of replication jobs.

Topic 3	• Verifying recoverability: This section of the exam covers the creation of automated tests to ensure recoverability from backups and replicas.
Topic 4	• Initial security considerations: This section defines ways and tools to secure the Veeam backup server.
Topic 5	• Virtual machine backup: This section of the exam covers protecting the VMware and Hyper V to safeguard VMware that follows SLAs.
Topic 6	• Transport modes: This section aims to analyze different methods to collect and read data from the production environment.
Topic 7	• Risk scenarios: This section covers exploring various risk scenarios and identifying the type of risks we may face in the environment.
Topic 8	• Recovery scenarios and features: This section covers the impact of various recovery procedures and choosing the most viable recovery technique.
Topic 9	• Core components: This section of the exam covers exploring the functionality of Veeam Backup & Replication and system requirements.
Topic 10	• Backup data optimizations: This section covers the need for object storage to be backed up and the supported object storage solutions while utilizing repositories.
Topic 11	• Veeam Backup Enterprise Manager: The section describes the use cases for Veeam Backup Enterprise Manager.
Topic 12	• Unstructured data backup: This section is about highlighting vital features required to protect unstructured data.
Topic 13	• Enacting a recovery: This section is about getting practice in recovering various recoveries with diverse data.
Topic 14	• Agent backup: This section of the exam covers the identification of protection groups for automating the installation of Veeam Agents.
Topic 15	• Backup copies: This section ensures the process of recoverability and adheres to the 3-2-1 Rule with backup copy processes.
Topic 16	• Moving or copying backups: This section of the exam covers use cases for backup processes using VeeaMover.

Updated VMCE_v12 Pdf Vce - VMCE_v12 Latest Torrent & VMCE_v12 Valid Questions

TroytecDumps VMCE_v12 latest exam dumps are the reliable and valid study material with latest & guaranteed questions & answers for your preparation. We promise you the easiest way to success and offer you the most prestigious and updated VMCE_v12 Exam Training practice which carry 100% money return policy. Come on, and use Veeam VMCE_v12 pdf download torrent, you can pass your VMCE_v12 actual test at first attempt.

Veeam Certified Engineer v12 Sample Questions (Q87-Q92):

NEW QUESTION # 87
An administrator needs to dynamically add VMware VMs that have a custom application installed to a backup job. How can this job be created?

- A. Use the RESTful API to scan the VM inventory for machines that match the criteria.
- B. Modify a custom CSV file to be scanned before the start of each job.
- C. In Enterprise Manager, create a dynamic group of VMs that contain both tags.
- D. Create a backup job based on vSphere tags.

Answer: D

Explanation:
To dynamically include VMware VMs with a custom application installed in a backup job, the most efficient approach is C: Create a backup job based on vSphere tags. VMware vSphere tagging allows administrators to assign metadata to VMs, making it easier to categorize and manage them according to various criteria, such as application type, department, or any custom criteria relevant to the organization. Veeam Backup & Replication can leverage these tags to dynamically include VMs in backup jobs. By setting up a backup job to include VMs tagged with a specific identifier related to the custom application, any VM tagged accordingly will be automatically included in the backup job. This approach simplifies management, ensures consistency, and allows for the flexible and dynamic grouping of VMs based on changing criteria without the need for manual adjustments to the backup job configuration.

NEW QUESTION # 88
Which is the mount server component used?

- A. When restoring files or application items with Veeam Explorers
- B. When backing up to tape at a remote site
- C. When the remote backup repository is a CIPS share
- D. When there are multiple backup servers

Answer: A

NEW QUESTION # 89
Which recovery verification tests can be executed when verifying both backups and replicas? Choose three options.

- A. CRC check
- B. Application test
- C. Memory test
- D. Heartbeat test
- E. Operating System test
- F. Ping test

Answer: B,D,F

NEW QUESTION # 90
An administrator accidentally deleted a database. Veeam Explorer for Oracle will be used to restore it back.
What is the fastest option to get the database online again?

- A. Use the "Point in Time" option to specify the point in time you want to restore the Oracle database to.
- B. Use the "Compare with Production" option to restore only the missing objects back to the Oracle database.
- C. Use the "Quick Rollback" option to perform a restore of the changed blocks of the Oracle database file.
- D. Use the "Instant Recovery" option and restore it in the background.

Answer: D

Explanation:
Explanation
https://www.veeam.com/blog/v11-instant-recovery-reinvented.html?ad=in-text-link According to the Veeam Backup Explorers guide1, Veeam Explorer for Oracle allows you to restore and export Oracle databases and Data Guard from backups created by Veeam Backup & Replication or Veeam Plug-in for Oracle RMAN1. You can use different restore options depending on your scenario1.
If you want to restore a deleted database back to its original location, you can use the Instant Recovery option. This option allows you to quickly mount a database from a backup file and start it on an Oracle server without performing a full restore1. The database will be restored in the background while it is online and accessible1. This option provides the fastest recovery time objective (RTO)

for restoring a deleted database1.

NEW QUESTION # 91

An environment is using Veeam Agent for Microsoft Windows and has Microsoft Exchange 2016 with regular database availability groups (DAGs) configured. What option is required to properly back up the databases?

- A. Failover Cluster
- B. Advanced Exchange Backup
- C. Standalone server
- D. Exchange Processing

Answer: A

Explanation:
The procedure of adding a Microsoft Exchange Database Availability Group (DAG) to a Veeam Agent backup job differs depending on the type of the DAG that you want to process: For a regular DAG, the backup job configuration procedure is the same as for any failover cluster. To process a regular DAG, you must configure a Veeam Agent backup job for a failover clusterhttps://helpcenter.veeam.com/docs/backup/agents/dag_hiw.html?ver=120
