Windows computers support the desktop practice test software. PassTorrent has a complete support team to fix issues of Oracle 1Z0-1061-24 PRACTICE TEST software users. PassTorrent practice tests (desktop and web-based) produce score report at the end of each attempt. So, that users get awareness of their Oracle CX Sales 2024 Implementation Professional (1Z0-1061-24) preparation status and remove their mistakes.

Oracle CX Sales 2024 Implementation Professional Sample Questions (Q342-Q347):

NEW QUESTION # 342

What is the purpose of a role in Oracle Profitability and Cost Management Cloud Service?

- A. To grant users access to a specific data source
- B. To grant users access to a specific dimension or member
- C. To grant users access to a specific job or task
- D. To grant users access to a specific application

Answer: B

Explanation:

Option 1: Roles are used to grant users access to specific dimensions or members within an application. Option 2: This answer is incorrect because roles do not grant access to a specific data source. Option 3: This answer is incorrect because roles do not grant access to a specific job or task. Option 4: This answer is correct because roles are used to grant users access to specific dimensions or members within an application.

NEW QUESTION # 343

In Oracle Profitability and Cost Management Cloud Service, what are the two types of rules that can be created in a model?

- **A. Calculation rules and consolidation rules**
- B. Calculation rules and mapping rules
- C. Mapping rules and allocation rules
- D. Allocation rules and consolidation rules

Answer: A

Explanation:

Option 1: This option is incorrect because there is no such thing as mapping rules in a model. Calculation rules are valid, but the second type of rule is incorrect. Option 2: This option is correct because there are two types of rules that can be created in a model, which includes calculation rules and consolidation rules. Consolidation rules come into play when creating hierarchies or consolidation functions. Option 3: This option is incorrect because mapping rules are not a type of rule in a model, they are part of the import/export data process. Allocation rules are part of the rule creation process though. Option 4: This option is incorrect because allocation and consolidation rules are valid types of rules, but there is no such thing as mapping rules. consolidation rules are valid types of rules, but there is no such thing as mapping rules.

NEW QUESTION # 344

What is the recommended approach for creating custom dimensions in Oracle Profitability and Cost Management Cloud Service?

- A. Create new dimensions from scratch using the Dimension Editor
- B. Import dimensions from an external system using a data file
- C. Use the Rule Balancing feature to automatically create dimensions
- **D. Use the predefined dimensions and extend them as needed**

Answer: D

Explanation:

Option 1: Correct. The recommended approach for creating custom dimensions in Oracle Profitability and Cost Management Cloud Service is to use the predefined dimensions and extend them as needed. This approach allows you to leverage the existing dimensions and their associated properties, validations, and hierarchies. Option 2: Incorrect. Creating new dimensions from scratch using the Dimension Editor is not the recommended approach. This approach requires you to manually define all the properties, validations, and hierarchies from scratch, which can be time-consuming and error-prone. Option 3: Incorrect. Importing dimensions from an external system using a data file is not the recommended approach for creating custom dimensions. While it is possible to import dimensions, this approach may not fully leverage the capabilities and features of Oracle Profitability and Cost Management Cloud Service. Option 4: Incorrect. The Rule Balancing feature in Oracle Profitability and Cost Management Cloud Service is used for calculating and assigning costs, not for creating custom dimensions.

NEW QUESTION # 345

Which functionality is used to load data into Oracle Profitability and Cost Management Cloud Service?

- A. Data Integration
- B. Data Management
- **C. Data Load Rules**
- D. Data Import Wizard

Answer: C

Explanation:

Option 1: Incorrect. Data Integration is not the functionality used to load data into Oracle Profitability and Cost Management Cloud Service. While it can be used for integration purposes, it is not specifically designed for data loading. Option 2: Correct. Data Load Rules is the functionality used to load data into Oracle Profitability and Cost Management Cloud Service. It allows you to define rules for mapping and loading data from source files or databases. Option 3: Incorrect. Data Management is a general term that encompasses various aspects of managing data, but it is not specifically used for loading data into Oracle Profitability and Cost Management Cloud Service. Option 4: Incorrect. Data Import Wizard is not the functionality used to load data into Oracle Profitability and Cost Management Cloud Service. While it can be used for importing data into other applications, it is not specifically designed for loading data into Oracle Profitability and Cost Management Cloud Service.

NEW QUESTION # 346

In Oracle Profitability and Cost Management Cloud Service, which of the following statements is true about the 'Combine Categories' option while creating and managing reports?

- A. 'Combine Categories' is used to calculate the total of all categories in a report.
- B. 'Combine Categories' is used to merge multiple categories into a single category in a report.
- **C. 'Combine Categories' is used to combine multiple scenarios and generate a single report.**
- D. 'Combine Categories' is used to group items with the same dimension values across multiple categories in a report.

Answer: C

Explanation:

Option 1: This option is correct because the 'Combine Categories' option is used to group items with the same dimension values across multiple categories in the report. This is helpful when users want to view data from multiple categories at once. Option 2: This option is incorrect because combining multiple scenarios is achieved using the 'Combine Scenarios' option while creating reports. Option 3: This option is incorrect because merging multiple categories into a single category can be done using the 'Combine Categories' option in a report, but it is only effective when all the merged categories have the same dimension values. Option 4: This option is incorrect because the 'Combine Categories' option does not calculate the total of all categories in a report. It only groups items with the same dimension values across multiple categories.

NEW QUESTION # 347

.....

If you don't want to waste much time on preparing for your exam, Oracle 1Z0-1061-24 exam braindumps files will be a shortcut for you. Good exam materials make you twice the result with half the effort.
