

Relevant DP-700 Answers & Examcollection DP-700 Questions Answers

2026 Latest ExamTorrent DP-700 PDF Dumps and DP-700 Exam Engine Free Share: <https://drive.google.com/open?id=1OChkfvGkgCKdSq52vFMrjTSEljxzHaOI>

Just like the saying goes, it is good to learn at another man's cost. In the process of learning, it is more important for all people to have a good command of the method from other people. The Implementing Data Engineering Solutions Using Microsoft Fabric exam questions from our company will help you find the good study method from other people. Using the DP-700 Test Guide from our company, you can not only pass your exam, but also you will have the chance to learn about the different and suitable study skills. We believe these skills will be very useful for you near life.

The authority of Microsoft DP-700 exam questions rests on its being high-quality and prepared according to the latest pattern. Implementing Data Engineering Solutions Using Microsoft Fabric is proud to announce that our Microsoft DP-700 Exam Dumps help the desiring candidates of Microsoft DP-700 certification to climb the ladder of success by grabbing the DP-700 Exam Questions.

>> Relevant DP-700 Answers <<

Examcollection DP-700 Questions Answers | Cert DP-700 Exam

Our company has done the research of the DP-700 study material for several years, and the experts and professors from our company have created the famous DP-700 study materials for all customers. We believe our DP-700 training braidump will meet all demand of all customers. If you long to pass the exam and get the certification successfully, you will not find the better choice than our DP-700 Preparation questions. You can free download the demo of our DP-700 exam questions to check the excellent quality on our website.

Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric Sample Questions (Q77-Q82):

NEW QUESTION # 77

You have a Fabric workspace that contains a semantic model named Modell. You need to monitor the refresh history of Model 1 and visualize the refresh history in a chart. What should you use?

- A. a data pipeline
- B. a Dataflow Gen2 dataflow
- C. the refresh history from the settings of Modell.
- D. a notebook

Answer: C

Answer Area

...

(targetDF

.merge(sourceDF, "sourceDF.Key" = "targetDF.Key")

.whenMatchedUpdate(
.whenMatchedInsert(
.whenMatchedUpdate(
.whenNotMatchedBySourceInsert(
.whenNotMatchedBySourceUpdate(
.whenNotMatchedInsert(
.whenNotMatchedUpdate(
)

.whenNotMatchedInsert(
.whenMatchedInsert(
.whenMatchedUpdate(
.whenNotMatchedBySourceInsert(
.whenNotMatchedBySourceUpdate(
.whenNotMatchedInsert(
.whenNotMatchedUpdate(
)

.whenNotMatchedBySourceUpdate(
.whenMatchedInsert(
.whenMatchedUpdate(
.whenNotMatchedBySourceInsert(
.whenNotMatchedBySourceUpdate(
.whenNotMatchedInsert(
.whenNotMatchedUpdate(
)

ent_date() - INTERVAL '7' DAY)",

exam-prep.com

Explanation:

```
(targetDF
  .merge(sourceDF, "sourceDF.Key" = "targetDF.Key")
  .whenMatchedUpdate(
    set = {"targetDF.LastModified": "sourceDF.LastModified"}
  )
  .whenNotMatchedInsert(
    values = {
      "targetDF.Key": "sourceDF.Key",
      "targetDF.LastModified": "sourceDF.LastModified",
      "targetDF.Status": "sourceDF.Status"
    }
  )
  .whenNotMatchedBySourceUpdate(
    condition="targetDF.LastModified > (current_date() - INTERVAL '7' DAY)",
    set = {"targetDF.Status": "'inactive'"}
  )
  .execute()
)
```

NEW QUESTION # 79

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a KQL database that contains two tables named Stream and Reference. Stream contains streaming data in the following format.

Column name	Data type
Timestamp	Datetime
GeoLocation	Dynamic
Temperature	Decimal
DeviceId	Int

Reference contains reference data in the following format.

Column name	Data type
DeviceId	Int
DeviceName	String

Both tables contain millions of rows.

You have the following KQL queryset.

```
01 Stream
02 | extend lat = todecimal(GeoLocation.Latitude), long = todecimal(GeoLocation.Longitude)
03 | join kind=inner Reference on DeviceId
04 | project Timestamp, lat, long, Temperature, DeviceName
05 | filter Temperature >= 10
06 | render scatterchart with (kind = map)
```

You need to reduce how long it takes to run the KQL queryset.

Solution: You move the filter to line 02.

Does this meet the goal?

- A. No
- B. Yes

Answer: B

Explanation:

Moving the filter to line 02: Filtering the Stream table before performing the join operation reduces the number of rows that need to be processed during the join. This is an effective optimization technique for queries involving large datasets.

NEW QUESTION # 80

You need to ensure that usage of the data in the Amazon S3 bucket meets the technical requirements.

What should you do?

- A. Create a shortcut and ensure that caching is enabled for the workspace.
- B. Create a workspace identity and use the identity in a data pipeline.
- C. Create a workspace identity and enable high concurrency for the notebooks.
- D. Create a shortcut and ensure that caching is disabled for the workspace.

Answer: D

Explanation:

To ensure that the usage of the data in the Amazon S3 bucket meets the technical requirements, we must address two key points:

Minimize egress costs associated with cross-cloud data access: Using a shortcut ensures that Fabric does not replicate the data from the S3 bucket into the lakehouse but rather provides direct access to the data in its original location. This minimizes cross-cloud data transfer and avoids additional egress costs.

Prevent saving a copy of the raw data in the lakehouses: Disabling caching ensures that the raw data is not copied or persisted in the Fabric workspace. The data is accessed on-demand directly from the Amazon S3 bucket.

NEW QUESTION # 81

You are building a Fabric notebook named MasterNotebook1 in a workspace. MasterNotebook1 contains the following code.

```

DAG = {
  "activities": [
    {
      "name": "execute_notebook_1",
      "path": "notebook_01",
      "timeoutPerCellInSeconds": 600,
      "args": {
        "input_value": "999"
      },
      "retry": 1,
      "retryIntervalInSeconds": 30
    },
    {
      "name": "execute_notebook_2",
      "path": "notebook_02",
      "timeoutPerCellInSeconds": 400,
      "args": {
        "input_value": "888"
      },
      "retry": 1,
      "retryIntervalInSeconds": 30
    },
    {
      "name": "execute_notebook_3",
      "path": "notebook_03",
      "timeoutPerCellInSeconds": 600,
      "args": {
        "input_value": "777"
      },
      "retry": 1,
      "retryIntervalInSeconds": 30
    }
  ],
  "timeoutInSeconds": 43200,
  "concurrency": 0
}

```

You need to ensure that the notebooks are executed in the following sequence:

1. Notebook_03
2. Notebook_01
3. Notebook_02

Which two actions should you perform? Each correct answer presents part of the solution. NOTE: Each correct selection is worth one point.

- A. Add dependencies to the execution of Notebook_02.

- B. Change the concurrency to 3.
- C. Move the declaration of Notebook_02 to the bottom of the Directed Acyclic Graph (DAG) definition.
- **D. Move the declaration of Notebook_03 to the top of the Directed Acyclic Graph (DAG) definition.**
- E. Split the Directed Acyclic Graph (DAG) definition into three separate definitions.
- F. Add dependencies to the execution of Notebook_03.

Answer: A,D

NEW QUESTION # 82

.....

This version of the software is extremely useful. It may necessitate product license validation, but it does not necessitate an internet connection. If you have any issues, the ExamTorrent is only an email away, and they will be happy to help you with any issues you may be having! This desktop Microsoft DP-700 practice test software is compatible with Windows computers. This makes studying for your test more convenient, as you can use your computer to track your progress with each Implementing Data Engineering Solutions Using Microsoft Fabric (DP-700) mock test. The software is also constantly updated, so you can be confident that you're using the most up-to-date version.
