### Oracle 1Z0-1126-1 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Project Phase 3: Enable: This phase focuses on finalizing resources, documentation, and deadlines for implementation sign-off. Deploying content to production is a crucial step, marking the transition from testing to live usage. Go-live support and hypercare processes are put in place to ensure a smooth transition, providing immediate assistance and troubleshooting to address any issues. This stage ensures that the OGL deployment is stable and fully functional, ready to deliver value to the organization.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Project Phase 2: Refine: At this stage, organizations refine their project scope, estimate timelines, and ensure alignment with strategic objectives. Selecting appropriate OGL content from libraries helps tailor learning materials to organizational needs. Deployment considerations, including defining the environment, test users, and data requirements, ensure a robust testing phase before full implementation. The process of building, testing, and customizing OGL content is refined to optimize effectiveness. Planning for optional activities, such as activation and role conditions or display groups, ensures flexibility and adaptability in deployment.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Introduction to OGL Content: OGL plays a crucial role in enabling organizations to efficiently manage learning content, ensuring seamless deployment and accessibility. It provides a structured framework for organizing, delivering, and tracking learning materials to enhance workforce skills. The OGL Deployment approach outlines a structured implementation process that organizations follow to integrate OGL within their systems. Organizations nest within this deployment approach by aligning their training objectives, resources, and processes with OGL's capabilities, ensuring a smooth adoption and effective utilization of learning content.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Continuous Improvement: Mature: Ongoing refinement is essential for maintaining the effectiveness of OGL content. Organizations plan for quarterly updates, refreshes, and necessary changes to keep learning materials relevant and up to date. Reviewing OGL analytics provides valuable insights into content performance, enabling continuous optimization and improvement. This phase ensures that the learning framework remains dynamic and aligned with evolving business needs, maximizing the long-term impact of OGL deployment.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Project Phase 1: Focus: This phase involves defining the OGL project plan, including governance structures that oversee implementation and ensure alignment with business objectives. OGL training, learning paths, and business processes play a vital role in equipping users with the necessary skills and knowledge for efficient adoption. Identifying essential resources, including key team members, lays the foundation for a successful rollout. OGL Cloud Service activation is a critical step, allowing organizations to manage users within the OGL console, ensuring secure and streamlined access. Proper documentation is essential for content building, testing, and customization, forming the basis for a structured and scalable deployment.</li> </ul>

## **Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q75-Q80):**

### **NEW QUESTION # 75**

What is the frequency of Oracle Cloud Fusion release cycles?

- A. Monthly
- B. Quarterly**
- C. Annually
- D. Weekly

**Answer: B**

Explanation:

Oracle Cloud Fusion release cycles occur quarterly (option C), typically every three months, allowing for regular updates to features

and functionality. Annual (option A), monthly (option B), and weekly (option D) cycles do not match Oracle's established schedule, which balances stability with timely enhancements. This quarterly cadence impacts OGL content planning and testing, making it a critical rhythm for project teams to understand and adapt to.

#### NEW QUESTION # 76

Which type of project document is an integral part of your Change Management documentation?

- A. Business Impact Analysis
- B. Business Process Documentation
- C. Fusion Security Roles Documentation
- D. **Communications Plan**

#### Answer: D

Explanation:

A Communications Plan is integral to Change Management documentation in OGL projects, as it outlines how changes are communicated to stakeholders. While Business Impact Analysis (option A) and Business Process Documentation (option D) support change management, they are not core components. Fusion Security Roles (option B) is technical documentation, not change-focused.

#### NEW QUESTION # 77

What do the following factors determine?

Timelines from the change management strategy  
The cloud implementation plan  
Planning for optional activities

- A. When to celebrate go live
- B. Hypercare and maintenance
- C. OGL content development
- D. **OGL project scope and timelines**

#### Answer: D

Explanation:

The listed factors-timelines from change management, the cloud implementation plan, and optional activity planning-collectively determine the OGL project scope and timelines (option B). These elements define the project's boundaries, duration, and resource allocation, integrating change management and implementation schedules into a cohesive framework. Hypercare and maintenance (option A) are outcomes, not determinants, while celebration timing (option C) and content development (option D) are narrower aspects influenced by the broader scope. This holistic determination ensures the project aligns with organizational goals and technical constraints, setting the stage for all subsequent activities.

#### NEW QUESTION # 78

Which resources are responsible for configuring Fusion or other application environments, managing Fusion user security roles, and ensuring proper access and data?

- A. OGL Content Developers
- B. **Fusion Configuration and Data Management Leads**
- C. IT Security and Network Administration Leads
- D. OGL Administrators

#### Answer: B

Explanation:

Fusion Configuration and Data Management Leads are responsible for configuring Fusion or other application environments, managing security roles, and ensuring access and data integrity (option C). OGL Content Developers (option A) focus on content creation, OGL Administrators (option B) manage the OGL console, and IT Security/Network Leads (option D) handle broader infrastructure, not Fusion-specific tasks. These Leads possess the technical expertise to align Fusion configurations with OGL requirements, ensuring seamless integration and secure data handling-a critical role distinct from OGL-specific responsibilities.

## NEW QUESTION # 79

Which listed resource has the broadest access to permissions within the OGL console?

- A. OGL Administrator
- B. OGL Content Developer
- C. OGL Content Editor
- D. Functional Expert

**Answer: A**

Explanation:

The OGL Administrator has the broadest access to permissions within the OGL console, including managing users, configuring settings, and overseeing all content and analytics (option C). OGL Content Editors (option A) and Developers (option B) focus on content creation and editing with more limited scopes, while Functional Experts (option D) provide process knowledge but lack console-wide authority. Administrators can assign roles, publish content, and adjust system parameters, making their permissions comprehensive and critical for console management. This broad access ensures they can support all project facets, from setup to deployment.
