- **D. Installation and configuration requirements for selected apps**
- **E. Related app recommendations based on your usage profile**

Answer: C,D,E

Explanation:

Step 1 - Understanding the question

This question refers to the SAP Fiori Apps Reference Library, which is the official tool provided by SAP to explore all Fiori applications available for SAP S/4HANA.

It includes detailed information such as functional scope, technical components, installation requirements, and related app

recommendations.

Step 2 - Evaluate each option

Option A: Related app-specific solution design guidelines

This is correct.

The Fiori Apps Reference Library provides design guidelines and best practices for specific Fiori apps, including navigation patterns and user experience notes.

Option B: Shortcut to the Maintenance Planner tool to establish the technical update path This is incorrect.

The library does not provide direct access to the Maintenance Planner tool. Maintenance Planner is accessed through SAP Support Portal, not the Fiori Apps Library.

Option C: Installation and configuration requirements for selected apps

This is correct.

Each app entry provides installation, configuration, and authorization requirements, including business catalogs, roles, and software components.

Option D: Shortcut to the Quicksizer tool to estimate hardware requirements This is incorrect.

The Quicksizer tool is separate and used for system sizing; it is not part of the Fiori Apps Reference Library.

Option E: Related app recommendations based on your usage profile
