CompTIA Cybersecurity Analyst (CySA+) Certification Exam Sample Questions (Q112-Q117):

NEW QUESTION # 112

A security analyst is reviewing the logs from an internal chat server. The chat.log file is too large to review manually, so the analyst wants to create a shorter log file that only includes lines associated with a user demonstrating anomalous activity. Below is a snippet of the log:

Which of the following commands would work BEST to achieve the desired result?

- A. `grep -i javashark chat.log`
- B. `grep -i chatter14 chat.log`
- C. `grep -i pythonfun chat.log`
- D. `grep -v chatter14 chat.log`
- E. `grep -v javashark chat.log`
- F. `grep -v pythonfun chat.log`

Answer: E

NEW QUESTION # 113

A cybersecurity analyst is investigating a potential incident affecting multiple systems on a company's internal network. Although there is a negligible impact to performance, the following symptom present on each of the affected systems:

- * Existence of a new and unexpected svchost.exe process
- * Persistent, outbound TCP/IP connections to an unknown external host with routine keep-alives transferred
- * DNS query logs showing successful name resolution for an Internet-resident dynamic DNS domain

If this situation remains unresolved, which of the following will MOST likely occur?

- A. The adversary may attempt to perform a man-in-the-middle attack.
- B. Key files on the affected hosts may become encrypted and require ransom payment for unlock.
- C. The affected hosts may participate in a coordinated DDoS attack upon command
- D. An adversary may leverage the affected hosts to reconfigure the company's router ACLs.

Answer: B

NEW QUESTION # 114

While preparing for an audit of information security controls in the environment, an analyst outlines a framework control that has the following requirements:

- * All sensitive data must be classified.
- * All sensitive data must be purged on a quarterly basis.
- * Certificates of disposal must remain on file for at least three years.

This framework control is MOST likely classified as:

- A. prescriptive
- B. preventive
- C. corrective
- D. risk-based

Answer: A

NEW QUESTION # 115

A user's computer has been running slowly when the user tries to access web pages. A security analyst runs the command netstat -aon from the command line and receives the following output:

Which of the following lines indicates the computer may be compromised?

- A. Line 2
- B. Line 5
- C. Line 6
- D. Line 1
- E. Line 4
- F. Line 3

Answer: E

NEW QUESTION # 116
