# JN0-105 latest exam vce & JN0-105 test dumps & JN0-105 pdf torrent

What's more, part of that Lead2Passed JN0-105 dumps now are free: https://drive.google.com/open?id=1Ox8950gywdHZ2zIBreU_A-GYSVAe-AnC

With over a decade's business experience, our JN0-105 test torrent attached great importance to customers' purchasing rights all along. There is no need to worry about virus on buying electronic products. For we make endless efforts to assess and evaluate our JN0-105 exam prep' reliability for a long time and put forward a guaranteed purchasing scheme, we have created an absolutely safe environment and our JN0-105 Exam Question are free of virus attack. If there is any doubt about it, professional personnel will handle this at first time, and you can also have their remotely online guidance to install and use our JN0-105 test torrent.

Juniper JN0-105 Exam Syllabus Topics:

Topic	Details
Topic 1	• Routing Policy and Firewall Filters: The topic of Routing Policy and Firewall Filters covers routing policy and firewall filters on Junos devices. Furthermore, the topic also deals with routing policies and firewall filters on a Junos device.
Topic 2	• Configuration Basics: Identification of the main elements for configuring Junos devices is discussed in this topic. Moreover, it describes configuring basic components of a Junos device
Topic 3	• Routing Fundamentals: This topic discusses pointing out basic routing concepts or functionality for Junos devices. Moreover, the topic also describes configuring or monitoring basic routing elements for a Junos device.
Topic 4	• Networking Fundamentals: The topic networking fundamentals covers identifying the concepts and functionality of different fundamental elements of networking.
Topic 5	• User Interfaces: This topic delves into identifying the concepts, operation, or functionality of the Junos user interface.

Trustable New JN0-105 Test Guide - Win Your Juniper Certificate with Top Score

The Juniper JN0-105 exam questions are being offered in three different formats. These formats are Junos, Associate (JNCIA-Junos) (JN0-105) PDF dumps files, desktop practice test software, and web-based practice test software. All these three Junos, Associate (JNCIA-Junos) (JN0-105) exam dumps formats contain the real Junos, Associate (JNCIA-Junos) (JN0-105) exam

questions that assist you in your Junos, Associate (JNCIA-Junos) (JN0-105) practice exam preparation and finally, you will be confident to pass the final JN0-105 exam easily.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q56-Q61):

NEW QUESTION # 56
You are logged in to a Junos OS device with SSH and issued the show protocols | compare command in the configuration, but no output is shown.
Which statement is correct in this scenario?

- A. Someone accidentally deleted the active configuration.
- B. You must commit the configuration before any output will be shown.
- C. There are no changes to the candidate configuration.
- D. The command only works for interface configuration differences.

Answer: C

Explanation:
The show | compare command in Junos OS is used to display the differences between the candidate configuration and the active configuration. If no output is shown when you issue this command, it means that there are no changes between the candidate configuration and the active configuration. This indicates that the candidate configuration is identical to the active configuration, and thus no differences are displayed.
Reference:
"The show | compare command displays the differences between the candidate configuration and the active configuration. If there are no changes, no output is displayed."

NEW QUESTION # 57
After the factory default configuration is loaded, which configuration object must be created prior to the first commit?

- A. root authentication
- B. loopback IP address
- C. host name
- D. out-of-band connectivity

Answer: A

Explanation:
In Juniper Networks devices, when the factory default configuration is loaded, the first step before committing any configuration is to set up root authentication. This is crucial because it secures the device by ensuring that only authorized users have administrative access. Without setting up a root password, the device will not allow any commit operations, which is a safety measure to prevent unauthorized access. This requirement emphasizes the importance Juniper places on security right from the initial setup of the device.

NEW QUESTION # 58
You are configuring a firewall filter on a Juniper device.
In this scenario, what are two valid terminating actions? (Choose two.)

- A. 2discarD
- B. 1 count
- C. 4accept
- D. 3next term

Answer: A,C

Explanation:
In Juniper firewall filter configurations, "discard" and "accept" are two valid terminating actions for a term within a filter. The "discard" action drops the packet, preventing it from reaching its intended destination, while the "accept" action allows the packet to pass through the filter, proceeding to its next hop or destination. "Count" is a non-terminating action that increments a counter every time a packet matches the term but does not inherently determine the packet's fate. "Next term" directs the evaluation to proceed to the next term in the filter for further processing, also a non-terminating action.

NEW QUESTION # 59

Which Junos OS component is responsible for maintaining the forwarding table?

- **A. Packet Forwarding Engine**
- B. management daemon
- C. Routing Engine
- D. chassis control daemon

Answer: A

Explanation:

The Packet Forwarding Engine (PFE) in Junos OS is responsible for maintaining the forwarding table. The PFE processes incoming packets, performs route lookups in the forwarding table, and forwards packets based on this information, offloading these tasks from the Routing Engine to ensure efficient packet forwarding.

NEW QUESTION # 60

Click the Exhibit button.

Referring to the exhibit, OSPF has three export policies that match different static route prefixes. The 10.10.10.0/24 static route does not match any terms in the policy1 routing policy.
What happens next in this scenario?

- A. Thestaticrouteisrejected by the policy1 routing policy.
- B. Thestaticrouteisrejected by the default routing policy.
- C. Thestaticrouteisevaluated by the poiicy3 routing policy.
- **D. Thestaticrouteisevaluated by the poiicy2 routing policy.**

Answer: D

Explanation:

In Junos, when multiple policies are applied to a routing protocol for route export, the routes are evaluated in the order in which the policies are listed. In the exhibit, the OSPF configuration has three export policies listed: policy1, policy2, and policy3. The static route 10.10.10.0/24 does not match any terms in policy1; therefore, it is not rejected by policy1 but is instead passed on to the next policy in the sequence, which is policy2.
If the static route matches a term in policy2 that permits the route, it will be exported into OSPF. If it does not match in policy2, it will then be evaluated by policy3. If there is no match in policy3 as well, and assuming there are no more policies listed, the route would then be subject to the default routing policy behavior, which typically rejects the route unless an explicit accept statement is present in the policies.

NEW QUESTION # 61

......

We will continue to pursue our passion for better performance and human-centric technology of latest JN0-105 quiz prep. And we guarantee you to pass the exam for we have confidence to make it with our technological strength. A good deal of researches has been made to figure out how to help different kinds of candidates to get the JN0-105 certification. We have made classification to those faced with various difficulties, aiming at which we adopt corresponding methods to deal with. According to the statistics shown in the feedback chart, the general pass rate for Latest JN0-105 Test Prep is 98%, which is far beyond that of others in this field. In recent years, our JN0-105 exam guide has been well received and have reached 99% pass rate with all our dedication. As one of the most authoritative question bank in the world, our study materials make assurance for your passing the JN0-105 exam.
