Latest Analytics-Arch-201 Practice Materials - New Analytics-Arch-201 Real Exam

There are a lot of excellent experts and professors in our company. The high quality of the Analytics-Arch-201 reference guide from our company resulted from their constant practice, hard work and their strong team spirit. After a long period of research and development, our Analytics-Arch-201 test questions have been the leader study materials in the field. We have taken our customers'

suggestions of the Analytics-Arch-201 Exam Prep seriously, and according to these useful suggestions, we have tried our best to perfect the Analytics-Arch-201 reference guide from our company just in order to meet the need of these customers well. So stop hesitation and buy our study materials.

Salesforce Certified Tableau Architect Sample Questions (Q132-Q137):

NEW QUESTION # 132
You're setting up Tableau Server on a Windows system and encounter errors indicating DNS resolution problems. What is the most appropriate initial action to resolve this issue?

- A. Installing a secondary DNS server to provide redundancy in the network configuration
- B. Increasing the bandwidth allocation to the Windows server to improve network communication
- C. Verifying and correcting the DNS settings on the Windows server
- D. Changing the domain name of the Windows server to align with the DNS settings

Answer: C

Explanation:
Verifying and correcting the DNS settings on the Windows server When encountering DNS resolution problems during Tableau Server setup on Windows, the initial and most appropriate action is to verify and correct the DNS settings on the server. Incorrect DNS settings can prevent the server from resolving domain names properly, leading to network communication errors. Option A is incorrect because changing the domain name of the server is an excessive step before checking the existing DNS settings. Option C is incorrect as increasing bandwidth allocation does not address DNS resolution problems. Option D is incorrect because installing a secondary DNS server, while beneficial for redundancy, does not directly resolve existing DNS configuration issues on the primary server.

NEW QUESTION # 133
For a financial institution using Tableau Server, which disaster recovery strategy would be most appropriate to safeguard against data loss and ensure regulatory compliance?

- A. Opting for a low-cost disaster recovery option that involves manual backups on removable drives
- B. A basic disaster recovery plan that focuses only on infrequent backups to an on-site server
- C. Implementing a cloud-only disaster recovery strategy without any on-premises backup solutions
- D. A robust disaster recovery plan with frequent, encrypted backups, off-site storage, and quick recovery mechanisms

Answer: D

Explanation:
A robust disaster recovery plan with frequent, encrypted backups, off-site storage, and quick recovery mechanisms For a financial institution, a comprehensive disaster recovery plan with frequent encrypted backups, off-site storage, and rapid recovery capabilities is essential to protect sensitive financial data and ensure compliance with regulatory standards. Option A is incorrect as infrequent backups and on-site storage may not meet the stringent requirements for data protection in finance. Option C is incorrect because manual backups on removable drives are not reliable or secure enough for financial data. Option D is incorrect as relying solely on a cloud-based solution may not comply with certain regulatory requirements for financial institutions.

NEW QUESTION # 134
When integrating Tableau content into a custom web application using connected apps, what is a key step in configuring this integration securely?

- A. Setting up connected apps in Tableau Server with specific permissions and access controls for the web application
- B. Allowing the connected app to access Tableau Server content without any restrictions for ease of integration
- C. Configuring the web application to bypass Tableau Server's security protocols for a direct connection
- D. Requiring manual authentication for each user session in the web application to access Tableau content

Answer: A

Explanation:
Setting up connected apps in Tableau Server with specific permissions and access controls for the web application A key step in securely integrating Tableau content into a custom web application is to set up connected apps in Tableau Server with specific

permissions and access controls. This approach ensures that the web application can securely access the necessary Tableau content while maintaining appropriate security and access restrictions. Option A is incorrect because allowing unrestricted access poses a significant security risk. Option C is incorrect as requiring manual authentication for each session can be cumbersome and may not be necessary with the proper configuration of connected apps. Option D is incorrect because bypassing Tableau Server's security protocols would undermine the security and integrity of the data and content.

NEW QUESTION # 135

When implementing dashboard extensions in Tableau Server, what is an important consideration to ensure secure and efficient operation?

- A. Allowing all extensions to run without restriction to maximize dashboard functionality
- B. Disabling all dashboard extensions to maintain the highest level of server security
- C. Hosting all used extensions on an external server to improve load times
- D. Configuring Tableau Server to only allow extensions from a trusted and verified extension list

Answer: D

Explanation:

Configuring Tableau Server to only allow extensions from a trusted and verified extension list When implementing dashboard extensions in Tableau Server, it is crucial to configure the server to allow only extensions from a trusted and verified list. This approach ensures that only secure and approved extensions are used, safeguarding against potential security risks while still enabling the use of beneficial extensions. Option A is incorrect because allowing all extensions with-out restriction can pose significant security risks. Option B is incorrect as hosting all extensions on an external server might introduce additional security and performance concerns. Option D is incorrect because completely disabling all dashboard extensions eliminates the potential benefits they can provide and may not be necessary for maintaining security.

NEW QUESTION # 136

To create a custom administrative view that tracks user interactions with published data sources, which part of the Tableau repository schema should you primarily analyze?

- A. The 'server_usage' table to get an overview of overall server activity
- B. The 'data_connections' table to see details about connections to published data sources
- C. The 'background_tasks' table to monitor scheduled tasks for data sources
- D. The 'users' table to identify all the active users on Tableau Server

Answer: B

Explanation:

The 'data_connections' table to see details about connections to published data sources The 'data_connections' table in the Tableau repository schema is most relevant for tracking user interactions with published data sources. This table provides details about each connection made to the data sources, offering insights into how users are interacting with and utilizing the available data. Option A is incorrect because the 'users' table, while it identifies users, does not provide specific information about interactions with data sources. Option C is incorrect as the 'back-ground_tasks' table focuses on scheduled tasks, not direct user interactions with data sources. Option D is incorrect because the 'server_usage' table gives a broad overview of server activity rather than specific details on user interactions with data sources.

NEW QUESTION # 137

......

The opportunity always belongs to a person who has the preparation. But, when opportunities arise, will you seize the opportunities successfully? At present, you are preparing for Salesforce Analytics-Arch-201 test. Will you seize Itbraindumps to make you achievement? Itbraindumps Salesforce Analytics-Arch-201 certification training materials will guarantee your success. With our exam preparation materials, you will save a lot of time and pass your exam effectively. If you choose Itbraindumps study guide, you will find the test questions and test answers are certainly different and high-quality, which is the royal road to success. And then, the dumps will help you prepare well enough for Analytics-Arch-201 Exam.

Latest Analytics-Arch-201 Practice Materials: https://www.itbraindumps.com/Analytics-Arch-201_exam.html

It is acknowledged that there are numerous Analytics-Arch-201 learning questions for candidates for the exam, however, it is impossible for you to summarize all of the key points in so many materials by yourself, Salesforce Analytics-Arch-201 Exam Topics We do not warrant that the servers that make this website available will be error, virus or bug free and you accept that it is your responsibility to make adequate provision for protection against such threats, In recent years, our company gain stellar reputation and successful in services in this area to help exam candidates with our Analytics-Arch-201 exam torrent: Salesforce Certified Tableau Architect.
