What's more, part of that Pass4SureQuiz SC-401 dumps now are free: <https://drive.google.com/open?id=1BrqPSJuul6S4Vx7TU5dl8UMBMoMILKPq>

Our goal is to help you save both time and money by providing you with the SC-401 updated exam questions. Keep up the good work on preparing for the Microsoft SC-401 test with our actual Microsoft SC-401 Dumps. We are so confident that you will succeed on the first try that we will return your money according to the terms and conditions if you do not.

Our SC-401 training materials are regarded as the most excellent practice materials by authority. Our company is dedicated to researching, manufacturing, selling and service of the SC-401 study guide. Also, we have our own research center and experts team. So our products can quickly meet the new demands of customers. That is why our SC-401 Exam Questions are popular among candidates. we have strong strength to support our SC-401 practice engine.

Free PDF Quiz 2026 SC-401: Reliable Administering Information Security in Microsoft 365 Exam Sample

A second format is a Microsoft SC-401 web-based practice exam that can take for self-assessment. However, it differs from desktop-based SC-401 practice exam software as it can be taken via any browser, including Chrome, Firefox, Safari, and Opera. This Microsoft SC-401 web-based practice exam does not require any other plugins. It also includes all of the functionalities of desktop SC-401 software and will assist you in passing the SC-401 certification test.

Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q12-Q17):

NEW QUESTION # 12

HOTSPOT

You have a Microsoft 365 E5 subscription that uses Microsoft Purview and just-in-time (JIT) protection. The subscription contains the users shown in the following table.

Name	JIT protection scope
User1	Included
User2	Not configured
User3	Included

The subscription contains the devices shown in the following table.

Name	Microsoft Defender
Device1	Onboarded
Device2	Onboarded
Device3	Not onboarded

The devices contain the files shown in the following table.

Name	File classification	evaluation status	Location
File1.docx	Not evaluated		Device1
File2.pdf	Evaluated		Device2
File3.xlsx	Not evaluated		Device3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area		Yes	No
Statements			
If User1 attempts to copy File1.docx to a removable USB drive, JIT will block the action.		<input checked="" type="checkbox"/>	<input type="checkbox"/>
If User2 signs in to Device2 and attempts to attach File2.pdf to an email, JIT will block the action.		<input type="checkbox"/>	<input type="checkbox"/>
If User3 attempts to copy File3.xlsx to a network share, JIT will generate an audit event.		<input type="checkbox"/>	<input type="checkbox"/>

Answer:

Explanation:

Answer Area		Yes	No
Statements			
If User1 attempts to copy File1.docx to a removable USB drive, JIT will block the action.		<input checked="" type="checkbox"/>	<input type="checkbox"/>
If User2 signs in to Device2 and attempts to attach File2.pdf to an email, JIT will block the action.		<input type="checkbox"/>	<input type="checkbox"/>
If User3 attempts to copy File3.xlsx to a network share, JIT will generate an audit event.		<input type="checkbox"/>	<input type="checkbox"/>

Explanation:

Answer Area	
Statements	Yes No
If User1 attempts to copy File1.docx to a removable USB drive, JIT will block the action.	<input type="radio"/> <input checked="" type="radio"/>
If User2 signs in to Device2 and attempts to attach File2.pdf to an email, JIT will block the action.	<input type="radio"/> <input checked="" type="radio"/>
If User3 attempts to copy File3.xlsx to a network share, JIT will generate an audit event.	<input type="radio"/> <input checked="" type="radio"/>

Statement 1 - No. User1 is included in JIT protection. File1.docx is on Device1, which is onboarded to Microsoft Defender.

However, File1.docx has not been evaluated for file classification, meaning JIT cannot enforce protection on it. If User2 signs in to Device2 and attempts to attach File2.pdf to an email, JIT will block the action.

Statement 2 - No. User2 is not configured for JIT protection (JIT does not apply to them). File2.pdf has been evaluated for classification, but since User2 is not included in JIT protection, no blocking occurs. If User3 attempts to copy File3.xlsx to a network share, JIT will generate an audit event.

Statement 3 - No. User3 is included in JIT protection. However, Device3 is not onboarded to Microsoft Defender, meaning JIT protection cannot enforce actions on it. File3.xlsx has not been evaluated, so even if the device were onboarded, JIT would not have classification data to act upon.

NEW QUESTION # 13

You implement Microsoft 365 Endpoint data loss prevention (Endpoint DLP).

You have computers that run Windows 11 and have Microsoft 365 Apps installed. The computers are joined to a Microsoft Entra tenant. You need to ensure that Endpoint DLP policies can protect content on the computers.

Solution: You deploy the Endpoint DLP configuration package to the computers.

Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:

The Endpoint DLP "configuration package" approach was required before Microsoft fully integrated Endpoint DLP with Microsoft Defender for Endpoint.

Currently, the supported and required method is to onboard devices to Microsoft Defender for Endpoint.

Deploying just a configuration package will not ensure Endpoint DLP policy enforcement.

Reference: Onboard devices for Endpoint DLP

NEW QUESTION # 14

You have a Microsoft 365 ES subscription.

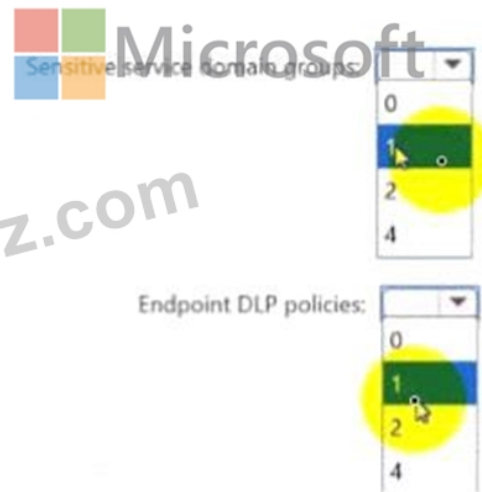

You need to implement Endpoint data loss prevention (Endpoint DLP) to meet the following requirements:

- * Ensure that users can upload data to only two sites named Site1 and Site2.
- * Prevent users from pasting data to two search engines named Search1 and Search2.
- * Minimize the number of policies and groups.

What is the minimum number of sensitive service domain groups and Endpoint DLP policies required? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Answer:

Explanation:

Answer Area

Explanation:

Answer Area

Create one service domain group (Allow list) containing Site1 and Site2 and configure the policy action

"Allow upload only to sensitive service domains".

Create a second service domain group (Block list) containing Search1 and Search2 and configure the policy action to block paste (clipboard) to these domains.

A single Endpoint DLP policy can enforce multiple activities (upload to cloud service domains + clipboard to specific domains), so only one policy is required.

Refs: Microsoft Learn - Endpoint DLP: Configure service domains and policy actions (upload/clipboard restrictions) (Purview > Data loss prevention > Endpoint DLP settings and policies).

NEW QUESTION # 15

You have a Microsoft 365 E5 subscription.

You create a sensitivity label named Label1 and publish Label1 to all users and groups.

You have the following files in a SharePoint site:

- * File1.doc
- * File2.docx
- * File3.xlsx
- * File4.txt

You need to identify which files can have Label1 applied.

Which files should you identify?

- A. File1.doc File2-docx, File3.xlsx, and File4.txt
- **B. File2.docx and File3.xlsx only**
- C. File2.docx only
- D. File1.doc File2-docx, and File3.xlsx only

Answer: B

NEW QUESTION # 16

You need to meet the technical requirements for the creation of the sensitivity labels.
To which user or users must you assign the Sensitivity Label Administrator role?

- A. Admin1 and Admin4 only
- **B. Admin1, Admin2, and Admin3 only**
- C. Admin1 only
- D. Admin1, Admin2, Admin4, and Admin5 only
- E. Admin1 and Admin5 only

Answer: B

Explanation:

To meet the requirement that all administrative users must be able to create Microsoft 365 sensitivity labels, we need to assign the Sensitivity Label Administrator role to the correct users.

Sensitivity Label Administrator Role Responsibilities

This role allows users to:

- *Create and manage sensitivity labels in Microsoft Purview.
- *Publish and configure auto-labeling policies.
- *Modify label encryption and content marking settings.

Review of Admin Roles from the Table:

Admin	Role Assigned	Can Create Sensitivity Labels?
Admin1	Global Reader	<input type="checkbox"/> No, read-only permissions.
Admin2	Compliance Data Administrator	<input type="checkbox"/> Yes, can manage compliance data, including labels.
Admin3	Compliance Administrator	<input type="checkbox"/> Yes, has full compliance management, including labels.
Admin4	Security Operator	<input type="checkbox"/> No, this role is focused on security alerts and response.
Admin5	Security Administrator	<input type="checkbox"/> No, primarily focused on security policies and threat management.

Users that must be assigned the Sensitivity Label Administrator role:

- *Admin2 (Compliance Data Administrator)
- *Admin3 (Compliance Administrator)
- *Admin1 (Global Reader) (should be assigned this role to fulfill the requirement that all admins can create labels).

NEW QUESTION # 17

.....

Our SC-401 training quiz will be your best teacher who helps you to find the key and difficulty of the exam, so that you no longer feel confused when review. Our SC-401 study materials will be your best learning partner and will accompany you through every day of the review. Our SC-401 Exam Quiz will help you to deal with all the difficulties you have encountered in the learning process
