Preparing with the help of our C-CPI-2506 Exam Questions frees you from getting help from other study sources, and you can pass the exam with 100% success guarantee.

SAP Certified Associate - Integration Developer Sample Questions (Q37-Q42):

NEW QUESTION # 37

What does an API consumer do?

- A. It provides an interface.
- B. It provides the server-side implementation of an interface.
- C. It invokes an interface.

Answer: C

Explanation:

An API consumer is an application or system that invokes an interface provided by an API provider. An API consumer uses the interface to access or manipulate data or functionality exposed by the API provider. An API consumer can be a web browser, a mobile app, a cloud service, or any other client that can send requests and receive responses from an API provider. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 38

You have created an API provider of the type Internet. What http response code indicates success?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: B

Explanation:

In API Management (Integration Suite), when you configure an API provider of type Internet, the system checks connectivity by sending a request to the backend.

HTTP 200 # Success (OK). The endpoint is reachable and functioning.

401 (Unauthorized) # Authentication failure.

403 (Forbidden) # Authorization failure.

502 (Bad Gateway) # Network or proxy error.

Therefore, the successful response code indicating proper connection is 200.

NEW QUESTION # 39

Which Integration Flow element is best suited for executing custom Logic on the received cloud event data?

- A. Use an external REST API
- B. Run a Groovy script
- C. Employ a Mule Expression component
- D. Use a Java connector

Answer: B

Explanation:

For executing custom logic inside an integration flow:

Groovy script (via Script step) is the supported mechanism in SAP Cloud Integration.

External REST APIs can enrich data but are not for embedded custom logic execution.

Mule components are not part of SAP CPI.

Java connectors are not directly supported in SAP CPI runtime.

Thus, the best suited for executing custom logic is Groovy script.

NEW QUESTION # 40

Which SAP Integration Suite component delivers the Cloud Event to the "emis-s4hana-uc123" message queue?

- A. Open Connector
- B. Event Mesh
- C. Process Integration

- D. API Management

Answer: B

Explanation:

In SAP Integration Suite, the component responsible for delivering Cloud Events to message queues is Event Mesh. Event Mesh handles event-driven communication and manages message queues like emis-s4hana-uc123.

Process Integration (PI/PO) is on-premise middleware, not part of Integration Suite cloud services.

API Management handles APIs, not messaging events.

Open Connectors provides connectivity to third-party SaaS apps, not queue management.

Thus, the Cloud Event is delivered to the message queue via Event Mesh.

NEW QUESTION # 41

What does the messaging model of the Apache Camel Data Model consist of?

- A. Header, Exchange ID, in-message
- **B. Header, body, properties**
- C. Header, properties, attachment
- D. Header, body, attachment

Answer: B

Explanation:

The Apache Camel Data Model, which underpins SAP Cloud Integration's message processing model, consists of Header # Metadata about the message (e.g., content type, correlation IDs).

Body # Main payload of the message.

Properties # Exchange-level metadata, persisted throughout processing but not transferred with the message.

Other options mix in elements like attachments or exchange IDs, but the standard messaging model is header, body, properties.

NEW QUESTION # 42

.....

With all the above merits, the most outstanding one is 100% money back guarantee of your success. Our SAP experts deem it impossible to drop the C-CPI-2506 exam, if you believe that you have learnt the contents of our C-CPI-2506 study guide and have revised your learning through the C-CPI-2506 Practice Tests.
