

First-Grade 2V0-11.25 Lead2pass & Leader in Qualification Exams & Perfect 100% 2V0-11.25 Correct Answers

Answer: A,B

Question: 7

In VMware Cloud Foundation, which component is responsible for scaling and managing the deployment of NSX Edge clusters?

Response:

A. SDDC Manager
B. NSX Manager
C. vCenter Server
D. Aria Operations

Answer: A

Question: 8

Which component is responsible for creating and managing virtual machines in VMware Cloud Foundation?

Response:

A. vSphere
B. vCenter
C. NSX-T
D. vRealize Operations

Answer: B

Question: 9

When deploying VMware Aria Suite Lifecycle in a VMware Cloud Foundation environment, what is the primary role of SDDC Manager during deployment?

Response:

A. Provisioning and managing vSphere clusters
B. Integrating VMware Cloud Foundation with public cloud resources
C. Managing and configuring VMware Aria Suite components
D. Scaling the VMware Aria suite across multiple clouds

Answer: C

What's more, part of that LatestCram 2V0-11.25 dumps now are free: <https://drive.google.com/open?id=1mBpvB2tNXaOErjL3ZQMz1Wl7ZzwlyUz>

If we want to survive in this competitive world, we need a comprehensive development plan to adapt to the requirement of modern enterprises. We sincerely recommend our 2V0-11.25 preparation exam for our years' dedication and quality assurance will give you a helping hand on the 2V0-11.25 Exam. There are so many advantages of our 2V0-11.25 study materials you should spare some time to get to know. Just have a try and you will love our 2V0-11.25 exam questions.

VMware 2V0-11.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Troubleshoot and Optimize the VMware by Broadcom Solution: This section of the exam measures skills of the cloud infrastructure support engineer and covers diagnosing and resolving technical issues related to VMware Cloud Foundation deployment and operations. It includes troubleshooting the deployment process, vSphere, networking, vSAN, SDDC Manager, and Aria Suite. The section also evaluates the ability to optimize infrastructure performance, manage resources, and ensure efficient operation, focusing on the practical aspects of maintaining and enhancing VMware Cloud Foundation environments.

Topic 2	<ul style="list-style-type: none"> • Plan and Design the VMware by Broadcom Solution: There are no testable objectives in this section. Still, it is intended for solution architects who need to plan and design VMware Cloud Foundation deployments, focusing on sizing, architecture selection, and network • storage design.
Topic 3	<ul style="list-style-type: none"> • Install, Configure, Administrate the VMware by Broadcom Solution: This section of the exam measures skills of the VMware Cloud Foundation administrator and covers the installation and configuration processes for VMware Cloud Foundation components, deploying and configuring management domains, NSX Edge Clusters, and the VMware Aria Suite Lifecycle. It assesses the ability to deploy workload domains, enable vSphere IaaS control plane, create vSphere namespaces, manage stretched clusters, and use VMware Cloud Foundation APIs. Candidates are also tested on scaling deployments, performing Day 2 operations like backup, recovery, lifecycle management, VM lifecycle management, configuring networking and storage, managing ESXi hosts, implementing encryption, and operationalizing VMware NSX, vSAN, and Aria Suite. The section is comprehensive, targeting those responsible for the ongoing administration and optimization of VMware environments.
Topic 4	<ul style="list-style-type: none"> • IT Architectures, Technologies, Standards: There are no testable objectives in this section. However, this area establishes the foundational knowledge expected of cloud administrators, such as understanding basic IT infrastructure, virtualization, and cloud models. This section is relevant for cloud administrators and infrastructure engineers.
Topic 5	<ul style="list-style-type: none"> • VMware by Broadcom Solution: This section of the exam measures skills of the cloud administrator and covers identifying VMware Cloud Foundation components like vSphere, vSAN, and NSX, as well as their architecture, including stretched configurations. It also assesses knowledge of requirements for implementing private cloud solutions, use cases for VMware Aria Suite components, vSphere IaaS control plane, Data Services Manager, and VMware Cloud Foundation Add-Ons. The focus is on the ability to recognize and apply the correct VMware solutions for various enterprise scenarios.

Pass Guaranteed Quiz 2026 Professional VMware 2V0-11.25: VMware Cloud Foundation 5.2 Administrator Lead2pass

LatestCram VMware 2V0-11.25 Practice Test dumps are doubtless the best reference materials compared with other 2V0-11.25 exam related materials. If you still don't believe it, come on and experience it and then you will know what I was telling you was true. You can visit LatestCram.com to download our free demo. There are two versions of LatestCram dumps. The one is PDF version and another is SOFT version. You can experience it in advance. In this, you can check its quality for yourself.

VMware Cloud Foundation 5.2 Administrator Sample Questions (Q51-Q56):

NEW QUESTION # 51

During a routine check, an administrator observes that several VMs are reporting high memory usage in VMware Aria Operations. They need to verify if the high memory usage is due to memory contention. What actions should be taken in VMware Aria Operations to verify this?

- A. Check the memory usage and ballooning metrics.
- B. Review the CPU ready time.B Look al the network throughput
- C. Analyze the storage I/O performance.

Answer: C

Explanation:

To verify if high memory usage is due to memory contention, the administrator should check the memory usage and ballooning metrics in VMware Aria Operations. Ballooning occurs when the hypervisor reclaims memory from a virtual machine due to memory contention, and monitoring these metrics can help identify whether the VMs are experiencing memory pressure or being forced to swap memory.

NEW QUESTION # 52

An administrator needs to configure Network IO Control (NIOC) on a Virtual Distributed Switch (VDS) to prioritize storage traffic over other types of traffic.

Which two steps should be followed? (Choose two.)

- A. Assign shares and limits to the new port group to prioritize the storage traffic.
- B. Navigate to the VDS settings in the vSphere Client and enable NIOC.
- C. Create a new port group specifically for storage traffic.
- D. Disable all other traffic types to ensure storage traffic gets full bandwidth.
- E. Migrate all VM traffic to a standard switch.

Answer: A,B

Explanation:

Network IO Control (NIOC) must be enabled on the Virtual Distributed Switch (VDS) via the vSphere Client to begin configuring and managing bandwidth allocation and prioritization for different types of traffic.

After enabling NIOC, you can assign shares and limits to the specific port group (in this case, for storage traffic) to prioritize the traffic over other types of network traffic.

NEW QUESTION # 53

An administrator is using VMware Aria Automation to automate the provisioning of virtual machines in their VMware Cloud Foundation environment. They notice that the automation workflows are failing frequently and want to troubleshoot the issue.

What step should the administrator take in VMware Aria Operations for Logs to diagnose the cause of the automation workflow failures?

- A. Review the Alert Definitions to ensure alerts for workflow failures are configured.
- B. Access the Dashboard to get an overview of system health and performance metrics.
- C. Check the Audit Logs to see if there are any unauthorized access attempts.
- D. Use the Interactive Analytics feature to search for error messages related to the workflows.

Answer: D

Explanation:

To diagnose the cause of automation workflow failures in VMware Aria Automation, the Interactive Analytics feature in VMware Aria Operations for Logs allows administrators to search for error messages and filter logs related to the specific workflows. This feature enables detailed analysis of log data to identify any underlying issues causing the failures.

NEW QUESTION # 54

An administrator successfully removed a host from a VMware vSphere cluster and decommissioned it in SDDC Manager.

What must be done before the host can be recommissioned and added back to the SDDC Manager inventory?

- A. Reinstall ESXi on the host.
- B. Log in to the host console and select "Reset System Configuration" from the ESXi DCUI.
- C. Manually uninstall the NSX VIBs on the host.
- D. From the host console, use the /sbin/generate-certificates command to generate a new self-signed certificate.

Answer: B

Explanation:

Before the host can be recommissioned and added back to the SDDC Manager inventory, you must reset the system configuration. This can be done from the ESXi Direct Console User Interface (DCUI) by selecting the "Reset System Configuration" option. This will remove any previous configuration and allow the host to be re-added to the environment.

NEW QUESTION # 55

An organization is planning to manage a diverse set of databases across multiple VMware Cloud Foundation environments.

Which three capabilities of Data Services Manager would help in managing these databases efficiently? (Choose three.)

- **A. Policy-based backup and recovery for databases.**
- **B. Centralized monitoring and alerting for all managed databases.**
- C. Automated VM migration between on-premises and cloud environments.
- **D. Automated database provisioning and deployment.**
- E. Integration with vSAN for optimized storage management

Answer: A,B,D

Explanation:

Centralized monitoring and alerting for all managed databases: Data Services Manager enables centralized monitoring and alerting for databases across multiple environments, providing visibility and proactive management.

Policy-based backup and recovery for databases: Data Services Manager allows for the implementation of backup and recovery policies to ensure the safety and availability of databases.

Automated database provisioning and deployment: With Data Services Manager, administrators can automate the deployment and provisioning of databases, streamlining the management process.

NEW QUESTION # 56

.....

We assure you that we are focused on providing you with guidance about our 2V0-11.25 exam question, but all services are free. If you encounter installation problems, we will have professionals to provide you with remote assistance. Of course, we will humbly accept your opinions on our 2V0-11.25 Quiz guide. If you have good suggestions to make better use of our 2V0-11.25 test prep, we will accept your proposal and make improvements. Each of your progress is our driving force. We sincerely serve for you any time.
