ISTQB ISTQB-CTFL Free Dumps - New ISTQB-CTFL Test Sample

2026 Latest ExamDumpsVCE ISTQB-CTFL PDF Dumps and ISTQB-CTFL Exam Engine Free Share: https://drive.google.com/open?id=1Af1qmnnUIuqjdvJvucU3QT0k8lcfStNK

The ISTQB Certified Tester Foundation Level (CTFL v4.0) (ISTQB-CTFL) exam questions are the real, valid, and updated ISTQB-CTFL Exam Questions that are specifically designed for quick and complete ISTQB-CTFL exam preparation. With ExamDumpsVCE ISTQB Certified Tester Foundation Level (CTFL v4.0) (ISTQB-CTFL) practice test questions you can start ISTQB ISTQB-CTFL exam preparation immediately.

Preparing for the ISTQB Certified Tester Foundation Level (CTFL v4.0) (ISTQB-CTFL) test can be challenging, especially when you are busy with other responsibilities. Candidates who don't use ISTQB-CTFL dumps fail in the ISTQB-CTFL examination and waste their resources. Using updated and valid ISTQB-CTFL Questions; can help you develop skills essential to achieve success in the ISTQB-CTFL certification exam.

>> ISTQB ISTQB-CTFL Free Dumps <<

Authoritative ISTQB-CTFL Free Dumps bring you Practical New ISTQB-CTFL Test Sample for ISTQB ISTQB Certified Tester Foundation Level (CTFL v4.0)

With ISTQB-CTFL study engine, you will get rid of the dilemma that you work hard but cannot improve. With our ISTQB-CTFL learning materials, you can spend less time but learn more knowledge than others. ISTQB-CTFL exam questions will help you reach the peak of your career. Just think of that after you get the ISTQB Certified Tester Foundation Level (CTFL v4.0) ISTQB-CTFL Certification, you will have a lot of opportunities of going to biger and better company and getting higher incomes!

ISTQB Certified Tester Foundation Level (CTFL v4.0) Sample Questions (Q360-Q365):

NEW QUESTION # 360
A program got 100% decision coverage in a test. Which of the following statements is then guaranteed to be true?

- A. Every output equivalence class has been tested.
- B. The "dead" code has not been covered.
- C. Every input equivalence class has been tested.
- D. Every executable statement Is covered.

Answer: D

Explanation:
If a program got 100% decision coverage in a test, then it is guaranteed that every executable statement is covered. Decision coverage (also known as branch coverage) is a type of structural coverage (also known as white-box coverage) that measures how many decision outcomes have been exercised by a test suite. A decision outcome is a possible result of a decision point (such as an if-then-else statement) in a program's code. Decision coverage requires that each decision point has both true and false outcomes executed at least once by a test suite. Decision coverage implies statement coverage, which is another type of structural coverage that measures how many executable statements have been executed by a test suite. Statement coverage requires that each executable statement is executed at least once by a test suite. Therefore, if a program got 100% decision coverage in a test, then it also got 100% statement coverage in a test, which means that every executable statement is covered. The other options are not guaranteed to be true if a program got 100% decision coverage in a test. Every output equivalence class has been tested and every input equivalence class has been tested are not guaranteed to be true if a program got 100% decision coverage in a test, because equivalence classes are based on functional requirements or specifications, not on code structure or logic. Equivalence classes are used in specification-based testing (also known as black-box testing), which is a type of testing that does not consider the internal structure or implementation of the system under test.
Decision coverage is used in structure-based testing (also known as white-box testing), which is a type of testing that considers the internal structure or implementation of the system under test. Therefore, achieving 100% decision coverage does not imply achieving 100% equivalence class coverage. The "dead" code has not been covered is not guaranteed to be true if a program got 100% decision coverage in a test, because dead code (also known as unreachable code) is code that can never be executed due to logical errors or design flaws. Dead code can reduce readability and maintainability of the code, as well as increase complexity and size. Decision coverage does not account for dead code, as it only considers the decision outcomes that are possible to execute. Therefore, achieving 100% decision coverage does not imply that the dead code has not been covered. NEW QUESTION # 361
During system testing phase of a word processor, a tester finds that on opening a file from a particular set of files, which are part of a critical workflow, the word processor crashes. Which of the following is the next step the tester should take poor to recording the deviation?

- A. Try to identify the code fragment causing the problem
- B. Send an email to the developer and not report the bug
- C. Try to recreate the incident before reporting
- D. Report the incident as is without any further action

Answer: C

Explanation:
An incident is any event that occurs during testing that requires investigation. An incident report is a document that records the details of an incident. The next step the tester should take prior to recording the deviation is to try to recreate the incident before reporting. This can help confirm that the incident is reproducible and not caused by a random or external factor. This can also help gather more information about the incident, such as the steps to reproduce it, the expected and actual results, the severity and priority of the incident, or any screenshots or logs that can illustrate the incident. Trying to identify the code fragment causing the problem is not the next step the tester should take prior to recording the deviation, as this is a debugging activity that is usually performed by developers

after receiving the incident report. Sending an email to the developer and not reporting the bug is not the next step the tester should take prior to recording the deviation, as this is an informal and unstructured way of communicating incidents that can lead to confusion, inconsistency or loss of information. Reporting the incident as is without any further action is not the next step the tester should take prior to recording the deviation, as this can result in incomplete or inaccurate incident reports that can hamper the investigation and resolution of incidents. 33.

NEW QUESTION # 362

For the same financial institution in Question 12, with the same requirements and expectations, what would be the most likely investment values used in testing if two-point boundary value analysis is used to design test cases specific to the 13% interest rate equivalence partition?

- A. R100 000. R500 000.
- B. R99 999, R100 000, R499 999, R500 000.
- C. R100 000, R100 001, R500 000, R500 001.
- D. R99 000, R500 001.

Answer: C

Explanation:
For boundary value analysis, the test cases should include the boundary values just inside and just outside the equivalence partition for the 13% interest rate range:
* R100,000 (just inside the previous range)
* R100,001 (start of the 13% range)
* R500,000 (end of the 13% range)
* R500,001 (just outside the range)
These values ensure that both the edges of the partition are tested.

NEW QUESTION # 363

A bank software has a feature of locking down accounts that have and overdraft higher than $10,000.
Due to a bug in the code, the system locks down accounts once they reached $1000 overdraft.
Based on this context, which of the following is correct statement

- A. It is an example of a defect that it goes undetected, will cause harm to the end customer and to the company (the bank)
- B. It is an example of a defect that if goes undetected, will not cause any real harm to either the end customer or to the company (the bank)
- C. It is an example of a defect that if goes undetected, will not cause harm to the end customer, but will cause harm to the company (the bank)
- D. It is an example of a defect, that if goes undetected, will cause harm to the end customer but not to the company (the bank)

Answer: A

Explanation:
A defect is a flaw in a component or system that can cause the component or system to fail to perform its required function. A defect can cause harm to the end customer, the company, or both, depending on the impact and severity of the failure. In this case, the defect in the code causes the system to lock down accounts that have an overdraft higher than $1000, instead of $10,000. This can cause harm to the end customer, as they may lose access to their funds and face inconvenience or financial difficulties. This can also cause harm to the company, as they may lose customer trust and satisfaction, face legal issues or complaints, or incur additional costs for fixing the defect and restoring the accounts. NEW QUESTION # 364

Consider a review for a high-level architectural document written by a software architect. The architect does most of the review preparation work, including distributing the document to reviewers before the review meeting. However, reviewers are not required to analyze the document in advance, and during the review meeting the software architect explains the document step by step. The

only goal of this review is to establish a common understanding of the software architecture that will be used in a software development project.
Which of the following review types does this review refer to?

- A. Audit
- B. Inspection
- C. Walkthrough
- D. Informal review

Answer: C

Explanation:
This answer is correct because a walkthrough is a type of review where the author of the work product leads the review process and explains the work product to the reviewers. The reviewers are not required to prepare for the review in advance, and the main objective of the walkthrough is to establish a common understanding of the work product and to identify any major defects or issues. A walkthrough is usually informal and does not follow a defined process or roles. In this case, the review for a high-level architectural document written by a software architect matches the characteristics of a walkthrough. NEW QUESTION # 365

......

In the process of using our ISTQB-CTFL Study Materials if the clients encounter the difficulties, the obstacles and the doubts they could contact our online customer service staff in the whole day. If the clients fail in the test by accident we will refund them at once in the first moment. Our service team will update the ISTQB-CTFL study materials periodically and provide one-year free update. We only use the certificated experts and published authors to compile our study materials and our products boost the practice test software to test the clients' ability to answer the questions. The clients can firstly be familiar with our products in detail and then make their decisions to buy it or not.

New ISTQB-CTFL Test Sample: https://www.examdumpsvce.com/ISTQB-CTFL-valid-exam-dumps.html

And not only you will get the most rewards but also you will get an amazing study experience by our ISTQB Certified Tester Foundation Level (CTFL v4.0) ISTQB-CTFL exam questions, ISTQB ISTQB-CTFL Free Dumps Thus our clients can understand the abstract concepts in an intuitive way, Try our amazing dumps and get through Exam ISTQB-CTFL with passing guarantee, ISTQB ISTQB-CTFL Free Dumps When it comes to delivery, the speed comes atop.

Over time the next layer began to emerge, And rest ISTQB-CTFL assured, you'll be reminded of the appropriate comp setting whenever a task or technique calls for it, And not only you will get the most rewards but also you will get an amazing study experience by our ISTQB Certified Tester Foundation Level (CTFL v4.0) ISTQB-CTFL Exam Questions.

Quiz 2026 ISTQB-CTFL: ISTQB Certified Tester Foundation Level (CTFL v4.0) – High Pass-Rate Free Dumps

Thus our clients can understand the abstract concepts in an intuitive way, Try our amazing dumps and get through Exam ISTQB-CTFL with passing guarantee, When it comes to delivery, the speed comes atop.

Become a ISTQB-CTFL and become a project hero with our ISTQB-CTFL dumps.
