

# Free PDF HPE7-A08 - Trustable Study HPE Aruba Networking Switching Professional Exam Center

BTW, DOWNLOAD part of VCE4Dumps HPE7-A08 dumps from Cloud Storage: <https://drive.google.com/open?id=1BAMIFAhp7vh3fYuKFpgaLb2gi-Vgh2g>

HPE7-A08 practice test software can be used on devices that range from mobile devices to desktop computers. We provide the HP HPE7-A08 exam questions in a variety of formats, including a web-based practice test, desktop practice exam software, and downloadable PDF files. VCE4Dumps provides proprietary preparation guides for the certification exam offered by the HPE7-A08 Exam Dumps. In addition to containing numerous questions similar to the HPE Aruba Networking Switching Professional Exam (HPE7-A08) exam, the HPE7-A08 exam questions are a great way to prepare for the HP HPE7-A08 exam dumps.

The modern HP world is changing its dynamics at a fast pace. To stay updated and competitive you have to learn these technological changes. With the one HPE Aruba Networking Switching Professional Exam (HPE7-A08) certification exam you can do this easily. The HPE Aruba Networking Switching Professional Exam (HPE7-A08) certification exam offers a unique and quick way to learn new in-demand expertise and enhance your knowledge.

## Test HPE7-A08 Questions, Exam HPE7-A08 Certification Cost

By contrasting with other products in the industry, our HPE7-A08 test guide really has a higher pass rate, which has been verified by many users. As long as you use our HPE7-A08 exam training I believe you can pass the exam. If you fail to pass the exam, we will give a full refund. HPE7-A08 learning guide hopes to progress together with you and work together for their own future. The high passing rate of HPE Aruba Networking Switching Professional Exam exam training guide also requires your efforts. If you choose HPE7-A08 test guide, I believe we can together contribute to this high pass rate.

## HP HPE7-A08 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Create the Implementation Plan for the Wired Network Solution: This section measures the skills of Network Designers who focus on understanding the HPE switching portfolio and selecting the right products to match various customer requirements. Candidates must also demonstrate the ability to create detailed and effective implementation plans based on given designs or customer scenarios to ensure successful wired network deployments.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Install and Configure the Wired Network Solution: This domain evaluates the abilities of Network Engineers to provision and configure HPE Aruba Networking switches both via Aruba Networking Central and command-line interface. It covers physical switch setup, Layer 2 and Layer 3 configuration and validation, multicast features, security implementations, quality of service (QoS) settings, and integration of Aruba Networking solutions into existing environments.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>• Manage, Maintain, Optimize, and Monitor the Wired Network Solution: This part measures the skills of Network Operations Engineers in managing and maintaining wired network infrastructures. It includes developing configuration management strategies, interpreting network operational data to make informed decisions, and programmatically auditing or configuring Aruba Networking switches to optimize performance and reliability.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Troubleshoot the Wired Network Solution: Candidates in this section, typically Network Support Specialists, are tested on identifying common wired network failures such as IP or VLAN mismatches, hardware issues, or port misconfigurations. It also involves analyzing performance problems caused by QoS or configuration errors and formulating effective remediation plans to restore correct network operations.</li> </ul>

## HPE Aruba Networking Switching Professional Exam Sample Questions (Q279-Q284):

### NEW QUESTION # 279

After a recent firmware update, several Aruba switches in the network stopped responding. The administrator suspects a configuration corruption issue. What should be the first troubleshooting step?

Response:

- A. Disable spanning-tree on all switches
- B. Reinstall the firmware update immediately
- C. Restart the switches multiple times
- D. Restore the last working configuration from backup

**Answer: D**

### NEW QUESTION # 280

Your customer has an existing gateway cluster that they are using to tunnel traffic from APs and would like to configure the same for their CX switches. Which tunneling option should you recommend?

- A. IPSec
- B. UBT
- C. GRE
- D. VNBT

**Answer: B**

Explanation:

The customer wants to tunnel traffic from APs through CX switches, similar to what they currently do with a gateway cluster.

Aruba's User-Based Tunneling (UBT) is designed specifically for this use case. UBT allows traffic from wireless and wired clients to be tunneled to a centralized gateway or controller for policy enforcement and traffic inspection.

IPSec and GRE are general tunneling protocols but not Aruba's recommended solution for AP traffic.

VNBT relates to colorless ports and dynamic segmentation, not tunneling client traffic.

Thus, UBT is the correct tunneling solution for AP traffic through CX switches.

### NEW QUESTION # 281

Which Aruba CX switch series is best suited for high-speed aggregation and core deployments in large enterprises?

- A. Aruba CX 6200
- B. Aruba CX 8325
- C. Aruba CX 4100i

- D. Aruba CX 9300

**Answer: B**

Explanation:

The CX 9300 provides high-speed aggregation with deep packet buffering, VXLAN support, and 100GbE uplinks, making it ideal for large-scale enterprise core deployments.

### NEW QUESTION # 282

Based on the output, which Local Priority (LP) value will be applied to an incoming packet from interface 2/1/39 marked with DSCP 46 and CoS 7?

```
Access-1# show run | in dscp
qos trust dscp

Access-1# show run int 2/1/39
interface 2/1/39
 description Phone
 no shutdown
 vlan access 100
 qos trust none

Access-1# show qos cos-map
code_point local_priority color name
-----
0 1 green Best Effort
1 0 green Background
2 2 green Excellent Effort
3 3 green Critical Applications
4 4 green Video
5 5 green Voice
6 6 green Internetwork Control
7 7 green Network Control

Access-1# show qos dscp-map default
(some output has been removed for brevity)
```

DSCP	code_point	local_priority	cos	color	name
000000	0	1	green	CS0	
000001	1	0	green	CS1	
000010	10	0	green	AF10	
000011	11	0	yellow	AF11	
000110	10	0	red	AF12	
010000	10	2	green	VS	
010010	10	2	group	AF21	
010100	10	2	yellow	AF22	
010110	10	2	red	AF23	
011000	10	3	green	CS3	
011010	10	3	green	AF31	
011100	10	3	yellow	AF32	
011110	10	3	red	AF33	
100000	10	4	green	CS4	
100010	10	4	green	AF41	
100100	10	4	yellow	AF42	
100110	10	4	red	AF43	
101000	10	5	green	CS5	
101100	10	5	green	EF	
110000	10	6	green	CS6	
111000	10	7	green	CS7	

- A. Local Priority 1
- B. Local Priority 5
- C. Local Priority 7
- D. Local Priority 0

**Answer: A**

Explanation:

The Local Priority (LP) applied to an incoming packet marked with DSCP 46 and CoS 7 depends on the configured QoS mapping. DSCP 46 corresponds to Expedited Forwarding (EF), which is typically mapped to the highest priority.

CoS 7 also indicates high priority.

According to the QoS policy shown, the LP assigned is 1, indicating the highest priority level.

### NEW QUESTION # 283

A network engineer is setting up BGP on AOS-CX switches. The engineer is establishing two different eBGP peering's to two different service providers. The engineer has dozens of contiguous C-class public networks that need to be advertised to the two service providers. The engineer manually defines the networks to be advertised individually with the "network" command. How can an administrator advertise only a summarized route to the two service providers?

- A. Create a summarized route in OSPF
- B. Enable auto-summarization in the IPv4 address family of the BGP configuration
- C. Summarize the networks with the "aggregate-address" BGP command
- D. Create a summarized static route and redistribute this into OSPF

**Answer: C**

**NEW QUESTION # 284**

• • • • •

What you can get from the HPE7-A08 certification? Of course, you can get a lot of opportunities to enter to the bigger companies. After you get more opportunities, you can make full use of your talents. You will also get more salary, and then you can provide a better life for yourself and your family. HPE7-A08 Exam Preparation is really good helper on your life path. Quickly purchase HPE7-A08 study guide and go to the top of your life!
