The highly relevant content & best valid and useful 100-160 Exam Torrent will give you more confidence and help you pass easily.

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions

(Q234-Q239):

NEW QUESTION # 234

Which of the following is an example of a network vulnerability?

- A. Using a strong password
- B. Encrypting sensitive data
- C. Implementing a firewall
- D. **Running outdated and unpatched software**

Answer: D

Explanation:

Running outdated and unpatched software is an example of a network vulnerability. Software updates often include patches to fix security vulnerabilities that have been discovered. Failing to install these updates or using outdated software increases the risk of an attacker exploiting known vulnerabilities to gain unauthorized access or compromise the network.

NEW QUESTION # 235

Which of the following is a commonly used endpoint security solution?

- A. Firewall
- B. Intrusion Detection System (IDS)
- C. Encryption
- D. **Antivirus**

Answer: D

Explanation:

Antivirus software is a commonly used endpoint security solution that protects endpoints, such as computers and mobile devices, from malware and other malicious threats. It scans files and programs for known patterns and signature-based detections to identify and eliminate viruses, worms, Trojans, and other types of malware.

NEW QUESTION # 236

Which of the following activities is typically associated with reconnaissance in cybersecurity?

- A. Identifying vulnerable systems
- B. Exploiting vulnerabilities
- C. Preventing unauthorized access
- D. **Gathering information about the target network**

Answer: D

Explanation:

Reconnaissance in cybersecurity involves gathering information about the target network, such as IP addresses, open ports, and potential vulnerabilities. This information is used to prepare for a potential attack by understanding the target's infrastructure and weaknesses.

NEW QUESTION # 237

Which of the following best describes an incident handler's primary responsibility during the incident handling process?

- A. Implementing preventive measures to avoid future incidents
- B. Assessing the root cause of the incident
- C. Collecting evidence to support legal actions
- D. **Restoring affected systems to their normal operations**

Answer: D

Explanation:

The primary responsibility of an incident handler during the incident handling process is to restore affected systems to their normal operations. While collecting evidence, assessing the root cause, and implementing preventive measures are also important tasks, the immediate focus should be on reducing the impact of the incident and restoring normal functionality to minimize downtime and disruption.

NEW QUESTION # 238

Which of the following is NOT a component of an incident response policy?

- A. Roles and responsibilities
- B. Incident handling procedures
- **C. Backup and recovery processes**
- D. Escalation procedures

Answer: C

Explanation:

Backup and recovery processes are typically part of an organization's data backup and disaster recovery plan, which is separate from the incident response policy. The incident response policy focuses on defining roles, responsibilities, escalation procedures, and incident handling procedures for responding to cybersecurity incidents.

NEW QUESTION # 239

.....

Passing the 100-160 Exam is a challenging task, but with DumpsTests Cisco Practice Test engine, you can prepare yourself for success in one go. The 100-160 online practice test engine offers an interactive learning experience and includes Cisco 100-160 Practice Questions in a real 100-160 Exam scenario. This allows you to become familiar with the 100-160 exam format and identify your weak areas to improve them.
