

# How to Prepare for 1z0-1124-25 Certification Exam?

2026 Latest PDFVCE 1z0-1124-25 PDF Dumps and 1z0-1124-25 Exam Engine Free Share: <https://drive.google.com/open?id=1QWQ0fZHCI91ys881jTWe-UTybNxIPG1u>

Oracle certification can improve companies' competition, enlarge companies' business products line and boost IT staff constant learning. Many companies may choose 1z0-1124-25 valid exam study guide for staff while they are urgent to need one engineer with a useful certification so that they can get orders from this Oracle or get the management agency right. Our 1z0-1124-25 valid exam study guide will be the best valid choice for them.

As far as the 1z0-1124-25 practice test are concerned, these 1z0-1124-25 practice questions are designed and verified by the experience and qualified Oracle 1z0-1124-25 exam trainers. They work together and strive hard to maintain the top standard of 1z0-1124-25 exam practice questions all the time. So you rest assured that with the Oracle 1z0-1124-25 Exam Dumps you will ace your Oracle 1z0-1124-25 exam preparation and feel confident to solve all questions in the final Oracle 1z0-1124-25 exam.

>> Reliable 1z0-1124-25 Dumps Sheet <<

**Pass for Sure 1z0-1124-25 Exam Cram Materials: Oracle Cloud Infrastructure 2025 Networking Professional are the best dumps for testers - PDFVCE**

If you do not have access to internet most of the time, if you need to go somewhere is in an offline state, but you want to learn for your 1z0-1124-25 exam. Don not worry, our products will help you solve your problem. We deeply believe that our latest 1z0-1124-25 exam torrent will be very useful for you to strength your ability, pass your exam and get your certification. Our study materials with high quality and high pass rate in order to help you get out of your harassment. So, act now! Use our 1z0-1124-25 Quiz prep.

**Oracle Cloud Infrastructure 2025 Networking Professional Sample Questions (Q41-Q46):**

## NEW QUESTION # 41

You are troubleshooting an issue where legitimate users are occasionally blocked by your OCI WAF, which is configured in

"Detection" mode. You need to identify the specific WAF rules that are triggering these false positives and adjust them without disrupting legitimate traffic. Which approach offers the most efficient way to diagnose and resolve this issue?

- A. Whitelist the IP addresses of the affected users.
- B. Disable all WAF rules and then gradually re-enable them one by one until the issue reappears.
- C. Increase the sensitivity level of the entire WAF configuration.
- D. Analyze the OCI WAF logs in OCI Logging Analytics, focusing on the rule IDs associated with blocked requests. Then, move the specific rule to "log only".

**Answer: D**

Explanation:

- \* Problem Scope: Identify and adjust WAF rules causing false positives in Detection mode without disrupting traffic.
- \* Detection Mode Behavior: Logs potential violations without blocking, allowing analysis.
- \* Evaluate Options:
  - \* A: Use OCI Logging Analytics to pinpoint rule IDs from logs, then set rules to "log only" for testing; efficient and non-disruptive.
  - \* B: Disabling all rules risks security and is time-consuming, inefficient.
  - \* C: Increasing sensitivity worsens false positives; counterproductive.
  - \* D: Whitelisting IPs is a temporary fix, not scalable or diagnostic; unsuitable.
- \* Conclusion: Logging analysis with rule adjustment is the most efficient approach.

OCI WAF logs provide detailed insights for troubleshooting. The Oracle Networking Professional study guide states, "In Detection mode, WAF logs all triggered rules, which can be analyzed in OCI Logging Analytics to identify false positives. Rules can then be adjusted to 'log only' to refine policies without affecting traffic" (OCI Networking Documentation, Section: Web Application Firewall). This method ensures precision and minimal disruption.

#### NEW QUESTION # 42

You are designing a highly available web application in OCI. You've created a VCN with two public subnets across different Availability Domains (ADs). You need to enable IPv6 support for the application to cater to a growing number of IPv6-only clients. You plan to use a Load Balancer to distribute traffic to backend compute instances in the public subnets. Which of the following approaches ensures the highest level of resilience and IPv6 connectivity for your application?

- A. Configure the VCN with a public IPv6 CIDR block obtained from Oracle. Configure the Load Balancer to listen on both IPv4 and IPv6 addresses. Ensure the backend compute instances also listen on both IPv4 and IPv6 addresses.
  - B. Configure the VCN with a /48 IPv6 ULA prefix. Configure the Load Balancer to listen on IPv4 only, and the compute instances to listen on both IPv4 and IPv6, relying on NAT for IPv6 clients.
  - C. Configure the VCN with a public IPv6 CIDR block obtained from Oracle. Configure the Load Balancer to listen on IPv4 only, while backend compute instances listen on both IPv4 and IPv6, relying on NAT for IPv6 clients.
  - D. Configure the VCN with a /48 IPv6 ULA prefix. Configure the Load Balancer to listen on both IPv4 and IPv6 addresses. Ensure the backend compute instances also listen on both IPv4 and IPv6 addresses.
- Route traffic accordingly using NSGs.

**Answer: A**

#### NEW QUESTION # 43

In a multi-tier application architecture with separate public and private subnets, where should an OCI Bastion host be placed to provide secure access to resources in the private subnets without exposing them to the internet?

- A. In a dedicated public subnet specifically for Bastion hosts.
- B. In a separate VCN peered with the application VCN.
- C. Behind an Internet Gateway in the public subnet.
- D. Directly in the private subnet.

**Answer: A**

Explanation:

- \* Purpose: Secure access to private subnet resources via Bastion.
- \* Placement Considerations: Must be internet-accessible yet isolated.
- \* Evaluate Options:
  - \* A: Private subnet lacks internet access for Bastion; incorrect.

- \* B:Dedicated public subnet balances accessibility and isolation; correct.
- \* C:Separate VCN adds complexity, unnecessary; less optimal.
- \* D:Ambiguous phrasing, but implies exposure; less precise than B.
- \* Conclusion:Dedicated public subnet is the best placement.

OCI Bastion requires public access with security. The Oracle Networking Professional study guide notes, "Place the Bastion host in a public subnet with a dedicated configuration to allow secure SSH access to private subnet resources without exposing them directly" (OCI Networking Documentation, Section: Bastion Host Placement). Option B ensures this balance.

#### NEW QUESTION # 44

For a migration scenario where on-premises workloads need to access OCI Object Storage for large data transfers, and a dedicated, private connection is required, which OCI service best fulfills this need?

- A. Dynamic Routing Gateway (DRG) with Internet Gateway
- B. Internet Gateway with public IP addressing
- C. Service Gateway via Site-to-Site VPN
- D. **FastConnect Private Peering with a Service Gateway**

#### Answer: D

Explanation:

- \* Needs: Private, dedicated connection for large data transfers to Object Storage.
- \* Option A: VPN with Service Gateway uses public internet, limiting bandwidth-incorrect.
- \* Option B: Internet Gateway exposes traffic publicly-incorrect.
- \* Option C: FastConnect Private Peering provides a dedicated link, and Service Gateway ensures private Object Storage access-correct.
- \* Option D: DRG with Internet Gateway isn't private-incorrect.
- \* Conclusion: Option C best meets the need.

Oracle states:

\* "FastConnect Private Peering combined with a Service Gateway enables secure, high-bandwidth access to Object Storage from on-premises networks." This supports Option C. Reference:FastConnect and Service Gateway - Oracle Help Center([docs.oracle.com/en-us/iaas/Content/Network/Tasks/fastconnect.htm#servicegateway](https://docs.oracle.com/en-us/iaas/Content/Network/Tasks/fastconnect.htm#servicegateway)).

#### NEW QUESTION # 45

A development team has deployed a three-tier application in an OCI VCN. The application consists of a public-facing web tier, an application tier, and a database tier. The team reports that the web tier instances can communicate with the application tier instances, but the application tier instances cannot connect to the database tier instances. All security lists are configured to allow all traffic within the VCN. Which OCI Networking diagnostic tool would BEST help you quickly isolate the root cause of this connectivity issue?

- A. VCN Flow Logs
- B. Network Firewall
- C. **Connection Diagnostics**
- D. OCI Bastion

#### Answer: C

Explanation:

- \* Problem: App tier can't reach DB tier despite open security lists.
- \* Option A: Flow Logs show traffic details but require analysis, slowing diagnosis-less efficient.
- \* Option B: Connection Diagnostics tests connectivity (e.g., ping, traceroute) between resources, quickly pinpointing failures-correct.
- \* Option C: Network Firewall controls traffic, not diagnoses-incorrect.
- \* Option D: Bastion is for access, not troubleshooting-incorrect.
- \* Conclusion: Connection Diagnostics is the best tool for quick isolation.

Oracle states:

\* "Connection Diagnostics provides rapid testing of network connectivity between OCI resources, ideal for isolating issues like tier-to-tier failures." This validates Option B. Reference:Network Troubleshooting - Oracle Help Center([docs.oracle.com/en-us/iaas/Content/Network/Tasks](https://docs.oracle.com/en-us/iaas/Content/Network/Tasks)

/troubleshooting.htm#connectiondiagnostics).

## NEW QUESTION # 46

.....

If you want to find a good job, you must own good competences and skillful major knowledge. So owning the 1z0-1124-25 certification is necessary for you because we will provide the best 1z0-1124-25 study materials to you. Our 1z0-1124-25 exam torrent is of high quality and efficient, and it can help you pass the test successfully. For the 1z0-1124-25 training guide we provide with you is compiled by professionals elaborately and boosts varied versions which aimed to help you learn the 1z0-1124-25 study materials by the method which is convenient for you. And you can pass the exam with success guaranteed.

**1z0-1124-25 Latest Practice Questions:** <https://www.pdfvce.com/Oracle/1z0-1124-25-exam-pdf-dumps.html>

The feedback of our customers is enough to legitimize our claims on our 1z0-1124-25 exam questions, If you are a newcomer in career and want to get a 1z0-1124-25 certification for apply good positions our 1z0-1124-25 test questions and dumps can help you, We offer the best valid 1z0-1124-25 latest study questions for every IT candidates, The product of PDFVCE is available in Oracle 1z0-1124-25 PDF, EXAM CODE desktop practice exam software, and web-based Oracle Cloud Infrastructure 2025 Networking Professional (1z0-1124-25) practice test.

Using the Load External Movieclip Behavior, see the Warning Tip on the previous page) Save those width profiles, The feedback of our customers is enough to legitimize our claims on our 1z0-1124-25 Exam Questions.

## Highly-demanded 1z0-1124-25 Exam Braindumps demonstrate excellent Learning Questions - PDFVCE

If you are a newcomer in career and want to get a 1z0-1124-25 certification for apply good positions our 1z0-1124-25 test questions and dumps can help you, We offer the best valid 1z0-1124-25 latest study questions for every IT candidates.

The product of PDFVCE is available in Oracle 1z0-1124-25 PDF, EXAM CODE desktop practice exam software, and web-based Oracle Cloud Infrastructure 2025 Networking Professional (1z0-1124-25) practice test.

Choosing our 1z0-1124-25 exam practice, you only need to spend 20-30 hours to prepare for the exam.
