Our company is a multinational company with sales and after-sale service of CDCP exam torrent compiling departments throughout the world. In addition, our company has become the top-notch one in the fields, therefore, if you are preparing for the exam in order to get the related certification, then the Certified Data Centre Professional (CDCP) exam question compiled by our company is your solid choice. All employees worldwide in our company operate under a common mission: to be the best global supplier of electronic CDCP Exam Torrent for our customers through product innovation and enhancement of customers' satisfaction. Wherever you are in the world we will provide you with the most useful and effectively CDCP guide torrent in this website, which will help you to pass the exam as well as getting the related certification with a great ease.

The actual Certified Data Centre Professional (CDCP) (CDCP) exam environment that the practice exam creates is beneficial to counter Certified Data Centre Professional (CDCP) (CDCP) exam anxiety. Tracking and reporting features of this CDCP practice test enables you to assess and enhance your progress. The third format of Braindumpsqa product is the desktop Certified Data Centre Professional (CDCP) (CDCP) practice exam software. It is an ideal format for those users who don't have access to the internet all the time. After installing the software on Windows computers, one will not require the internet. The desktop CDCP practice test software specifies the web-based version.

**Valid EXIN CDCP Test Prep, CDCP New Study Notes**

It is a common sense that in terms of a kind of CDCP test torrent, the pass rate would be the best advertisement, since only the pass rate can be the most powerful evidence to show whether the CDCP guide torrent is effective and useful or not. We are so proud to tell you that according to the statistics from the feedback of all of our customers, the pass rate of our CDCP Exam Questions among our customers who prepared for the exam under the guidance of our CDCP test torrent has reached as high as 98% to 100%.

## EXIN CDCP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Auxiliary Systems: The topic covers water leak detection systems, data centre monitoring requirements, EMS, BMS and DCIM.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Raised Floor</li> <li>Suspended Ceiling: The topic discusses applicable standards, signal reference grid, and disability act and regulations.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Physical Security and Safety: Sub-topics are about physical security considerations and physical safety considerations.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Fire Safety</li> <li>Protection: This topic gives an understanding of standards for fire suppression, detection systems, total flooding fire suppression techniques, and handheld extinguishers. Additionally, it covers Signage and safety.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Electro Magnetic Fields: The topic deals with effects of EMF on human health and equipment (H)EMP, standards, and EMF shielding solutions.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Equipment Racks: It discusses power rail</li> <li>strip options, security considerations, and rack standards, properties and selection criteria.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Designing a Scalable Network Infrastructure: It covers ANSI</li> <li>TIA-942 cabling hierarchy, network redundancy, structured Cabling System, and planning considerations.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>Power Infrastructure: It focuses ATS and STS systems, redundancy levels and techniques, static and dynamic UPS systems, battery types, thermo-graphics, and renewable energy factor (REF).</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>Data Centre Location, Building and Construction: It focuses on appropriate sites and components of an effective data centre and supporting facilities setup.</li> </ul>

## EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q66-Q71):

### NEW QUESTION # 66

The expected time to Recover/Repair from a system from a failure is defined as.

- A. MLBF
- B. MTBF
- C. MCBF
- D. MTTR**

### Answer: D

Explanation:

The expected time to recover or repair from a system from a failure is defined as MTTR (mean time to recovery or mean time to repair). MTTR is the average time it takes to restore a system or product to its normal operation after a failure. MTTR includes the time spent on detecting, diagnosing, and fixing the problem. MTTR is an important metric for measuring the reliability and availability of a system or product, as well as the efficiency and effectiveness of the incident management process. A lower MTTR indicates a faster and more reliable recovery or repair process.

### NEW QUESTION # 67

Escape route signage should be placed where?

- A. Only at the main entrance of the data centre building
- B. Only at emergency escape doors
- C. At every door including riser doors, doors of storage closets etc.
- D. **At every door providing a pathway**

**Answer: D**

Explanation:

Escape route signage should be placed at every door providing a pathway to the exit or the assembly area, according to the CDCP Preparation Guide<sup>1</sup> and the EU Safety/Health Signs Directive<sup>2</sup>. Escape route signage is used to guide the occupants of the data centre from wherever they are in the building, via a place of relative safety (the escape route), to the place of ultimate safety (the assembly area). Escape route signage should not be limited to only emergency escape doors or the main entrance of the data centre building, as these may not be accessible or visible from all locations. Escape route signage should also not include doors that do not lead to the exit or the assembly area, such as riser doors, doors of storage closets, or doors of other rooms, as these may confuse or mislead the occupants. Escape route signage should be placed at every door that provides a pathway to the exit or the assembly area, and should indicate the direction and distance of the escape route using pictograms, arrows, and words. Escape route signage should also be designed and installed in accordance with the relevant standards and codes, such as BS 5499 and ISO 7010.

### NEW QUESTION # 68

Which Class of Fires involves ordinary combustible materials such as paper, wood and cloth?

- A. Class K
- B. Class B
- C. Class D
- D. **Class A**

**Answer: D**

Explanation:

According to the CDCP Preparation Guide, Class A fires involve ordinary combustible materials such as paper, wood and cloth. These materials leave behind ash or embers when they burn. Class A fires can be extinguished by water or other cooling agents that reduce the temperature of the fuel below its ignition point.

### NEW QUESTION # 69

Which one of the following is a Natural Disaster?

- A. **Hurricanes**
- B. Blackouts
- C. Human Error
- D. Grid Failure

**Answer: A**

Explanation:

According to the CDCP® Preparation Guide, a natural disaster is a catastrophic event that is caused by natural forces and has a significant impact on human lives, property, and environment. Hurricanes are examples of natural disasters, as they are powerful storms that form over warm ocean waters and produce strong winds, heavy rain, storm surges, and flooding. Grid failure, blackouts, and human error are not natural disasters, but rather man-made or technological disasters that result from failures or errors in human

systems or activities.

## NEW QUESTION # 70

What is the main risk for a data centre when the water supply fails?

- A. Failure to the water supply could result in IT failure and/or denial of access to operate.
- B. Failure to the water supply could result in DX cooling systems to fail.
- C. Failure to the water supply could result in sudden changes of the relative humidity in the Computer room.
- D. Failure to the water supply could cause issues for the cooling of back-up generators.

**Answer: D**

### Explanation:

Back-up generators are essential for providing power to the data centre in case of a utility outage. However, back-up generators also generate a lot of heat, which needs to be dissipated by a cooling system. The cooling system may rely on water supply, either from the municipal network or from a dedicated tank. If the water supply fails, the cooling system may not function properly, leading to overheating and potential damage to the generators. This could compromise the reliability and availability of the data centre power supply and cause downtime or data loss.
