Analytics-DA-201 Vce Torrent - New Analytics-DA-201 Test Test

There are many users who worry that if they fail to pass the exam after purchasing our Analytics-DA-201 latest exam torrents, the money will be wasted, and the cost of the test seems too great to be worth. The Analytics-DA-201 exam questions in order to let users do not have such concerns, solemnly promise all users who purchase the Analytics-DA-201 latest exam torrents, the user after failed in the exam as long as to provide the corresponding certificate and failure scores scanning or screenshots of Analytics-DA-201 Exam, we immediately give money refund to the user, and the process is simple, does not require users to wait too long a time. Of course, if you have any other questions, users can contact the customer service of Analytics-DA-201 test torrent online at any time, they will solve questions as soon as possible for the users, let users enjoy the high quality and efficiency refund services.

Salesforce Certified Tableau Data Analyst Sample Questions (Q116-Q121):

NEW QUESTION # 116

You have a blank dashboard.

You want to add two sheets to the dashboard. The sheets must support the Show/Hide button.

To which two objects can you add the sheets? (Click the two appropriate Options in the Answer Area.)

Answer:

Explanation:

To add two sheets to the dashboard that support the Show/Hide button, you can add them to either a horizontal or a vertical container. A container is an object that can hold one or more sheets or other objects and allow you to arrange them in a layout. A Show/Hide button is a feature that lets you hide or show a container and its contents on the dashboard. You can add a Show/Hide button to any container, whether it is tiled or floating, by using the drop-down menu of the container and selecting "Add Show/Hide Button." You can also customize the appearance and behavior of the button.

To add a horizontal or a vertical container to the dashboard, you can drag them from the Objects pane to the dashboard. A horizontal container will arrange the sheets or objects horizontally, while a vertical container will arrange them vertically. You can then drag the sheets you want to add from the Sheets pane to the container. You can resize and reorder the sheets or objects within the container by using the handles and arrows.

The other objects in the Answer Area, such as text, image, web page, blank, navigation, download, and extension, do not support the Show/Hide button. They are either static elements that cannot hold other objects, or dynamic elements that require user interaction or external sources. You can add them to the dashboard as well, but they will not have the same functionality as a container with a Show/Hide button.

Layout Containers - Tableau

NEW QUESTION # 117

A Data Analyst would like to receive the draft results of a colleague's Tableau Prep flow to start work on a dashboard before it has been published.

What should the analyst do to accomplish this?

- A. Have the colleague output the results of the flow to a .hyper file. On the Tableau Desktop Connect page, under To a File, choose "More ...", and browse for the .hyper file on the local file system.
- B. Have the colleague output the results of the flow to a .hyper file. Create a new workbook in Tableau Cloud, choose Files on the Connect to Data page, and upload the .hyper file from the computer.
- C. Open Tableau Desktop and make a connection to Tableau Prep, then choose the colleague's flow that the analyst wants to connect to.
- D. On the Tableau Desktop Connect page, under To a File, choose "More ...", and browse for the colleague's .tf file on the local file system.

Answer: A

NEW QUESTION # 118

You have the following dataset:

□ Which grouping option should you use in Tableau Prep to group all five names automatically?

- A. Pronunciation
- B. Manual Selection
- C. Spelling

- **D. Common Characters**

Answer: D

Explanation:

Common Characters: Find and group values that have letters or numbers in common. This option uses the ngram fingerprint algorithm that indexes words by their unique characters after removing punctuation, duplicates, and whitespace. This algorithm works for any supported language. This option isn't available for data roles. For example, this algorithm would match names that are represented as "John Smith" and "Smith, John" because they both generate the key "hijmno". Since this algorithm doesn't consider pronunciation, the value "Tom Jhinois" would have the same key "hijmno" and would also be included in the group.

NEW QUESTION # 119

You are creating an annual report in Microsoft Word.
In Tableau Desktop, you build a chart in a worksheet.
You want to create an image of the chart that you can add to the annual report.
What are two ways to create the image? Choose two.

- A. From the File menu, use the Export As Version option.
- **B. From the Worksheet menu, use the Copy option.**
- C. From the Dashboard menu, use the Copy Image option.
- **D. From the Worksheet menu, use the Export option.**
- E. From the Dashboard menu, use the Export Image option.

Answer: B,D

Explanation:

To create an image of the chart that you can add to the annual report, you can use either the Export option or the Copy option from the Worksheet menu. The Export option will allow you to save the image as a file in a specified location, name, and format. The Copy option will allow you to copy the image to the clipboard and paste it into another application, such as Microsoft Word. Both options will let you choose which elements to include in the image, such as title, caption, legend, etc. References:

* Export Views from Tableau Desktop to Another Application

* Copy and Paste Views from Tableau Desktop to Another Application

NEW QUESTION # 120

A Data Analyst is creating a new dashboard.
The analyst needs to add a button to the dashboard that allows users to export the dashboard as an image.
Which type of object should the analyst use?

- A. Extension
- **B. Download**
- C. Navigation
- D. Image

Answer: B

NEW QUESTION # 121
