By updating the study system of the C-ACDET-2506 study materials, we can guarantee that our company can provide the newest information about the exam for all people. We believe that getting the newest information about the exam will help all customers pass the C-ACDET-2506 Exam easily. If you purchase our study materials, you will have the opportunity to get the newest information about the C-ACDET-2506 exam. More importantly, the updating system of our company is free for all customers.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

Topic 2	<ul style="list-style-type: none"> • Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 3	<ul style="list-style-type: none"> • Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

Here, the Pass4training empathizes with them for the extreme frustration they undergo due to not finding updated and actual SAP C-ACDET-2506 exam dumps. It helps them by providing the exceptional SAP C-ACDET-2506 Questions to get the prestigious SAP C-ACDET-2506 certificate.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q44-Q49):

NEW QUESTION # 44

Who leads Suite Integration activities?

- A. Partner/Customer Functional Lead
- **B. SAP Deployment Lead**
- C. Customer Success Manager
- D. SAP Support

Answer: B

Explanation:

The SAP Deployment Lead is responsible for leading Suite Integration activities across SAP Ariba solutions.

This role acts as the primary coordinator and facilitator for integration efforts, ensuring smooth data flow, process alignment, and technical synchronization between sourcing, procurement, contracts, and other modules in the Ariba suite. The Deployment Lead works closely with the customer's functional teams, partners, and technical specialists to manage integration scope, timelines, and troubleshooting.

SAP Support typically provides post-go-live assistance but does not lead integration planning. Functional leads focus on configuration and business processes but lack overarching integration responsibility. Customer Success Managers focus on adoption and satisfaction rather than technical integration.

Therefore, the Deployment Lead role is critical for coordinating complex multi-solution projects and ensuring a unified suite experience.

NEW QUESTION # 45

A customer requests a dynamic list from CSV.

Which field type supports that?

- A. Single-Select Enum
- B. Computed Field
- **C. Flex Master Data-based field**
- D. Hyperlink

Answer: C

NEW QUESTION # 46

Which of the following applies in a greenfield deployment scenario when migrating configurations from your test site?

- A. You can revert migrated configurations from the target site.
- B. You cannot make other configuration updates in ICM when a migration operation is in progress.
- C. The status changes to Complete when migration is finished.
- D. If any configuration type fails during the migration process, you cannot create a new migration request.

Answer: B,C

NEW QUESTION # 47

What system is provided by SAP free of charge and provides an outline of how to deploy SAP Ariba solutions with a task list and project management format?

- A. SAP Cloud Application Lifecycle Management
- B. SAP for Me
- C. SAP Cloud Project Studio
- D. SAP Ariba Enablement Workbook

Answer: D

Explanation:

The SAP Ariba Enablement Workbook is an Excel-based project management tool provided free by SAP to assist customers and implementation partners in deploying SAP Ariba solutions. It contains detailed task lists, timelines, and activities aligned to the SAP Activate methodology and is designed to guide project teams through deployment steps such as data collection, configuration, and testing. Other options like SAP for Me are customer portals, not deployment tools, and SAP Cloud Application Lifecycle Management is a broader lifecycle tool not focused specifically on Ariba deployments.

NEW QUESTION # 48

You can choose multiple field configurations and migrate them to the production site by creating a package in your test site. Which of the following steps should be included? (Select 3 correct answers)

- A. Discard any other packages that appear in My Action Items.
- B. Publish the form template within the test site in order to add the form fields in the package.
- C. If you are migrating fields that are associated with enumerations, you should load those enumerations in the production site before migrating the fields.
- D. Make sure you update the string resource files in the production site before migrating the corresponding configurations from test to production site.
- E. The Flex Master Data (FMD) templates must be defined and their data should be loaded in the production site before migrating FMD custom fields.

Answer: C,D,E

Explanation:

When migrating field configurations in SAP Ariba, it's essential to prepare all dependent components to avoid migration errors.

* Enumerations (B): These must be imported into Production before migrating fields that reference them, since the fields depend on the enumerated values to validate configurations.

* String Resource Files (C): These contain translations and label customizations. They should be uploaded and updated in Production first to ensure that migrated fields have the proper localized text.

* Flex Master Data (E): Since fields referencing FMD templates rely on these data structures, the templates and their associated data must exist in Production before migrating the fields that depend on them. Discarding unrelated packages (A) or publishing form templates (D) is unrelated or unnecessary for field migration workflows; fields and forms are handled separately. SAP best practices emphasize preparing all referenced master data and resource files to ensure smooth and error-free field migration.

NEW QUESTION # 49

.....

We all harness talents with professional skills. Mastering the certificate of the C-ACDET-2506 practice exam is essential for you. With all instability of the society, those knowledge and profession certificate mean a lot for you. So it is unquestionable the C-ACDET-2506 learning questions of ours can do a big favor. And we have become the most popular exam braindumps provider in this career and supported by numerous of our loyal customers. You will be satisfied with our C-ACDET-2506 study guide as well.
