Dynatrace-Associate Test Passing Score - New Dynatrace-Associate Test Camp

Dynatrace certification is very helpful, especially the Dynatrace-Associate which is recognized as a valid qualification in this industry. So far, Dynatrace-Associate free download pdf has been the popular study material many candidates prefer. Dynatrace-Associate questions & answers can assist you to make a detail study plan with the comprehensive and detail knowledge. Besides, we have money refund policy to ensure your interest in case of your failure in Dynatrace-Associate Actual Test. Additional, if you have any needs and questions about the Dynatrace test dump, our 24/7 will always be here to answer you.

Dynatrace Associate Certification Exam Sample Questions (Q36-Q41):

NEW QUESTION # 36

A developer wants to know how long it took for their application to load a specific resource request as a part of a button being clicked. What tool would be appropriate to find this information?

- A. Waterfall analysis
- B. The "Web" application
- C. User action analysis
- D. User Session Query Language

Answer: A

Explanation:

Waterfall analysis provides a detailed breakdown of all resource requests triggered by a user action, including timing for each request.

It allows developers to:

* See exactly how long each resource takes to load

- * Analyze dependencies between requests
- * Identify bottlenecks in frontend performance

This is especially useful for analyzing resource loading triggered by actions such as button clicks.

Other options:

- * Web application view provides overview data
- * User Session Query Language is for querying session data
- * User action analysis provides aggregated insights, not detailed request timing Reference: Based on official Dynatrace University training materials covering Real User Monitoring and waterfall analysis.

NEW QUESTION # 37

Which Dashboard Tiles visualize the status of your entities using Red and Green Hexagons?

- A. Service health
- B. Web applications
- C. Synthetic monitor health
- D. Problems
- E. Application health

Answer: A,E

Explanation:

Dynatrace uses hexagon-style health tiles with green and red indicators to visualize the health status of monitored entities.

These are specifically used in:

- * Service health tiles - showing health of services
- * Application health tiles - showing overall application health

These tiles provide a quick visual overview of system health using color-coded hexagons.

Other options:

- * Synthetic monitor health uses different visualization styles
- * Web applications is not a tile type
- * Problems shows problem cards, not hexagon visualization

Reference: Based on official Dynatrace University training materials covering dashboards and visualization types.

NEW QUESTION # 38

Which steps outline the Business Event Dataflow? (Select all that apply)

- A. Analyze
- B. Capture
- C. Process
- D. Export

Answer: A,B,C

Explanation:

The Business Event Dataflow in Dynatrace follows a structured pipeline that focuses on collecting, handling, and analyzing business events:

- * Capture - Business events are ingested into Dynatrace from various sources such as applications, APIs, or external systems
- * Process - The captured data is processed, enriched, and stored within the Dynatrace platform (Grail)
- * Analyze - Users query and analyze the processed data using tools like dashboards and DQL Export is not considered a core step in the business event dataflow. While exporting data is possible, it is not part of the primary ingestion-to-analysis pipeline defined in Dynatrace.

Reference: Based on official Dynatrace University training materials covering Business Analytics and Grail data flow.

NEW QUESTION # 39

Credential vault stores sensitive information for which Dynatrace capabilities?

- A. Dynatrace Apps
- B. Synthetic HTTP monitors

- C. Dynatrace Extensions v2
- D. Synthetic Browser monitors
- E. Dynatrace API

Answer: B,C,D

Explanation:

The Credential Vault in Dynatrace is used to securely store sensitive data such as usernames, passwords, and tokens for capabilities that require authentication.

It is used by:

- * Synthetic Browser monitors for login simulations and scripted interactions
- * Synthetic HTTP monitors for authenticated API testing
- * Dynatrace Extensions v2 for connecting to external systems that require credentials Other options are not applicable:
- * Dynatrace API uses tokens but not stored via Credential Vault in this context
- * Dynatrace Apps do not rely on Credential Vault for authentication storage This ensures secure handling of credentials without exposing them in plain text.

Reference: Based on official Dynatrace University training materials covering Credential Vault usage.

NEW QUESTION # 40

Which of the following is the default threshold type used for anomaly detection on Hosts (CPU saturation, memory saturation, disk utilization...)?

- A. Static Thresholds
- B. Impact Analysis
- C. Integrations
- D. Automated Multi-Dimensional Baselineing

Answer: D

Explanation:

Dynatrace uses Automated Multi-Dimensional Baselineing as the default anomaly detection method for host metrics such as CPU, memory, and disk utilization.

This approach:

- * Automatically learns normal behavior patterns over time
- * Adjusts thresholds dynamically based on historical data
- * Considers multiple dimensions such as time of day and workload patterns This allows Dynatrace to detect anomalies more accurately compared to fixed thresholds.

Static thresholds are manually defined and not the default.

Other options are unrelated to anomaly detection mechanisms.

Reference: Based on official Dynatrace University training materials covering anomaly detection and Davis AI.

NEW QUESTION # 41

.....

ActualTestsQuiz is the website that provides all candidates with IT certification exam dumps and can help all candidates pass their exam with ease. ActualTestsQuiz IT expert edits all-time exam materials together on the basis of flexibly using the experiences of forefathers, thereby writing the best Dynatrace Dynatrace-Associate Certification Training dumps. The exam dumps include all questions that can appear in the real exam. So it can guarantee you must pass your exam at the first time.
