200-201 Learning Materials & 200-201 Study guide & 200-201 Reliable

Dumps

We strongly recommend using our Cisco 200-201 exam dumps to prepare for the Cisco 200-201 certification. It is the best way to ensure success. With our Cisco 200-201 practice questions, you can get the most out of your studying and maximize your chances of passing your Cisco 200-201 Exam. TestKingIT Cisco 200-201 practice test software is the answer if you want to score higher in the Cisco 200-201 exam and achieve your academic goals.

Cisco Understanding Cisco Cybersecurity Operations Fundamentals Sample Questions (Q76-Q81):

NEW QUESTION # 76

Refer to the exhibit.

Which event is occurring?

- A. A binary named "submit" is running on VM cuckoo1.
- B. A URL is being evaluated to see if it has a malicious binary
- C. A binary is being submitted to run on VM cuckoo1
- **D. A binary on VM cuckoo1 is being submitted for evaluation**

Answer: D

NEW QUESTION # 77

Refer to the exhibit.

Refer to the exhibit. An engineer must map these events to the source technology that generated the event logs. To which technology do the generated logs belong?

- **A. IPS**
- B. antivirus
- C. proxy
- D. firewall

Answer: A

NEW QUESTION # 78

Syslog collecting software is installed on the server. For the log containment, a disk with FAT type partition is used. An engineer determined that log files are being corrupted when the 4 GB file size is exceeded. Which action resolves the issue?

- A. Add space to the existing partition and lower the retention period.
- B. Use NTFS partition for log file containment
- **C. Use FAT32 to exceed the limit of 4 GB.**
- D. Use the Ext4 partition because it can hold files up to 16 TB.

Answer: C

Explanation:

FAT is a file system that organizes and stores data on a disk. However, FAT has a limitation of 4 GB for the maximum file size, which means that any file larger than that will be corrupted. To resolve this issue, the engineer can use FAT32, which is an improved version of FAT that supports files up to 32 GB. Alternatively, the engineer can use other file systems that have higher file size limits, such as Ext4 or NTFS. NEW QUESTION # 79

How does statistical detection differ from rule-based detection?

- A. Statistical detection involves the evaluation of events, and rule-based detection requires an evaluated set of events to function.

- B. legitimate data over a period of time, and statistical detection works on a predefined set of rules
- C. Rule-based detection involves the evaluation of events, and statistical detection requires an evaluated set of events to function Rule-based detection defines
- D. Statistical detection defines legitimate data over time, and rule-based detection works on a predefined set of rules

Answer: D

Explanation:

Statistical detection relies on analyzing data over time to identify patterns and anomalies, without predefined rules. It uses algorithms and statistical models to determine normal behavior and identify deviations.

Rule-based detection uses predefined rules or patterns to identify known threats or vulnerabilities, often based on signatures or behaviors associated with specific attacks.

NEW QUESTION # 80

Refer to the exhibit.

What information is depicted?

- A. network discovery event
- B. IIS data
- C. IPS event data
- D. NetFlow data

Answer: D

NEW QUESTION # 81

.....

The second format TestKingIT also has a product support team available every time to help you out in any terms. And they will fix all of your problems on time. provides its users to study for Prepare for your Understanding Cisco Cybersecurity Operations Fundamentals (200-201) exam is web-based practice exam. This format has all the features of desktop practice exam software for Cisco 200-201 exam preparation.
