

Exam PRINCE2-Agile-Foundation Simulator & PRINCE2-Agile-Foundation Real Brain Dumps

BONUS!!! Download part of VerifiedDumps PRINCE2-Agile-Foundation dumps for free: https://drive.google.com/open?id=19v9WuUDsSicHulh3M_QpF9_nJ5-KdNao

With VerifiedDumps's PRINCE2 PRINCE2-Agile-Foundation Exam Training materials you can pass the PRINCE2 PRINCE2-Agile-Foundation exam easily. The training tools which designed by our website can help you pass the exam the first time. You only need to download the VerifiedDumps PRINCE2 PRINCE2-Agile-Foundation exam training materials, namely questions and answers, the exam will become very easy. VerifiedDumps guarantee that you will be able to pass the exam. If you are still hesitant, download our sample of material, then you can know the effect. Do not hesitate, add the exam material to your shopping cart quickly. If you miss it you will regret for a lifetime.

PRINCE2 Agile Foundation certification is recognized globally and is highly valued by organizations seeking to improve their project management practices. It serves as a proof of competence in agile project management methodology and can help candidates stand out in a highly competitive job market. Additionally, this certification can increase the chances of project managers being hired by organizations that adhere to PRINCE2 agile methodology standards.

PRINCE2 Agile Foundation Exam is aimed at individuals who want to learn about the PRINCE2 Agile methodology and how it can be applied in project management. It is an entry-level exam that tests the basic knowledge of the methodology, including the principles, themes, and processes. It is also a prerequisite for the PRINCE2 Agile Practitioner Exam, which is the next level of certification.

Pass Guaranteed Quiz PRINCE2 - Useful PRINCE2-Agile-Foundation - Exam PRINCE2 Agile Foundation Simulator

Candidates who participate in the PRINCE2 practice exam should first choose our latest braindumps pdf. It will help you pass test with 100% guaranteed. Besides, our PRINCE2-Agile-Foundation exam prep can help you fit the atmosphere of actual test in advance, which enable you to improve your ability with minimum time spent on PRINCE2-Agile-Foundation Dumps PDF and maximum knowledge gained.

PRINCE2 Agile Foundation certification is ideal for project managers, team members, and anyone involved in project management. PRINCE2 Agile Foundation certification provides a comprehensive understanding of how to manage projects in an agile environment, while still adhering to the principles of PRINCE2 methodology. It is also suitable for individuals who want to expand their knowledge and skills in project management.

PRINCE2 Agile Foundation Sample Questions (Q40-Q45):

NEW QUESTION # 40

Which artifact is used to describe the project's major products in the form of epic user stories?

- A. Release map
- **B. Project backlog**
- C. Project dashboard
- D. Product backlog

Answer: B

Explanation:

The Project Backlog is the artifact used to describe the project's major products in the form of epic user stories. Epic stories are large, high-level user stories that capture significant features or product components that may later be decomposed into smaller, more detailed user stories in the product backlog.

The Project Backlog provides a strategic view of what the project intends to deliver and supports planning at the project level, including releases and stages. It bridges the gap between business requirements and team-level delivery.

The Product Backlog (C) contains detailed user stories ready for development but is typically more granular.

The Release Map (B) plans releases and iterations but does not list epic stories. The Project Dashboard (A) is a reporting tool, not a repository of requirements.

The use of epic user stories in the project backlog aligns with agile practices for managing scope and enables incremental delivery aligned with business priorities.

Reference: PRINCE2 Agile Foundation Version 2, Section 5.4 "Backlogs and Epics," and PRINCE2 Agile Study Guide, Chapter 5.

NEW QUESTION # 41

In which workshop are the project role descriptions created?

- **A. Starting-up workshop**
- B. Project canvas workshop
- C. Project kickoff workshop
- D. Project initiation workshop

Answer: A

Explanation:

The starting-up workshop is the initial workshop where the foundation for the project is established, including the creation and clarification of project role descriptions. Defining roles early ensures clarity of responsibilities, helps establish governance, and sets expectations for the project team.

Kickoff (B) focuses on launching the project, initiation (C) develops detailed plans, and the project canvas (D) is a tool for capturing high-level information but does not define roles explicitly.

NEW QUESTION # 42

Which of the following is a prioritized list of the requirements for a product?

- A. Release map
- B. Project canvas
- **C. Backlog**
- D. Project log

Answer: C

Explanation:

In PRINCE2 Agile, a Backlog is the prioritized list of requirements, features, or user stories that define what needs to be delivered for a product. It is a dynamic and evolving list that is continually refined and re-prioritized to ensure the most valuable work is done first. The backlog acts as a single source of truth for what the team needs to deliver and provides transparency to stakeholders regarding progress and priorities. It aligns with agile principles and practices such as Scrum, where the Product Backlog contains all desired work for the product.

The Project Canvas is a high-level tool used for defining project scope and objectives, the Release Map plans releases and iterations, and the Project Log tracks issues, risks, and actions but does not list prioritized requirements.

NEW QUESTION # 43

According to PRINCE2 Agile, which form of communication shows that a team is vibrant and interactive?

- A. Using visualization to display information
- B. Using email to document discussions
- C. Using social media to reach more people
- D. Using meeting minutes to share decisions

Answer: A

Explanation:

NEW QUESTION # 44

What is the purpose of the 'progress' practice?

- A. To identify the user needs and requirements
- B. To identify and assess opportunities and threats
- C. To provide a forecast for the project's viability
- D. To establish accountability for the project

Answer: C

Explanation:

The Progress practice in PRINCE2 Agile is focused on providing a forecast of the project's viability by monitoring actual progress against plans and predicting future performance. It ensures that decisions can be made based on current status and trends, enabling timely interventions if necessary.

This practice involves collecting progress data, reviewing milestones, updating forecasts, and communicating status to stakeholders. Forecasting viability includes assessing whether the project remains aligned with business justification and expected benefits. While opportunities and threats are part of risk management (B), user needs belong to requirements management (C), and accountability is a broader governance concern (D), progress specifically deals with tracking and forecasting delivery status. The practice combines traditional PRINCE2 stage controls with agile iterative reviews, providing an integrated view of progress.
