

Fantastic Customized Professional-Cloud-Security-Engineer Lab Simulation - 100% Pass Professional-Cloud-Security-Engineer Exam

BONUS!!! Download part of Itcertkey Professional-Cloud-Security-Engineer dumps for free: <https://drive.google.com/open?id=1Uu3-EvQcTpDsPqCOJ6Uny-7mYXOVQTKg>

Nowadays, flexible study methods become more and more popular with the development of the electronic products. The latest technologies have been applied to our Professional-Cloud-Security-Engineer actual exam as well since we are at the most leading position in this field. Besides, you have varied choices for there are three versions of our Professional-Cloud-Security-Engineer practice materials. At the same time, you are bound to pass the Professional-Cloud-Security-Engineer exam and get your desired Professional-Cloud-Security-Engineer certification for the validity and accuracy of our Professional-Cloud-Security-Engineer study materials.

We all harness talents with professional skills. Mastering the certificate of the Professional-Cloud-Security-Engineer practice exam is essential for you. With all instability of the society, those knowledge and profession certificate mean a lot for you. So it is unquestionable the Professional-Cloud-Security-Engineer learning questions of ours can do a big favor. And we have become the most popular exam braindumps provider in this career and supported by numerous of our loyal customers. You will be satisfied with

our Professional-Cloud-Security-Engineer study guide as well.

Exam Professional-Cloud-Security-Engineer Dump & Professional-Cloud-Security-Engineer Examcollection Vce

Now you do not need to worry about the relevancy and top standard of Itcertkey Google Cloud Certified - Professional Cloud Security Engineer Exam (Professional-Cloud-Security-Engineer) exam questions. These Google Professional-Cloud-Security-Engineer dumps are designed and verified by qualified Professional-Cloud-Security-Engineer exam trainers. Now you can trust Itcertkey Google Professional-Cloud-Security-Engineer Practice Questions and start preparation without wasting further time. With the Professional-Cloud-Security-Engineer exam questions you will get everything that you need to learn, prepare and pass the challenging Professional-Cloud-Security-Engineer exam with good scores.

Google Cloud Certified - Professional Cloud Security Engineer Exam Sample Questions (Q73-Q78):

NEW QUESTION # 73

Your organization uses Google Workspace Enterprise Edition for authentication. You are concerned about employees leaving their laptops unattended for extended periods of time after authenticating into Google Cloud. You must prevent malicious people from using an employee's unattended laptop to modify their environment.

What should you do?

- A. Review and disable unnecessary Google Cloud APIs.
- B. Require strong passwords and 2SV through a security token or Google authenticator.
- **C. Set the session length timeout for Google Cloud services to a shorter duration.**
- D. Create a policy that requires employees to not leave their sessions open for long durations.

Answer: C

NEW QUESTION # 74

You need to implement an encryption-at-rest strategy that protects sensitive data and reduces key management complexity for non-sensitive data. Your solution has the following requirements:

Schedule key rotation for sensitive data.

Control which region the encryption keys for sensitive data are stored in.

Minimize the latency to access encryption keys for both sensitive and non-sensitive data.

What should you do?

- A. Encrypt non-sensitive data and sensitive data with Cloud Key Management Service.
- B. Encrypt non-sensitive data with Google default encryption, and encrypt sensitive data with Cloud External Key Manager.
- **C. Encrypt non-sensitive data with Google default encryption, and encrypt sensitive data with Cloud Key Management Service.**
- D. Encrypt non-sensitive data and sensitive data with Cloud External Key Manager.

Answer: C

Explanation:

Google uses a common cryptographic library, Tink, which incorporates our FIPS 140-2 Level 1 validated module, BoringCrypto, to implement encryption consistently across almost all Google Cloud products. To provide flexibility of controlling the key residency and rotation schedule, use google provided key for non-sensitive and encrypt sensitive data with Cloud Key Management Service

NEW QUESTION # 75

An organization is starting to move its infrastructure from its on-premises environment to Google Cloud Platform (GCP). The first step the organization wants to take is to migrate its ongoing data backup and disaster recovery solutions to GCP. The organization's on-premises production environment is going to be the next phase for migration to GCP. Stable networking connectivity between the on-premises environment and GCP is also being implemented.

Which GCP solution should the organization use?

- A. Compute Engines Virtual Machines using Persistent Disk via Cloud Interconnect
- B. BigQuery using a data pipeline job with continuous updates via Cloud VPN
- C. Cloud Datastore using regularly scheduled batch upload jobs via Cloud VPN
- **D. Cloud Storage using a scheduled task and gsutil via Cloud Interconnect**

Answer: D

Explanation:

Explanation/Reference: <https://cloud.google.com/solutions/migration-to-google-cloud-building-your-foundation>

NEW QUESTION # 76

An engineering team is launching a web application that will be public on the internet. The web application is hosted in multiple GCP regions and will be directed to the respective backend based on the URL request.

Your team wants to avoid exposing the application directly on the internet and wants to deny traffic from a specific list of malicious IP addresses Which solution should your team implement to meet these requirements?

- A. Network Load Balancing
- **B. Cloud Armor**
- C. SSL Proxy Load Balancing
- D. NAT Gateway

Answer: B

Explanation:

The Cloud armor able to directed user traffic to an external HTTP(S) load balancer enters the PoP closest to the user in Premium Tier.

NEW QUESTION # 77

A manager wants to start retaining security event logs for 2 years while minimizing costs. You write a filter to select the appropriate log entries.

Where should you export the logs?

- A. BigQuery datasets
- **B. Cloud Storage buckets**
- C. Cloud Pub/Sub topics
- D. StackDriver logging

Answer: B

NEW QUESTION # 78

.....

With the high pass rate as 98% to 100%, we can proudly claim that we are unmatched in the market for our accurate and latest Professional-Cloud-Security-Engineer exam dumps. You will never doubt about our strength on bringing you success and the according Professional-Cloud-Security-Engineer Certification that you intent to get. We have testified more and more candidates' triumph with our Professional-Cloud-Security-Engineer practice materials. We believe you will be one of the winners like them.
