Fortinet的FCP_FMG_AD-7.4認證考試是現在IT領域非常有人氣的考試。取得這個考試的認證資格對想晉升的人們來說是最好的，也是最可以看到效果的選擇。而且，借助這個考試你也可以提高自己的技能，掌握更多的對工作有用的技術。這樣你就可以更好地完成你的工作，向別人展示你的超強的能力。也只有這樣你才可以獲得更多的發展機會。

Fortinet FCP_FMG_AD-7.4 考試大綱：

主題	簡介
主題 1	• Device Manager: In this domain, the focus is on how to register devices within ADOMs, implement configuration changes using scripts, and troubleshoot using the revision history.
主題 2	• Administration: This section covers how to understand FortiManager capabilities, perform initial configurations, and set up administrative domains (ADOMs).
主題 3	• Policy and Objects: This section deals with how to manage policies and objects, oversee ADOM revisions, configure workspace mode, and conduct policy imports and installations.
主題 4	• Advanced Configuration: This domain explains FortiManager's high availability (HA), configures FortiGuard services and works with the global database ADOM.
主題 5	• Troubleshooting: This section covers how to familiarize with FortiManager deployment scenarios and troubleshoot issues related to imports, installations, device-level, ADOM-level, and system-level concerns.

FCP_FMG_AD-7.4題庫分享 - FCP_FMG_AD-7.4考試證照綜述

KaoGuTi的專家團隊針對Fortinet FCP_FMG_AD-7.4 認證考試研究出了最新的短期有效培訓方案，為參加Fortinet FCP_FMG_AD-7.4 認證考試的考生進行20個小時左右的培訓，他們就能快速掌握很多知識和鞏固自己原有的知識，還能輕鬆通過Fortinet FCP_FMG_AD-7.4 認證考試，比那些花大量的時間和精力準備考試的人輕鬆得多。

最新的 Fortinet Network Security Expert FCP_FMG_AD-7.4 免費考試真題 (Q44-Q49):

問題 #44

In the event that one of the secondary FortiManager devices fails, which action must be performed to return the FortiManager HA manual mode to a working state?

- A. The FortiManager HA state transition is transparent to administrators and does not require any reconfiguration.
- B. Reboot the failed device to remove its IP from the primary device.
- C. Manually promote one of the working secondary devices to the primary role, and reboot the old primary device to remove the peer IP of the failed device.
- D. Reconfigure the primary device to remove the peer IP of the failed device.

答案: D

解題說明:

If the secondary FortiManager fails, the administrator can reconfigure the primary device to remove the secondary configuration.

問題 #45

You are moving managed FortiGate devices from one ADOM to a new ADOM.
Which statement correctly describes the expected result?

- A. Policy packages will be imported into the new ADOM automatically.
- B. Any unused objects from a previous ADOM are moved to the new ADOM automatically.
- C. The shared policy package will not be moved to the new ADOM automatically.
- D. The shared device settings will be installed automatically.

答案: C

解題說明:

When you move a device to a new ADOM, the shared policy packages do not transfer automatically. You would need to manually configure or assign the necessary policy packages in the new ADOM.

問題 #46

An administrator has assigned a global policy package to custom ADOM1. Then the administrator creates a new policy package. Fortinet, in the custom ADOM1. What happens to the Fortinet policy package when it is created?

- A. The global policy package is automatically assigned.
- B. You can select the option to assign the global policies.
- C. You must reapply the global policy package to ADOM1.
- D. You must assign the global policy package from the global ADOM.

答案: A

解題說明:

When a new policy package is created in a custom ADOM that already has a global policy package assigned, the global policy package is automatically assigned to the new policy package. This behavior ensures consistent policy enforcement across different ADOMs.

Options A, C, and D are incorrect because:

* A and C incorrectly suggest that manual reassignment or reapplication is needed.

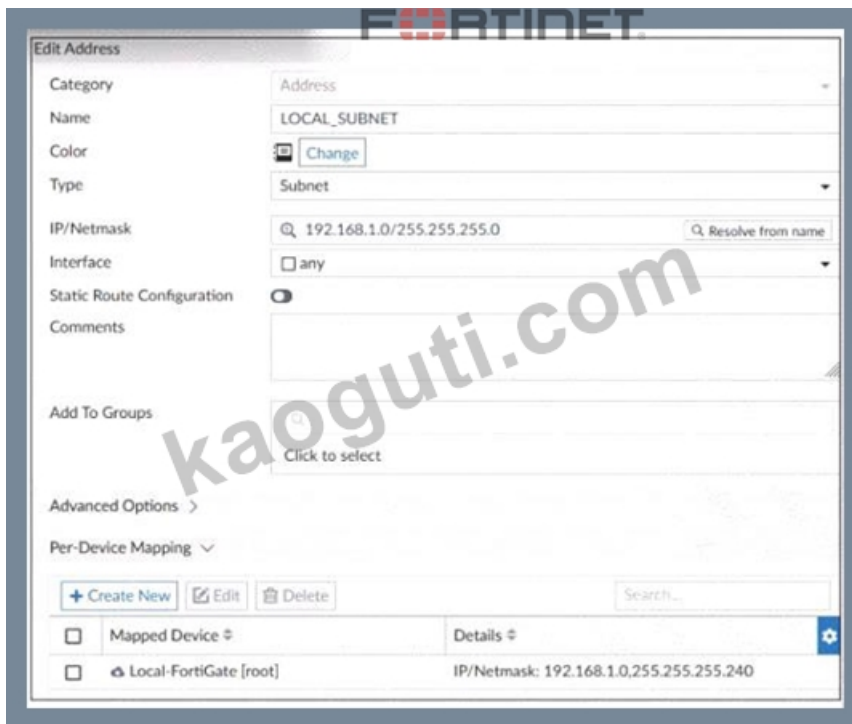

* D implies optional assignment, whereas it is automatically done.

FortiManager References:

* Refer to FortiManager 7.4 Administrator Guide: Working with Global and Custom ADOM Policy Packages

問題 #47

Refer to the exhibit.

An administrator has created a firewall address object that is used in multiple policy packages for multiple FortiGate devices in an ADOM.

After the installation operation is performed, which IP/netmask is shown on FortiManager for this firewall address object for devices without a Per-Device Mapping set?

- A. FortiManager generates an error for each FortiGate without a per-device mapping defined for that object.
- B. 192.168.1.0/28
- C. FortiManager replaces the address object to none.
- D. 192.168.1.0/24

答案： B

問題 #48

What does a policy package status of Never Installed indicate?

- A. The policy package was never imported after a device was registered on FortiManager.
- B. FortiManager is unable to determine the policy package status.
- C. The policy configuration has been changed on FortiManager and changes have not yet been installed on the managed device.
- D. The policy configuration has been changed on a managed device and changes have not yet been imported into FortiManager.

答案： A

問題 #49
