## SAP Certified Associate - Positioning SAP Business Suite via SAP Financial Management Solutions Sample Questions (Q51-Q56):

### NEW QUESTION # 51

How does the SAP Business Suite's financial management capabilities help Finance leaders?

Note: There are 3 correct answers to this question.

- A. By streamlining accounting processes with automation.
- B. By streamlining workforce planning, enhancing employee interactions, and optimizing HR processes using AI agents.
- C. By streamlining the processing of payroll data through third-party banking interfaces.
- D. By allowing businesses to grow profitable revenues and monetize diversified offerings using quote-to-cash capabilities.
- E. By optimizing cash flow and managing risks effectively.

**Answer: A,D,E**

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

SAP Financial Management capabilities are designed to empower finance leaders to transition from transactional managers to strategic advisors. This is achieved through three primary avenues. First, the suite helps optimize cash flow and manage risks effectively by providing real-time visibility into liquidity and automating the identification of financial threats. This allows leaders to make informed decisions about investments and debt.

Second, SAP focuses on streamlining accounting processes with automation. By utilizing technologies like the Universal Journal and AI-driven matching, the "Record-to-Report" cycle is significantly shortened. This reduces the administrative burden on the finance team and eliminates manual errors, leading to a "continuous accounting" environment. Third, SAP supports modern business models by allowing businesses to grow profitable revenues and monetize diversified offerings. Through advanced "Quote-to-Cash" capabilities, companies can easily manage subscriptions, usage-based billing, and complex service bundles. This flexibility is crucial in today's digital economy where traditional product sales are being replaced by recurring revenue models. While HR processes (D) and payroll processing (E) are vital for an enterprise, they fall under the Human Capital Management (HCM) domain and are not the primary value drivers emphasized for the SAP Financial Management solution set.

### NEW QUESTION # 52

What is the primary function of SAP Business Workflow?

- A. To automate business processes
- B. To enhance customer relationship management
- C. To manage employee benefits
- D. To optimize supply chain operations

**Answer: A**

### NEW QUESTION # 53

Which processes does SAP Global Trade Services most closely support?

Note: There are 2 correct answers to this question.

- A. Production
- B. Marketing
- C. Purchasing
- D. Sales

**Answer: C,D**

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

SAP Global Trade Services (GTS) is an essential component of the finance and risk landscape, specifically designed to manage the complexities of international trade. It is most closely integrated with the Sales and Purchasing processes. In the Purchasing (Procurement) process, GTS ensures that goods being imported meet all regulatory requirements, checks for sanctioned suppliers,

and calculates the appropriate customs duties to be included in the landed cost.

In the Sales (Order-to-Cash) process, GTS performs critical "Sanctioned Party Screening" to ensure that the company is not selling to prohibited individuals or entities. It also manages export licenses and ensures that the goods being shipped comply with the export laws of the origin country and the import laws of the destination. If a violation is detected during either the Sales or Purchasing cycle, GTS can automatically place a "block" on the transaction in the SAP S/4HANA core, preventing further processing until the issue is resolved. This tight integration ensures that trade compliance is not a bottleneck but a real-time safeguard embedded into the supply chain and financial workflows. Marketing and Production, while related to the business, do not typically trigger the cross-border legal and financial compliance checks that define the core function of SAP GTS.

#### NEW QUESTION # 54

Which SAP solution is used for managing fixed assets?
