PSM-I Download Fee & New PSM-I Exam Duration

Since it was founded, our TestkingPDF has more and more perfect system, more rich questiondumps, more payment security, and better customer service. Now the PSM-I exam dumps provided by TestkingPDF have been recognized by masses of customers,

but we will not stop the service after you buy. We will inform you at the first time once the PSM-I Exam software updates, and if you can't fail the PSM-I exam we will full refund to you and we are responsible for your loss.

Scrum is a popular framework used in project management, especially in software development. It is an agile approach to product development that focuses on iterative and incremental delivery. The Scrum framework is designed to help teams improve their productivity and effectiveness while delivering high-quality products that meet customer needs. The Scrum Master is a crucial role in the Scrum framework responsible for ensuring the team follows the Scrum process and removing any obstacles that may hinder the team's progress.

Scrum Professional Scrum Master I Sample Questions (Q171-Q176):

NEW QUESTION # 171
Why should the Product Owner be present at the Daily Scrum? (Choose the best answer.)

- A. He/She doesn't need to be there.
- B. To participate as a Scrum Team member.
- C. To represent the stakeholder's point of view.
- D. To hear about impediments in functionality.

Answer: A

NEW QUESTION # 172
Which are properties of the Daily Scrum? (Choose two.)

- A. It is free from and designed to promote conversation.
- B. It is held first thing in the morning.
- C. It consists of the Scrum Master asking the Team members the three questions.
- D. It is facilitated by the team lead.
- E. Its location and time remain constant.
- F. It is fifteen minutes or less in duration.

Answer: E,F

Explanation:
According to the Scrum Guide1, each event in Scrum is a formal opportunity to inspect and adapt something. These events are specifically designed to enable critical transparency and inspection. Failure to include any of these events results in reduced transparency and is a lost opportunity to inspect and adapt. All events are time-boxed events, such that every event has a maximum duration. Once a Sprint begins, its duration is fixed and cannot be shortened or lengthened. The remaining events may end whenever the purpose of the event is achieved, ensuring an appropriate amount of time is spent without allowing waste in the process. The time-box for the Daily Scrum is 15 minutes or less for a one-month Sprint. Its location and time remain constant.

NEW QUESTION # 173
User documentation is part of your Definition of Done. However, there are not enough technical writers for all teams. Your Scrum Team does not have a technical writer. What should the Scrum Team do?
(choose the best answer)

- A. Wait until you have a technical writer on your Scrum Team to take care of this.
- B. Let the user documentation remain undone and accumulate until after the last development Sprint. It will then be done by any available technical writers.
- C. The Developers on the Scrum Team should write the user documentation.
- D. Form a separate team of technical writers that will work on an on-demand basis for the various Product Owners. Work order will be first in, first out.

Answer: C

Explanation:
The best answer is B. The Developers on the Scrum Team should write the user documentation. According to the Scrum Guide, the Definition of Done creates transparency and ensures that the product Increment meets the quality standards required for the product1. If user documentation is part of the Definition of Done, then it should be completed within the Sprint by the Scrum Team1.

The Scrum Team should have all the skills needed to deliver the product, and if user documentation is part of the product, then that skill should be on the team as well2. The Developers on the Scrum Team are responsible for creating a plan for delivering the Increment, which includes user documentation1. They can also ask for help from other more experienced writers outside the team, or learn the skill through training or workshops2. The other options are not consistent with the Scrum values and principles, as they would create dependencies, delays, and waste in the product development process.

NEW QUESTION # 174

user documentation is part of your Definition of Done. However, there are not enough technical writers for all teams. Your Scrum Team does not have a technical writer. What should the Scrum Team do?
(choose the best answer)

- A. The Developers on the Scrum Team should write the user documentation
- B. Wait until you have a technical writer on your Scrum Team to take care of this.
- C. Let the user documentation remain undone and accumulate until after the last development Sprint. It will then be done by any available technical writers.
- D. Form a separate team of technical writers that will work on an on-demand basis tor the various Product Owners. Work order will be first in, first out.

Answer: A

Explanation:
According to the Scrum Guide, the Developers on the Scrum Team should write the user documentation, as they are responsible for creating a "Done" Increment that meets the Definition of Done and the Sprint Goal. The other options are not valid, as they imply that the user documentation can be deferred, ignored, or outsourced, which is not consistent with Scrum values and principles.

NEW QUESTION # 175

What does it mean to say that an event has a time-box?

- A. The event can take no more than a maximum amount of time.
- B. The event must take at least a minimum amount of time.
- C. The event must happen at a set time.
- D. The event must happen by a given time.

Answer: A
