

100% Pass 2026 300-740: High-quality Designing and Implementing Secure Cloud Access for Users and Endpoints Latest Braindumps Ppt

BONUS!!! Download part of VCETorrent 300-740 dumps for free: <https://drive.google.com/open?id=1m6i-wJrLHwIW77nX9ejvwEYWwwKkmnz>

Remember that this is a crucial part of your career, and you must keep pace with the changing time to achieve something substantial in terms of a certification or a degree. So do avail yourself of this chance to get help from our exceptional Designing and Implementing Secure Cloud Access for Users and Endpoints (300-740) dumps to grab the most competitive Cisco 300-740 certificate. VCETorrent has formulated the Designing and Implementing Secure Cloud Access for Users and Endpoints (300-740) product in three versions. You will find their specifications below to understand them better.

Just like the saying goes, it is good to learn at another man's cost. In the process of learning, it is more important for all people to have a good command of the method from other people. The Designing and Implementing Secure Cloud Access for Users and Endpoints exam questions from our company will help you find the good study method from other people. Using the 300-740 Test Guide from our company, you can not only pass your exam, but also you will have the chance to learn about the different and suitable study skills. We believe these skills will be very useful for you near life.

300-740 Valid Exam Registration | 300-740 Key Concepts

If you are going to purchasing the 300-740 training materials, and want to get a general idea of what our product about, you can try the free demo of our website. Once you have decide to buy the 300-740 training materials, if you have some questions, you can contact with our service, and we will give you suggestions and some necessary instruction. You will get the 300-740 Exam Dumps within ten minutes. And if you didn't receive it, you can notify us through live chat or email, we will settle it for you.

Cisco 300-740 Exam Syllabus Topics:

Topic	Details
-------	---------

Topic 1	<ul style="list-style-type: none"> Threat Response: This section of the exam measures skills of Incident Response Engineers and focuses on responding to threats through automation and data analysis. It covers how to act based on telemetry and audit reports, manage user or application compromises, and implement response steps such as containment, reporting, remediation, and reinstating services securely.
Topic 2	<ul style="list-style-type: none"> SAFE Architectural Framework: This section of the exam measures skills of Security Architects and explains the Cisco SAFE framework, a structured model for building secure networks. It emphasizes the importance of aligning business goals with architectural decisions to enhance protection across the enterprise.
Topic 3	<ul style="list-style-type: none"> SAFE Key Structure: This section of the exam measures skills of Network Security Designers and focuses on the SAFE framework's key structural elements. It includes understanding 'Places in the Network'—the different network zones—and defining 'Secure Domains' to organize security policy implementation effectively.
Topic 4	<ul style="list-style-type: none"> Industry Security Frameworks: This section of the exam measures the skills of Cybersecurity Governance Professionals and introduces major industry frameworks such as NIST, CISA, and DISA. These frameworks guide best practices and compliance in designing secure systems and managing cloud environments responsibly.
Topic 5	<ul style="list-style-type: none"> User and Device Security: This section of the exam measures skills of Identity and Access Management Engineers and deals with authentication and access control for users and devices. It covers how to use identity certificates, enforce multifactor authentication, define endpoint posture policies, and configure single sign-on (SSO) and OIDC protocols. The section also includes the use of SAML to establish trust between devices and applications.
Topic 6	<ul style="list-style-type: none"> Integrated Architecture Use Cases: This section of the exam measures the skills of Cloud Solution Architects and covers key capabilities within an integrated cloud security architecture. It focuses on ensuring common identity across platforms, setting multicloud policies, integrating secure access service edge (SASE), and implementing zero-trust network access models for more resilient cloud environments.
Topic 7	<ul style="list-style-type: none"> Network and Cloud Security: This section of the exam measures skills of Network Security Engineers and covers policy design for secure access to cloud and SaaS applications. It outlines techniques like URL filtering, app control, blocking specific protocols, and using firewalls and reverse proxies. The section also addresses security controls for remote users, including VPN-based and application-based access methods, as well as policy enforcement at the network edge.
Topic 8	<ul style="list-style-type: none"> Application and Data Security: This section of the exam measures skills of Cloud Security Analysts and explores how to defend applications and data from cyber threats. It introduces the MITRE ATT&CK framework, explains cloud attack patterns, and discusses mitigation strategies. Additionally, it covers web application firewall functions, lateral movement prevention, microsegmentation, and creating policies for secure application connectivity in multicloud environments.

Cisco Designing and Implementing Secure Cloud Access for Users and Endpoints Sample Questions (Q13-Q18):

NEW QUESTION # 13

Endpoint posture policies are used to assess:

- A. The user's personal preferences for software
- B. The security readiness of a device before granting network access
- C. The user's physical location
- D. The speed of the network connection

Answer: B

NEW QUESTION # 14

The MITRE ATT&CK framework is primarily used for:

- A. Simplifying application development processes
- **B. Understanding and categorizing attack techniques and tactics**
- C. Developing new attack vectors
- D. Enhancing network throughput

Answer: B

NEW QUESTION # 15

Determine cloud platform security policies based on application connectivity requirements might involve:

- **A. Implementing network peering**
- **B. Configuring firewalls and access lists**
- C. Avoiding the use of security groups and ACLs
- **D. Selecting appropriate cloud service models (IaaS, PaaS, SaaS)**

Answer: A,B,D

NEW QUESTION # 16

Which of the following are core components of the MITRE ATT&CK framework?

(Multiple Correct Answers)

- **A. Defense evasion techniques**
- **B. TTPs (Tactics, Techniques, and Procedures)**
- C. SSL Certificates
- **D. Credential access methods**

Answer: A,B,D

NEW QUESTION # 17

A Web Application Firewall (WAF) is primarily used for:

- A. Filtering email spam
- B. Managing website content
- **C. Protecting web applications from attacks such as SQL injection and XSS**
- D. Accelerating website performance

Answer: C

NEW QUESTION # 18
