## Free PDF 2026 212-82: The Best Certified Cybersecurity Technician Test Answers

Nowadays the knowledge capabilities and mental labor are more valuable than the manual labor because knowledge can create more wealth than the manual labor. If you boost professional knowledge capabilities in some area you are bound to create a lot of values and can get a good job with high income. Passing the test of 212-82 Certification can help you achieve that, and our 212-82 training materials are the best study materials for you to prepare for the 212-82 test. Our 212-82 guide materials combine the key information to help the clients both solidify the foundation and advance with the times.

The Certified Cybersecurity Technician (CCT) exam covers a wide range of topics related to cybersecurity. These include network security, cryptography, malware analysis, incident response, and vulnerability assessment. 212-82 Exam also covers ethical hacking techniques, as well as the legal and ethical issues surrounding cybersecurity.

## ECCouncil Certified Cybersecurity Technician Sample Questions (Q160-Q165):

### NEW QUESTION # 160

CyberX, an acclaimed cybersecurity firm with a diverse clientele ranging from financial institutions to healthcare providers, has been approached by NexusCorp. NexusCorp, a global supply chain giant, seeks assistance in drafting a new security policy after a series

of cyber-attacks that highlighted vulnerabilities in its existing protocols. While NexusCorp uses state-of-the-art technology, its security policies have not kept pace. It needs a policy that acknowledges its complex organizational structure, vast geographic spread, and diversity in employee tech proficiency. Which should be CyberX's primary consideration in this scenario?

- A. Emphasis on stringent password policies.
- **B. Stakeholder involvement in policy formulation.**
- C. Regular update schedules for software and hardware components.
- D. Use of the latest encryption algorithms.

**Answer: B**

#### **NEW QUESTION # 161**

The SOC department in a multinational organization has collected logs of a security event as "Windows.events.evtx". Study the Audit Failure logs in the event log file located in the Documents folder of the "Attacker Machine-1" and determine the IP address of the attacker. (Note: The event ID of Audit failure logs is 4625.)

- A. 10.10.1.10
- **B. 10.10.1.16**
- C. 10.10.1.12
- D. 10.10.1.19

**Answer: B**

Explanation:

The IP address of the attacker is 10.10.1.16. This can be verified by analyzing the Windows.events.evtx file using a tool such as Event Viewer or Log Parser. The file contains several Audit Failure logs with event ID 4625, which indicate failed logon attempts to the system.

The logs show that the source network address of the failed logon attempts is 10.10.1.16, which is the IP address of the attacker.

#### **NEW QUESTION # 162**

Sam, a software engineer, visited an organization to give a demonstration on a software tool that helps in business development. The administrator at the organization created a least privileged account on a system and allocated that system to Sam for the demonstration. Using this account, Sam can only access the files that are required for the demonstration and cannot open any other file in the system.

Which of the following types of accounts the organization has given to Sam in the above scenario?

- **A. Guest account**
- B. User account
- C. Service account
- D. Administrator account

**Answer: A**

Explanation:

The correct answer is B, as it identifies the type of account that the organization has given to Sam in the above scenario. A guest account is a type of account that allows temporary or limited access to a system or network for visitors or users who do not belong to the organization. A guest account typically has minimal privileges and permissions and can only access certain files or applications. In the above scenario, the organization has given Sam a guest account for the demonstration. Using this account, Sam can only access the files that are required for the demonstration and cannot open any other file in the system. Option A is incorrect, as it does not identify the type of account that the organization has given to Sam in the above scenario. A service account is a type of account that allows applications or services to run on a system or network under a specific identity. A service account typically has high privileges and permissions and can access various files or applications. In the above scenario, the organization has not given Sam a service account for the demonstration. Option C is incorrect, as it does not identify the type of account that the organization has given to Sam in the above scenario. A user account is a type of account that allows regular access to a system or network for employees or members of an organization. A user account typically has moderate privileges and permissions and can access various files or applications depending on their role. In the above scenario, the organization has not given Sam a user account for the demonstration. Option D is incorrect, as it does not identify the type of account that the organization has given to Sam in the above scenario. An administrator account is a type of account that allows full access to a system or network for administrators or managers of an organization. An administrator account typically has the highest privileges and permissions and can access and

modify any files or applications. In the above scenario, the organization has not given Sam an administrator account for the demonstration.

### NEW QUESTION # 163

Cairo, an incident responder, was handling an incident observed in an organizational network. After performing all IH&R steps, Cairo initiated post-incident activities. He determined all types of losses caused by the incident by identifying and evaluating all affected devices, networks, applications, and software. Identify the post-incident activity performed by Cairo in this scenario.

- A. Close the investigation
- B. Review and revise policies
- C. Incident impact assessment
- D. Incident disclosure

**Answer: C**

Explanation:

Incident impact assessment is the post-incident activity performed by Cairo in this scenario. Incident impact assessment is a post-incident activity that involves determining all types of losses caused by the incident by identifying and evaluating all affected devices, networks, applications, and software. Incident impact assessment can include measuring financial losses, reputational damages, operational disruptions, legal liabilities, or regulatory penalties<sup>1</sup>. ### NEW QUESTION # 164

You've been called in as a computer forensics investigator to handle a case involving a missing company laptop from the accounting department, which contained sensitive financial data. The company suspects a potential data breach and wants to recover any evidence from the missing device. What is your MOST important initial action regarding the digital evidence?

- A. Interview company personnel to understand the missing laptop's usage.
- B. Secure the scene where the laptop was last seen (if possible).
- C. Turn on the laptop (if found) and search for deleted files.
- D. Report the incident to law enforcement immediately.

**Answer: B**

Explanation:

In handling a case involving a missing laptop with sensitive financial data, the most important initial action regarding digital evidence is:

\* Securing the Scene:

\* Prevent Contamination: Secure the location where the laptop was last seen to prevent any further tampering or contamination of potential evidence.

\* Preservation: Ensure that any physical evidence related to the incident is preserved for further investigation.

\* Subsequent Steps:

\* Investigation: After securing the scene, proceed with interviewing personnel, reporting the incident to law enforcement, and analyzing the laptop (if found) without turning it on to avoid altering any evidence.
