Salesforce Certified Marketing Cloud Engagement Administrator Sample Questions (Q53-Q58):

NEW QUESTION # 53
Northern Trail Outfitters (NTO) is concerned about unauthorized API access to their Marketing Cloud account.
Which feature would NTO enable to assist in reducing threats from malicious API attacks?

- A. Advanced Audit Trail
- B. Single Sign on Authentication
- C. Field Level Encryption
- D. IP Whitelisting

Answer: D

Explanation:
To enhance security against unauthorized API access, Northern Trail Outfitters should:
Enable IP Whitelisting: This security feature restricts API access to Marketing Cloud from only those IP addresses that are pre-approved. This method significantly reduces the risk of malicious access from unrecognized sources.
Configuration: Administrators can configure IP Whitelisting in the Setup area under Security Settings, specifying which IP ranges are allowed to initiate API calls to the account.
Reference: Salesforce Marketing Cloud IP Whitelisting Documentation

NEW QUESTION # 54
A Marketing Cloud admin is asked by the marketing team to ensure a default Header and Footer be added to emails.
Where under Setup could this be created?

- A. Account Settings
- B. Emails Studio Settings
- C. Campaign Settings
- D. Content Builder Settings

Answer: D

Explanation:
The Content Builder Settings under Setup allow the admin to create a default Header and Footer for emails.
These settings apply to emails created in Content Builder only. The other settings do not have an option to create a default Header and Footer for emails.

NEW QUESTION # 55
Northern Trail Outfitters is preparing to send a promotional email. The audience file was loaded into a data extension but does not display for Marketing Cloud admin scheduling the send.
What should the admin confirm to resolve the issue?

- A. The data extension contains a Salesforce ID
- B. The Data extension is marked as Sendable and Testable
- C. The data extension is marked as Sendable
- D. The data extension is linked using the Contact Key

Answer: C

Explanation:
To resolve the issue of a data extension not appearing for email sends, confirm:
Sendable Status: Ensure the data extension is marked as Sendable. This setting links the data extension to a subscriber attribute, allowing it to be used for email sends.
Configuration Check: Verify the send relationship within the data extension properties, ensuring it correctly relates to the subscriber

key or another unique identifier used for email campaigns.
Reference: Salesforce Marketing Cloud Data Extension Setup

NEW QUESTION # 56
A user asks Marketing Cloud admin to review their permissions since they are unable to send an email. The admin reviews the user profile and notices the user has three roles assigned: Content Creator, Data Manager, and Marketing Cloud Viewer.
What should the admin do to resolve the issue so the user can send an email?

- A. Edit permissions and Grant permissions to Send
- B. Add the Role Marketing Cloud Channel Manager
- C. Remove the Marketing Cloud Viewer Role
- D. Edit permissions and deselect Deny for Email Sending

Answer: A

Explanation:
The user in question holds roles that do not inherently include permissions to send emails. The roles assigned are:
Content Creator: Typically has permissions to create content but not necessarily to send emails.
Data Manager: Manages data but does not have email sending permissions.
Marketing Cloud Viewer: Can view campaigns and data but cannot execute or modify them.
To resolve this issue so that the user can send emails, the admin must: A. Edit permissions and Grant permissions to Send - This action involves customizing the user's permissions to include the ability to send emails. This can be done either by adjusting the permissions in one of the existing roles (if customization is possible and appropriate) or by creating a custom role or permission set that includes email sending capabilities.

Salesforce Marketing Cloud Documentation on "Roles and Permissions"

NEW QUESTION # 57
Where would a Marketing Cloud admin view all verified email addresses?

- A. From Address Management
- B. Identity Verification Log
- C. Sender Profiles
- D. Reply Mail Management

Answer: A

Explanation:
To view all verified email addresses in Marketing Cloud:
Navigate to From Address Management: This section within Email Studio allows administrators to manage and view all sender addresses that have been verified and are approved for use in sending emails.
Verification and Management: This area specifically holds records of each email address that has been set up and verified, including the status of each, ensuring they are authorized to send emails from the platform.
Reference: Salesforce Marketing Cloud Email Studio Documentation

NEW QUESTION # 58
......

Many candidates worry that after a long-time review of MCE-Admn-201, they may still fail the exam due to inadaptation of the test model.
