最新BCI認證CBCI考試考題

獲得CBCI認證是IT職業發展有利保證，而VCESoft公司提供最新最準確的CBCI題庫資料，幾乎包含真實考試的所有知識點，借助我們的學習資料，您不必浪費時間去閱讀過多的參考書籍，只需要花費一定的時間去學習我們的BCI CBCI題庫資料。本站提供PDF版本和軟件本版的CBCI題庫，PDF版本的方便打印，而對於軟件版本的BCI CBCI題庫可以模擬真實的考試環境，方便考生選擇。

BCI CBCI 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none">Design: Here, learners explore how to translate analysis into strategic plans by developing continuity designs that mitigate identified risks, ensuring critical operations remain functional or can be quickly restored during disruptions.

主題 2	<ul style="list-style-type: none"> • Analysis This module dives into the analytical stage, focusing on tools such as Business Impact Analysis (BIA) and risk assessment to identify critical functions and vulnerabilities—essential for understanding what the organization must protect and why.
主題 3	<ul style="list-style-type: none"> • Introduction: This section lays the groundwork for newcomers to business continuity by clarifying what business continuity is, why it matters in organizational resilience, and how its fundamental practices interconnect under the Good Practice Guidelines (GPG) framework.
主題 4	<ul style="list-style-type: none"> • Implementation: This section covers putting the designed continuity strategies into action, including creating and deploying incident response and business continuity plans, structuring effective response teams, and ensuring operational readiness.
主題 5	<ul style="list-style-type: none"> • Policy and Programme Management and Embedding: This part guides users through establishing a Business Continuity Management System (BCMS), including how to craft governance, define a policy, and embed these elements into the fabric of an organization for long-term sustainability.

最新的 CBCI 7.0 Certification Course CBCI 免費考試真題 (Q44-Q49):

問題 #44

When carrying out the Business Impact Analysis (BIA) process, the Business Continuity professional should use a consistent approach to determine priorities of products, services, and activities. Which of the following is a method that could be used?

- A. A risk assessment matrix
- B. A gap analysis
- C. Pre-defined impact thresholds
- D. A standardized risk rating table

答案: C

解題說明:

The CBCI 7.0 course details that using pre-defined impact thresholds is an effective and consistent method for prioritizing products, services, and activities during a BIA. These thresholds establish clear criteria for impact levels across various categories, such as financial loss, reputational damage, and regulatory consequences. By applying standardized thresholds, organizations can objectively assess and compare the criticality of different business functions, ensuring that prioritization aligns with organizational risk appetite and strategic objectives. This approach promotes consistency, transparency, and repeatability in BIA processes. While risk matrices and gap analyses are useful tools in risk management, pre-defined impact thresholds directly guide priority-setting within BIAs. Reference: CBCI 7.0 Study Guide, Module 3: Business Impact Analysis, pages 46-48.

問題 #45

Which of the following is a factor to be taken into consideration when developing and using risk assessments?

- A. Risk assessments will need to work undertaken during the Business Impact Analysis (BIA) to determine the products, services, and activities that need to be
- B. The time that has elapsed since the last assessment of risks in order to maintain its currency
- C. Risk assessments are based on estimations of the likelihood and consequences of a risk occurring
- D. Risk assessments are primarily produced as information for regulators and auditors to provide evidence that the organization is monitoring and managing risks

答案: C

解題說明:

The CBCI 7.0 course explains that risk assessments fundamentally rely on evaluating the likelihood of risk occurrence and the consequences if they materialize. This probabilistic approach enables prioritization and treatment planning. Although risk assessments inform BIAs and regulatory compliance, their primary purpose is to analyze potential risks in terms of impact and probability to guide effective continuity strategies.

Currency (timeliness) is important but secondary to the quality of likelihood and consequence evaluations, which form the basis of all risk decisions.

問題 #46

The type of review that includes interviews with the people involved, activity logs, related media coverage and relevant videos and photos is:

- A. An external audit
- B. A supplier performance review
- C. A performance appraisal with individual employees
- **D. A post-incident review**

答案: D

解題說明:

Apost-incident review (PIR)is a comprehensive evaluation conducted after an actual disruption or incident, designed to assess what happened, how the response was managed, and lessons learned. The CBCI 7.0 course details that PIRs often involve gathering qualitative and quantitative data, includinginterviews with participants, examination of activity logs, media coverage, and visual evidencelike photos and videos.

This multi-source review provides a holistic understanding of the incident's impact, the effectiveness of plans, and areas for improvement. It differs from audits or appraisals by its focus on real events rather than planned assessments or individual performance evaluations. PIRs are critical for continuous improvement of the BCMS.

Reference:CBCI 7.0 Study Guide, Module 6: Post-Incident Review, pages 130-133.

問題 #47

When developing a system to measure Business Continuity culture, it is important to take into account:

- **A. The aims of the activity and how the information will be collected and assessed**
- B. The way that the outcomes will inform the design of Business Continuity solutions
- C. The need to present the outcomes in a positive way for top management and stakeholders
- D. How to ensure that all personnel are required to respond to the process

答案: A

解題說明:

According to the CBCI 7.0 course, theprimary consideration when developing a system to measure Business Continuity cultureis to clearly define the objectives of the measurement activity and establish robust methods for collecting and analyzing relevant data. This includes deciding what aspects of culture to assess (e.g., awareness, attitudes, behaviours), selecting appropriate tools (surveys, interviews, observation), and determining assessment frequency. Accurate data collection and analysis provide meaningful insights that drive improvements and validate cultural initiatives. Presentation style and participation mandates are important but secondary to the integrity and clarity of the measurement process itself.

Reference:CBCI 7.0 Study Guide, Module 4: Measuring Culture, pages 71-73.

問題 #48

Establishing governance arrangements for a Business Continuity Management System (BCMS) is essential in order to:

- A. Develop a project risk register and carry out appropriate risk assessments in the workplace
- **B. Ensure that there is ongoing commitment across all organizational functions and levels**
- C. Commission research into approaches taken by organizations
- D. Enable the Business Continuity professional to establish their authority and issue instructions on the actions that need to be taken

答案: B

解題說明:

The CBCI 7.0 course stresses that governance arrangements are key to securingongoing commitment and support across all levels and functionswithin an organization. Effective governance structures facilitate leadership involvement, resource allocation, decision-making, and accountability, which are crucial for embedding Business Continuity. While project risk registers and research are valuable tools, and authority is necessary, governance's primary function is to maintain organization-wide engagement and alignment,

ensuring the BCMS is sustained and evolves with business needs.
