

# AZ-204 Exam Simulator Free - Free AZ-204 Brain Dumps

BTW, DOWNLOAD part of Itcertkey AZ-204 dumps from Cloud Storage: [https://drive.google.com/open?id=1NqifqYjWmsUYbKC3\\_1Ld4fQwNiEXcfDC](https://drive.google.com/open?id=1NqifqYjWmsUYbKC3_1Ld4fQwNiEXcfDC)

We have an integrated system for you. We offer you free demo for AZ-204 exam braindumps before purchasing. And you can get the downloading link and password in ten minutes after your payment, therefore you can start your learning immediately. We also provide free update for one year after you purchase AZ-204 Exam Dumps. After you have purchased the exam dumps, we also have the after-service to solve any problems you have. You can consult your question about AZ-204 exam dumps to our online and offline service stuff.

## Exam Details and Topics

There is no information on the official website concerning the total number of questions included in the Microsoft AZ-204 exam. However, some information is known from the previous test takers. The learners can expect around 40-60 questions that are delivered in a multiple-choice format. The exam costs \$165 in the United States but this sum can be different for other countries. If you are applying for the test and you are not living in the USA, you can check the official webpage for information related to the actual exam price. This certification test is available in English, Japanese, Simplified Chinese, and Korean. You can take it online as a proctored exam without leaving your home or office. Alternatively, you can also sit for the test at any Pearson VUE center.

Achieving the Microsoft AZ-204 Certification demonstrates that a developer has the skills and knowledge required to develop and deploy Azure solutions. Developing Solutions for Microsoft Azure certification is highly valued by employers and can lead to better job opportunities, higher salaries, and career advancement. Additionally, this certification is a prerequisite for other advanced Azure certifications, such as the Microsoft Certified: Azure Solutions Architect Expert and the Microsoft Certified: DevOps Engineer Expert.

## Free AZ-204 Brain Dumps & AZ-204 Reliable Cram Materials

Our AZ-204 Study Materials include 3 versions: the PDF, PC and APP online. You can understand each version's merits and using

method in detail before you decide to buy our AZ-204 study materials. For instance, PC version of our AZ-204 training quiz is suitable for the computers with the Windows system. It is a software application which can be installed and it stimulates the real exam's environment and atmosphere. It builds the users' confidence and can be practiced and learned at any time.

Microsoft AZ-204 exam is a certification exam designed for developers who want to validate their skills in developing solutions for Microsoft Azure. AZ-204 exam is part of the Azure Developer Associate certification, which is suitable for developers who are interested in building cloud solutions using the Azure platform. AZ-204 Exam validates the candidate's skills in developing Azure solutions using various programming languages, tools, and services.

## Microsoft Developing Solutions for Microsoft Azure Sample Questions (Q421-Q426):

### NEW QUESTION # 421

You are developing an Azure Function App. You develop code by using a language that is not supported by the Azure Function App host. The code language supports HTTP primitives.

You must deploy the code to a production Azure Function App environment.

You need to configure the app for deployment.

Which configuration values should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/azure-functions/functions-create-function-linux-custom-image>

<https://docs.microsoft.com/en-us/powershell/azure/install-az-ps?view=azps-7.1.0>

### NEW QUESTION # 422

You are developing an application that needs access to an Azure virtual machine (VM). The access lifecycle for the application must be associated with the VM service instance. You need to enable managed identity for the VM.

How should you complete the PowerShell segment? To answer, select the appropriate options in the answer area.

NOTE Each correct selection is worth one point.

**Answer:**

Explanation:

### NEW QUESTION # 423

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals.

You are developing and deploying several ASP.NET web applications to Azure App Service. You plan to save session state information and HTML output.

You must use a storage mechanism with the following requirements:

- \* Share session state across all ASP.NET web applications.
- \* Support controlled, concurrent access to the same session state data for multiple readers and a single writer.
- \* Save full HTTP responses for concurrent requests.

You need to store the information.

Proposed Solution: Enable Application Request Routing (ARR).

Does the solution meet the goal?

- A. Yes
- B. No

**Answer: B**

Explanation:

Instead deploy and configure Azure Cache for Redis. Update the web applications.

Reference:

<https://docs.microsoft.com/en-us/azure/architecture/best-practices/caching#managing-concurrency-in-a-cache>

#### NEW QUESTION # 424

You are developing a Docker/Go using Azure App Service Web App for Containers. You plan to run the container in an App Service on Linux. You identify a Docker container image to use.

None of your current resource groups reside in a location that supports Linux. You must minimize the number of resource groups required.

You need to create the application and perform an initial deployment.

Which three Azure CLI commands should you use to develop the solution? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation:

You can host native Linux applications in the cloud by using Azure Web Apps. To create a Web App for Containers, you must run Azure CLI commands that create a group, then a service plan, and finally the web app itself.

Step 1: az group create

In the Cloud Shell, create a resource group with the az group create command.

Step 2: az appservice plan create

In the Cloud Shell, create an App Service plan in the resource group with the az appservice plan create command.

Step 3: az webapp create

In the Cloud Shell, create a web app in the myAppServicePlan App Service plan with the az webapp create command. Don't forget to replace with a unique app name, and <docker-ID> with your Docker ID.

References:

<https://docs.microsoft.com/mt-mt/azure/app-service/containers/quickstart-docker-go?view=sql-server-ver15>

#### NEW QUESTION # 425

You are developing Azure WebJobs.

You need to recommend a WebJob type for each scenario.

Which WebJob type should you recommend? To answer, drag the appropriate WebJob types to the correct scenarios. Each WebJob type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Box 1: Continuous

Continuous runs on all instances that the web app runs on. You can optionally restrict the WebJob to a single instance.

Box 2: Triggered

Triggered runs on a single instance that Azure selects for load balancing.

Box 3: Continuous

Continuous supports remote debugging.

Note:

The following table describes the differences between continuous and triggered WebJobs.

References:

<https://docs.microsoft.com/en-us/azure/app-service/web-sites-create-web-jobs>
