## PMI Certified Associate in Project Management (CAPM) Sample Questions

## (Q925-Q930):

### NEW QUESTION # 925

The product scope description is used to:

- A. Define the process and criteria for accepting a completed product, service, or result.
- **B. Progressively elaborate the characteristics of the product, service, or result.**
- C. Gain stakeholders' support for the project.
- D. Describe the project in great detail.

**Answer: B**

Explanation:

Section: Volume C

Explanation:

#### 5.3.3.1 Project Scope Statement

The project scope statement is the description of the project scope, major deliverables, assumptions, and constraints. The project scope statement documents the entire scope, including project and product scope. It describes, in detail, the project's deliverables and the work required to create those deliverables. It also provides a common understanding of the project scope among project stakeholders. It may contain explicit scope exclusions that can assist in managing stakeholder expectations. It enables the project team to perform more detailed planning, guides the project team's work during execution, and provides the baseline for evaluating whether requests for changes or additional work are contained within or outside the project's boundaries.

The degree and level of detail to which the project scope statement defines the work that will be performed and the work that is excluded can help determine how well the project management team can control the overall project scope. The detailed project scope statement, either directly, or by reference to other documents, includes the following:

Product scope description. Progressively elaborates the characteristics of the product, service, or result

□ described in the project charter and requirements documentation.

Acceptance criteria. A set of conditions that is required to be met before deliverables are accepted.

□ Deliverable. Any unique and verifiable product, result, or capability to perform a service that is required to be

□ produced to complete a process, phase, or project. Deliverables also include ancillary results, such as project management reports and documentation. These deliverables may be described at a summary level or in great detail.
