Cisco 300-710 Dumps - Hassle-Free Accomplishment

If you want to pass the 300-710 exam, you should buy our 300-710 exam questions to prepare for it. Our sincerity stems from the good quality of our 300-710 learning guide is that not only we will give you the most latest content. Also we will give you one year's free update of the 300-710 Study Materials you purchase and 24/7 online service. Now just make up your mind and get your 300-710 exam braindumps!

Cisco 300-710 Certification Exam is an excellent opportunity for network security professionals to enhance their skills and knowledge in managing and securing Cisco Firepower NGFW. Securing Networks with Cisco Firepower certification is an industry-recognized standard that can help candidates advance their careers and demonstrate their expertise in network security. Passing this certification exam requires dedication, hard work, and a solid understanding of Cisco Firepower NGFW.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q139-Q144):

NEW QUESTION # 139

In a Cisco AMP for Networks deployment, which disposition is returned if the cloud cannot be reached?

- A. clean
- B. disconnected
- C. unknown
- D. unavailable

Answer: D

Explanation:

Unavailable indicates that the system could not query the AMP cloud.

https://www.cisco.com/c/en/us/td/docs/security/firepower/623/configuration/guide/fpmc-config_guide-v623/file_malware_events_and_network_file_trajectory.html

NEW QUESTION # 140

A network administrator is reviewing a weekly scheduled attacks risk report and notices a host that is flagged for an impact 2 attack. Where should the administrator look within Cisco FMC to find out more relevant information about this host and attack?

- A. Analysis > Correlation > Correlation Events
- B. Analysis > Hosts > Vulnerabilities
- C. Analysis > Lookup > Whols
- D. Analysis > Hosts > Host Attributes

Answer: B

Explanation:

Explanation

The Analysis > Hosts > Vulnerabilities page in Cisco FMC displays information about the hosts on the network and their associated vulnerabilities. The administrator can filter the hosts by impact level, which indicates how likely an attack is to succeed against a host. An impact level of 2 means that the host was attacked and is potentially vulnerable, but no exploit was confirmed. The administrator can click on a host to view more details, such as its IP address, operating system, applications, protocols, and intrusion events. The administrator can also view the details of each vulnerability, such as its CVE ID, description, severity, and recommended actions.

NEW QUESTION # 141

An administrator is adding a QoS policy to a Cisco FTD deployment. When a new rule is added to the policy and QoS is applied on 'Interfaces in Destination Interface Objects', no interface objects are available. What is the problem?

- A. A conflict exists between the destination interface types that is preventing QoS from being added
- B. The FTD is out of available resources for use, so QoS cannot be added
- C. QoS is available only on routed interfaces, and this device is in transparent mode.
- D. The network segments that the interfaces are on do not have contiguous IP space

Answer: C

Explanation:

https://www.cisco.com/c/en/us/td/docs/security/firepower/640/configuration/guide/fpmc-config_guide-v64/quality_of_service_qos_for_firepower_threat_defense.html

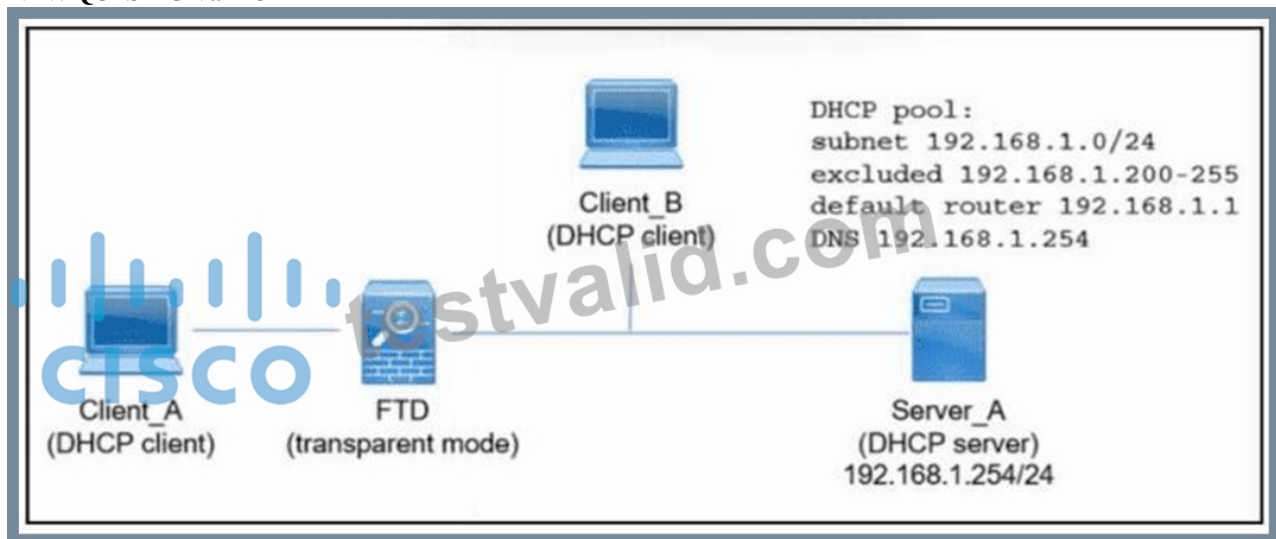

NEW QUESTION # 142

A network administrator is configuring an instance of Cisco Secure Firewall Threat Defense, which is registered to Cisco Secure Firewall Management Center, to prevent internal users from downloading executable files from the internet. What must be created and configured by the administrator to meet the requirement?

- A. file policy rule that allows users to reach the internet with a second rule applied that blocks application use of FTP
- B. access policy rule that allows users to reach the internet with a second rule that blocks application executables
- C. access policy rule that allows users to reach the internet and assigns a file policy that blocks executable downloads to the rule
- D. file policy that blocks downloads of all executable files and applies the file policy to the default action in the access policy

Answer: C

NEW QUESTION # 143

Refer to the exhibit. An engineer is deploying a new instance of Cisco Secure Firewall Threat Defense. Which action must the engineer take next so that Client_A and Client_B receive an IP address via DHCP from Server_A?

- A. Add access rules that allow DHCP traffic by using Cisco Secure Firewall Management Center.
- B. Add another DHCP pool on Server_A with DHCP relay on Secure Firewall Threat Defense.
- C. Disable all the DHCP Snort rules by using Secure Firewall Device Manager.
- D. Disable Option 82 in the DHCP relay configuration properties using Secure Firewall Management Center.

Answer: A

NEW QUESTION # 144

.....

The students can give unlimited to track the performance of their last given tests in order to see their mistakes and try to avoid them while giving the final test. Customers of TestValid will receive updates till 1 year after their purchase. Anyone can try a free demo of the Securing Networks with Cisco Firepower (300-710) practice material before making purchase. There is a 24/7 available support system that assists users whenever they are stuck in any problem or issues. This product is a complete package and a blessing for those who want to pass the Cisco 300-710 test in a single try.
