The VCEPrep is one of the top-rated and leading platforms that have been offering a simple, smart, and easiest way to pass the challenging 2V0-13.25 exam with good scores. The VMware 2V0-13.25 Exam Questions are real, valid, and updated. These 2V0-13.25 exam practice questions are designed and verified by experienced and qualified 2V0-13.25 exam experts.

## VMware 2V0-13.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>VMware Products and Solutions: This section of the exam evaluates the knowledge of VMware Solution Specialists and focuses on VMware Cloud Foundation (VCF). Candidates must be able to identify and differentiate between various VCF architecture options in given scenarios. The emphasis is on understanding the key products and how they integrate into enterprise design choices.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• Troubleshoot and Optimize the VMware Solution: This section of the exam measures the skills of Operations Engineers. There are no explicitly testable objectives provided in this domain, but candidates are expected to understand troubleshooting and optimization principles to maintain the VMware environment effectively in real-world deployments.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers the ability to distinguish business requirements from technical ones. It expects candidates to understand the differences between conceptual, logical, and physical designs while also differentiating requirements, assumptions, constraints, and risks. Core concepts of availability, manageability, performance, recoverability, and security (AMPRS) are tested. Learners also need to document risk mitigation strategies, design decisions, and create a validation strategy that ties requirements to practical implementation.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Plan and Design the VMware Solution: This section measures the skills of Cloud Infrastructure Designers. It focuses on gathering and analyzing business requirements and then transforming them into conceptual, logical, and physical models of VMware Cloud Foundation. Candidates are expected to identify prerequisites and make design decisions across fleet topologies, networking, management domains, workload domains, automation, and operations. The section also includes designing for availability within and across zones, creating strategies for manageability such as lifecycle, scalability, and capacity, and ensuring performance and recoverability through BCDR strategies. Additional emphasis is given to designing secure environments, workload migration strategies, and creating consumption, automation, and monitoring strategies to support modern applications and governance.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Install, Configure, Administrate the VMware Solution: This section of the exam is relevant to System Administrators. Although it has no directly testable objectives, it underlines the expectation that candidates are familiar with installation, configuration, and administration tasks that form the foundation for VMware Cloud Foundation solutions.</li> </ul>

## Free 2V0-13.25 Practice Exams | Sample 2V0-13.25 Questions

Our website is a pioneer in providing comprehensive VMware dumps torrent because we have a group of dedicated IT experts who have more than 10 years of experience in the study of 2V0-13.25 test questions and answers. They work in advance to make sure that our candidates will get latest and accurate 2V0-13.25 Exam Prep materials. You will get 2V0-13.25 passing score with the shortest duration for exam preparation.

## VMware Cloud Foundation 9.0 Architect Sample Questions (Q15-Q20):

### NEW QUESTION # 15

A customer is designing a multi-site VMware Cloud Foundation (VCF) and vSAN Data Protection (DP) architecture to ensure business continuity. The customer's support team must validate the failover and recovery processes before being allowed to deploy into production.

Which two validation activities should be included in the strategy to meet the objective? (Choose two.)

- A. Perform planned and unplanned failover tests in a controlled environment to validate recovery time objectives.
- B. Conduct recovery plan testing annually, as frequent testing may introduce instability in DR environments.
- C. Configure recovery plans based on generic VMware best practices rather than workload-specific requirements to decrease the architecture complexity.
- D. Configure vSphere HA and DRS features to manage disaster recovery automatically, eliminating the need for additional validation.
- E. Assess the impact of failover scenarios on application dependencies and inter-site connectivity.

**Answer: A,E**

Explanation:

Validating a BCDR strategy in VCF with vSAN DP requires both impact analysis and active testing:

\* B. Assess the impact of failover scenarios- Ensures application dependencies, such as inter-site routing, DNS, and external

services, are validated against failover scenarios. This prevents unexpected downtime due to overlooked dependencies.

\* D. Planned and unplanned failover tests- VMware best practices emphasize testing both scheduled and unexpected recovery workflows to validate RTOs and confirm operational procedures.

Why not the others?

\* A (annual testing only) contradicts VMware guidance, which recommends frequent and scenario-based validation.

\* C (generic plans) reduces workload alignment; VMware requires application-aware recovery plans.

\* E (vSphere HA/DRS) does not replace site-level recovery orchestration and validation - HA/DRS only handles local host failures, not site disasters.

VMware vSAN DP Architecture & Operations Best Practices

### NEW QUESTION # 16

How can Broadcom RAID controllers optimize VMware storage performance in large environments?

- A. Use RAID 5 for space efficiency
- B. Utilize multiple RAID arrays
- C. Enable RAID 10 for redundancy and speed
- D. Choose RAID 1 for maximum redundancy

**Answer: B,C**

Explanation:

RAID 10 and multiple arrays improve performance and redundancy, crucial for large VMware environments.

### NEW QUESTION # 17

What are the best practices for maintaining high performance in VMware environments with Broadcom networking hardware?

- A. Use vSphere Distributed Switch (VDS)
- B. Enable VMXNET3 drivers
- C. Configure network QoS (Quality of Service)
- D. Optimize network adapter settings

**Answer: A,B,C,D**

Explanation:

Optimizing network adapter settings, using VMXNET3 drivers, utilizing vSphere Distributed Switch, and configuring QoS ensure high network performance.

### NEW QUESTION # 18

Which best practices improve the security of VMware environments using Broadcom hardware?

- A. Leverage Broadcom's hardware security features
- B. Use VMware NSX Distributed Firewall
- C. Use VMware vSphere Encryption
- D. Enable VM monitoring with vRealize Operations

**Answer: A,B,C,D**

Explanation:

VMware vSphere Encryption, vRealize Operations, NSX Distributed Firewall, and Broadcom hardware security features all enhance security.

### NEW QUESTION # 19

Which Broadcom solutions are crucial when designing a VMware environment focused on data security?

- A. vSphere HA

- **B. vSAN**
- C. Broadcom 25GbE Ethernet Adapter
- **D. Broadcom RAID Controller**

**Answer: B,D**

Explanation:

Broadcom RAID Controllers and vSAN are essential for ensuring data security in VMware environments.

### NEW QUESTION # 20
